Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Shelby J. Beene the sum of $14,739.58, to Mrs. Shelby J. Beene the sum of $15,227.80, and to Leroy T. Waller and Mrs. Leroy T. Waller each the sum of $14,531.79, together with interest at the rate of 6 per centum per annum thereon in each case from December 28, 1929, to the date of making payment under this Act. Such sums represent overpayments of income taxes made (under protest) on such date by the said persons for the years 1921 and 1922. The said persons were four of forty-eight partners composing a partnership each member of which was assessed with deficiency assessments for 1921 and 1922. Depletion on account of certain bonuses and advanced royalties received by the partnership was not allowed and each partner's taxable income was correspondingly increased. Forty-four of the partners paid under protest and entered suits for refunds. The other four partners named in this Act appealed from the deficiency assessment, but the Board of Tax Appeals and Circuit Court of Appeals, Fifth Circuit maintained the validity of the assessments as to them, and the United States Supreme Court refused to grant them writs of certiorari. Subsequently the United States Supreme Court in the case of Palmer against Bender (287 U.S. 551) (being the consolidated suits of the forty-four remaining partners before the Supreme Court on writs of certiorari to the Circuit Court of Appeals, Fifth Circuit) held that the depletion claimed by the partnership should have been allowed, and the forty-four partners were allowed refunds accordingly. The four partners' claims for refunds involved the same facts and law as those of the forty-four partners: *Provided*, That no part of the amount appropriated in this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. INVESTIGATING SALE, ETC., OF DAIRY PRODUCTS

Investigating sale, etc., of dairy products.
Preamble.

Whereas an audit made by the Agricultural Adjustment Administration has revealed that distributors in four of the largest milksheds in the United States, for the five years ended December 31, 1933, made a net profit of 25.71 per centum on their net plant investment; and

Whereas this audit shows the net profits of distributors in each of the milksheds for the five-year period to be: Philadelphia (distributors handling 85 per centum of volume), 30.76 per centum; Boston (distributors handling 75 per centum of volume), 22.45 per centum; Saint Louis (distributors handling 67 per centum of volume), 14.64 per centum; and Chicago (distributors handling 90 per centum of volume), 25.84 per centum; and

Whereas during this same five-year period the wholesale price of milk sold by farmers declined 50 per centum, resulting in severe hardships and suffering to milk producers throughout the United States and strikes and violence in many rural and metropolitan centers; and

Whereas the aforesaid audit by the Agricultural Adjustment Administration has revealed net profits of milk distributors which tends to establish that similar conditions exist in other milksheds throughout the United States; and

Whereas an investigation in the District of Columbia pursuant to S.Res. 76, Seventy-third Congress, first session, revealed testimony which abundantly sustains the contention that over a period of years large milk distributors have attempted to create a monopoly in the District of Columbia, and largely as a result of these efforts farmers producing milk for the District of Columbia milkshed have received low returns for their product and have been placed at a serious disadvantage; and

Whereas the testimony adduced at hearings in the aforesaid investigation in the District of Columbia tends to prove that similar monopolistic efforts likewise exist in other milksheds in the United States; and

Whereas there is reason to believe that there exists a close tie between certain leaders of milk producers' cooperatives and milk distributors, which tie is unbeknown to milk producers and detrimental to their interests; and

Whereas the continuation of the practices now engaged in by milk distributors and certain leaders of milk cooperatives seriously endangers the efforts of the Agricultural Adjustment Administration and of the several States to alleviate and remedy the distress now widespread among dairy farmers in the United States, which distress if permitted to continue will result in the destruction of the already sorely pressed agricultural industry: Therefore be it

Resolved by the House of Representatives (the Senate concurring), That the Federal Trade Commission is authorized and directed to investigate conditions with respect to the sale and distribution of milk and other dairy products within the territorial limits of the United States by any person, partnership, association, cooperative, or corporation, with a view to determining particularly whether any such person, partnership, association, cooperative, or corporation is operating within any milkshed of the United States in such a manner as to substantially lessen competition or to tend to create a monopoly in the sale or distribution of such dairy products, or is a party to any conspiracy in restraint of trade or commerce in any such dairy products, or is in any way monopolizing or attempting to monopolize such trade or commerce within the United States or any part thereof, or is using any unfair method of competition in connection with the sale or distribution of any such dairy products, or is in any way operating to depress the price of milk sold by producers. The Federal Trade Commission shall report to the House of Representatives as soon as practicable the result of its investigations, together with its recommendations, if any, for necessary remedial legislation.

1. The Administration of origin is entitled to collect from the sender of each parcel the postage and the fees for requests for information as to the disposal of a parcel made after it has been posted, and also, in the case of insured parcels, the insurance fees and the fees for return receipts, that may from time to time be prescribed by its regulations.

(c) Any live animal, except leeches.

Nonadmissible articles.

(d) Any article the admission of which is forbidden by the Customs or other laws or regulations in force in either country.

Designated uninsured articles.

(g) It is, moreover, forbidden to send coin, platinum, gold or silver (whether manufactured or unmanufactured), precious stones, jewels, or other precious articles in uninsured parcels.

Prohibited articles erroneously handled.

2. When a parcel contravening any of these prohibitions is handed over by one Administration to the other, the latter shall proceed in accordance with its laws and inland regulations. Explosive or inflammable articles, as well as documents, pictures and other articles injurious to public morals may be destroyed on the spot by the Administration which has found them in the mails.

Parcel containing a letter.

The fact that a parcel contains a letter, or a communication having the nature of a letter, may not, in any case, entail the return of the parcel to the sender. The letter is, however, marked for the collection of postage due from the addressee at the regular rate.

List of prohibited articles to be published.

The two Administrations advise each other, by means of the List of Prohibited Articles published by the International Bureau of the Universal Postal Union, of all prohibited articles. However, they do not assume, on that account, any responsibility towards the customs or police authorities, or the sender.

Article VI.

Article VII.

Indemnity.

Indemnity.

Allowance to sender.

1. Except in the cases mentioned in the section following, the Administrations are responsible for the loss of insured parcels mailed in one of the two contracting countries for delivery in the other and for the abstraction of or damage to their contents.

Amount restricted.

The sender, or other rightful claimant, is entitled on this account to an indemnity corresponding to the actual amount of the loss, abstraction or damage. The amount of indemnity is calculated on the basis of the actual value (current price, or, in the absence of current price, at the ordinary estimated value) at the time and place of mailing of the parcel, provided in any case that the indemnity shall not exceed the amount for which the parcel was insured and on which the insurance fee has been collected, or the maximum of 500 francs gold.

Return of postage on loss of parcel.

In the case where indemnity is payable for the loss of a parcel or for the destruction or abstraction of the whole of the contents thereof, the sender is entitled to the return of the postal charges. However, the insurance fees are not in any case returned.

Transit originating in a third country destined for either contracting power.

In the absence of special agreement to the contrary between the countries involved no indemnity will be paid by either country for the loss of transit insured parcels originating in a country not participating in this Agreement and destined for one of the two contracting countries.

Parcel forwarded to a third country.

When an insured parcel originating in one country and addressed for delivery in the other country is reforwarded from there to a third country or is returned to a third country at the request of the sender or addressee, the party entitled to the indemnity, in case of loss, rifling or damage occurring subsequent to the reforwarding or return of the parcel by the original country of destination, can lay claim, in such cases, only to the indemnity which the country where the loss, rifling or damage occurred consents to pay, or which that country is obligated to pay in accordance with the agreement made between the countries directly interested in the reforwarding or return. Either of the two countries signing the present Agreement which wrongly forwards an insured parcel to a third country is responsible to the sender to the same extent as the country of origin, that is, within the limit of the present Agreement.

Responsibility for error.

2. The Administrations are relieved of all responsibility.
(a) In case of parcels of which the addressee has accepted delivery without reservation.

(b) In case of loss or damage through force majeure (causes beyond control) although either Administration may at its option and without recourse to the other Administration pay indemnity for loss or damage due to force majeure even in cases where the Administration of the country in the service of which the loss or damage occurred recognizes that the damage was due to force majeure.

Destruction of official documents.
(c) When they are unable to account for parcels in consequence of the destruction of official documents through force majeure.

Damage through fault of sender, addressee, etc.
(d) When the damage has been caused by the fault or negligence of the sender or the addressee or the representative of either, or when it is due to the nature of the article.

Prohibited articles.
(e) For parcels which contain prohibited articles.

Declared above real value.
(f) In case the sender of an insured parcel, with intent to defraud, shall declare the contents to be above their real value; this rule, however, shall not prejudice any legal proceedings necessitated by the legislation of the country of origin.

Seized, because of false declarations.
(g) For parcels seized by the customs because of false declaration of contents.

Unclaimed within a year.
(h) When no inquiry or application for indemnity has been made by claimant or his representative within a year commencing with the day following the posting of the insured parcel.

Matter of no intrinsic value, etc.
(i) For parcels which contain matter of no intrinsic value or perishable matter or which did not conform to the stipulations of this Convention or which were not posted in the manner prescribed, but the country responsible for the loss, rifling or damage may pay indemnity in respect of such parcels without recourse to the other Administration.

Indirect loss, etc.
3. No compensation shall be given for indirect loss or loss of profits of any parcel transmitted under this Agreement.

Indemnity payment.
4. The payment of compensation for an insured parcel shall be made to the rightful claimant as soon as possible and at the latest within a period of one year counting from the day following that on which the application is made.

Deferred, in exceptional cases.
However, the paying Postal Administration may exceptionally defer payment of indemnity for a longer period than that stipulated if, at the expiration of that period, it has not been able to determine the disposition made of the article in question or the responsibility incurred.

Payment by country of origin if country of destination delays 9 months.
5. Except in cases where payment is exceptionally deferred as provided in the second paragraph of the foregoing section, the Postal Administration which undertakes the payment of compensation is authorized to pay indemnity on behalf of the Office which, after being duly informed of the application for indemnity, has let nine months pass without settling the matter.

Country responsible.
6. The obligation of paying the indemnity shall rest with the Postal Administration to which the mailing office is subordinate, provided that in cases where the indemnity is paid to the addressee in accordance with the second paragraph of the first section, it shall rest with the Postal Administration of destination.

Claim for repayment.
The paying Administration retains the right to make a claim against the Administration responsible.

Responsibility of receiving country unable to show disposition.
7. Until the contrary is proved, responsibility for an insured parcel rests with the Postal Administration which having received the parcel without making any observation and being furnished all necessary particulars for inquiry is unable to show its proper disposition.

Dispatching office responsible if loss discovered by receiving office.

8. Responsibility for loss, abstraction or damage of an insured parcel discovered by the receiving office of exchange at the time of opening the receptacles and duly notified to the dispatching office of exchange by Bulletin of Verification shall fall upon the Postal Administration to which the dispatching office of exchange is subordinate unless it be proved that the damage occurred in the service of the receiving Administration.

Loss, etc., in transit.

9. If the loss, abstraction or damage has occurred in course of conveyance, without its being possible to ascertain in which service the irregularity took place, the Postal Administrations concerned bear the loss in equal shares.

Repayment to country paying.

10. The Postal Administration responsible or on whose account payment is made in accordance with Section 5 is bound to repay to the country making payment on its behalf, without delay and within not more than six months after receiving notice of payment, the amount of indemnity paid.

Means to be used.

11. Repayments are to be made free of cost to the creditor Administration by means of either a money order or a draft, in money valid in the creditor country, or by such other means as may be mutually agreed upon by correspondence.

Repayments on gold basis.

12. Repayments of indemnity by one country to the other will be made on the gold basis.

Sender responsible for proper packing, etc.

13. The responsibility of properly enclosing, packing and sealing insured parcels rests upon the sender, and the postal service of neither country will assume liability for loss, rifling or damage arising from defects which may not be observed at the time of posting.

No responsibility for ordinary parcels.

14. The Postal Administrations of the two contracting countries will not be responsible for the loss, abstraction or damage of an ordinary parcel; but either Administration is at liberty to indemnify for the loss, abstraction or damage which may occur in its service, without recourse to the other Administration.

In the direction from the United States of America to New Zealand, these parcels may not exceed the following dimensions:

Greatest length 4 feet, on condition that parcels over 42 inches but not over 44 inches long do not exceed 24 inches in girth; that parcels over 44 inches but not over 46 inches long do not exceed 20 inches in girth; that parcels over 46 inches but not over 48 inches long do not exceed 16 inches in girth; and that parcels up to 3½ feet in length do not exceed 6 feet in length and girth combined.

In the direction from New Zealand to the United States of America, these parcels may not exceed the following dimensions:

Length, 3½ feet; length and girth (taken in a direction other than that of the length) combined 6 feet.

The limit of weight and maximum dimensions stated above may be changed from time to time by agreement made through correspondence.

ARTICLE 2.

Preparation of Parcels.

Preparation of parcels.

1. The name and address of the sender and of the addressee must be legibly and correctly written in every case when possible on the parcel itself or on a label or tag firmly attached thereto. It is not allowed to write with initials the name and address of the sender or addressee, unless the initials are the adopted trade name of the senders or addressees which is generally understood. Addresses in pencil are also not allowed, except those written with copying ink on a surface previously dampened.

A slip bearing the name and address of the sender and addressee must be enclosed in the parcel when the address is written on a label or tag which is not gummed to the parcel. It is advisable that such slips be enclosed in all parcels.

2. Every parcel must be packed in a manner adequate for the length of the journey and the character of the contents, and in such a way as to prevent the contents from damaging other parcels or objects or injuring the postal agents. The packing must protect the contents sufficiently that, in case of rifling, the traces thereof may be easily discovered.

No packing is required for ordinary parcels consisting of a single article, such as pieces of wood, metal, etc., which are not usually packed by the trade.

Any liquid or any substance which easily liquefies must be packed in a double receptacle. Between the first receptacle (bottle, flask, pot, box, etc.) and the second (box of metal, of strong wood, of strong corrugated cardboard or of strong fibreboard or receptacle of equal strength) shall be left a space which shall be filled with sawdust, bran or some other absorbent material, in sufficient quantity to absorb all the liquid contents in the case of breakage.

Powders and dyes in powder form must be packed in lead-sealed metal containers which must be enclosed in substantial outer covers, so as to obviate all damage to the accompanying mail matter.

3. Insured parcels must be sealed by means of wax, by lead or other seals. Ordinary parcels may be sealed at the option of the sender, or careful tying is sufficient as a mode of closing. Either Administration may require a special design or mark of the sender in the sealing of insured parcels mailed in its service, as a means of protection.

The customs of the country of destination, for the purpose of customs examination, shall have the right to break the seals. After customs examination is concluded, the parcels shall be officially resealed.

4. On the address side, each insured parcel must bear a label with the words " Insured " or " Valeur déclarée ", or be stamped or marked with the same words in close proximity to the number given the parcel, and it must also bear an indication of the amount of the insured value, mentioned fully and legibly in the currency of the country of origin and in Roman letters. This amount must be converted into gold francs by the sender or by the office of origin and the result of conversion is added below the original description. The amount of the insured value must also be indicated on the customs declaration.

5. The seals, as well as any kind of labels or stamps, affixed to insured parcels, must be so placed as not to hide injuries to the package. Moreover, the labels or stamps must not be folded over two sides of the package so as to cover the edge.

ARTICLE 3.

Customs Declarations.

Customs declarations.

1. The sender shall prepare one customs declaration for each parcel sent from either country, upon a special form provided for the purpose by the country of origin.

The customs declaration shall give a general description of the parcel, an accurate statement in detail of its contents and value, date of mailing, actual weight, the sender's name and address, and the name and address of the addressee, and shall be securely attached to the parcel. However, as an exception to the foregoing, when more than one parcel is mailed simultaneously by the same sender in the United States of America to the same addressee at the same address in New Zealand, the sender need prepare only one customs declaration for the entire shipment, which customs declaration shall show, in addition to the particulars set forth in the preceding sentence, the total number of parcels comprising the shipment, and shall be securely attached to one of the parcels. The parcels comprising the entire shipment shall be clearly marked in such case with a fractional number, the numerator of which will indicate, in arabic figures, the number of the parcel, and the denominator the number of parcels comprising the shipment; for example, if a single shipment were composed of 15 parcels, each parcel would be numbered, respectively, 1/15, 2/15, 3/15, etc.

2. The Administrations accept no responsibility for the correctness of the customs declarations.

ARTICLE 4.

Return Receipts.

Return receipts.

1. As to a parcel for which a return receipt is asked, the office of origin impresses on the parcel the letters or words "A.R." or "Avis de réception". The office of origin or any other office appointed by the dispatching Administration shall fill out a return receipt form and attach it to the parcel. If the form does not reach the office of destination, that office makes out a duplicate.

2. The office of destination, after having duly filled out the return receipt form, returns it free of postage to the address of the sender of the parcel.

3. When the sender applies for a return receipt after a parcel has been posted, the office of origin duly fills out a return receipt form and attaches it to a form of inquiry which is entered with the details concerning the transmission of the parcel and then forwards it to the office of destination of the parcel. In the case of the due delivery of the parcel, the office of destination withdraws the inquiry form, and the return receipt is treated in the manner prescribed in the foregoing paragraph.

ARTICLE 5.

Receptacles.

Receptacles.

1. The Postal Administrations of the two contracting countries shall provide the respective bags necessary for the dispatch of their parcels and each bag shall be marked to show the name of the office or country to which it belongs.

2. Bags must be returned empty to the dispatching office by the next mail. Empty bags to be returned are made up in bundles of ten, enclosing nine bags in one. The total number of bags returned shall be entered on the relative parcel bills.

3. In case ten per cent of the total number of bags used during the year have not been returned, the value of the missing bags must be repaid to the Administration of origin.

ARTICLE 6.

Method of Exchange of Parcels.

Method of exchange of parcels.

1. The parcels shall be exchanged, in sacks duly fastened and sealed, by the Offices appointed by agreement between the two Administrations, and shall be dispatched to the country of destination by the country of origin at its cost and by such means as it provides.

2. Insured parcels shall be enclosed in separate sacks from those in which ordinary parcels are contained, and the labels of sacks containing insured parcels shall be marked with such distinctive symbols as may from time to time be agreed upon.

ARTICLE 7.

Billing of Parcels.

Billing.

1. Ordinary parcels exchanged direct between the two countries shall be entered on the parcel bills to show the total number of parcels, the total net weight thereof, and the total amount to be credited, while redirected or returned parcels shall be entered individually. The total number of sacks comprising each dispatch shall also be indicated on the parcel bills.

2. Insured parcels shall be entered individually on separate parcel bills to show the insurance number and the name of the office of origin, as well as the total net weight thereof.

3. Parcels sent à découvert must be entered separately on the parcel bills.

4. The entry on the bill of any returned or reforwarded parcel must be followed by the word "Returned" or "Reforwarded", together with the detailed statement of charges which may be additionally collected, in the "Observations" column.

5. Each dispatching office of exchange shall number the parcel bills in the upper left-hand corner, commencing each year a fresh series for each office of exchange of destination. The last number of the year shall be shown on the parcel bill of the first dispatch of the following year.

6. The parcel bills are prepared in duplicate. The original is sent in the regular mails, while the duplicate is inserted in one of the sacks. The sack containing the parcel bill is designated by the letter "F", traced in a conspicuous manner on the label.

ARTICLE 8.

Checking of Parcels.

Checking of parcels.

1. The office of exchange which has received a parcel mail shall check the parcels and the accompanying bills. If a parcel is missing or any other irregularity is noted, it shall be immediately reported to the dispatching office of exchange by means of a Bulletin of Verification. The report of such a serious irregularity as to

involve the responsibility of the respective Administrations shall be accompanied by such vouchers as the strings, wax, or lead seals used for closing the bag which contained the parcels, if they are available.

If no report is made by the next mail, it will be assumed that the mail has been received in proper order until the contrary is proved.

2. If a parcel bill is missing a duplicate shall be made out and a copy sent to the dispatching office of exchange from which the dispatch was received.

3. If any parcel which is in the course of transmission is observed to bear evidence of violation or damage, it must have the facts noted on it and be marked with the stamp of the office making the note, or a document drawing attention to the violation or damage must be forwarded with the parcel.

ARTICLE 9.

AGREEMENT CONCERNING PROOF OF THE ORIGIN OF IMPORTED MERCHANDISE EFFECTED BY EXCHANGE OF NOTES PROVIDED FOR IN THE TENTH PARAGRAPH OF ARTICLE VI OF THE TREATY

Agreement concerning proof of origin of imported merchandise. *Ante*, p. 1515.

The Secretary of State (Stimson) to the Polish Ambassador (Filipowicz)

DEPARTMENT OF STATE,
Washington, June 15, 1931.

EXCELLENCY:

I have the honor to communicate to Your Excellency my understanding of the agreement reached regarding the requirements for furnishing proof of the origin of imported merchandise entitled to the benefits of the treaty of friendship, commerce and consular rights signed this day on behalf of the United States of America and Poland.

In the event that proof of the origin of imported goods is required by either Party pursuant to the provisions of the tenth paragraph of Article VI of the treaty, it is agreed that

(1) A declaration by the shipper in the country of origin legalized by a consular representative of the country of final destination resident in the country of origin shall be accepted as satisfactory proof of the origin of the goods. As far as certificates of origin for importation into the Polish customs territory are concerned, the above-mentioned shipper's declaration before legalization by a consular representative of Poland, has to be certified by a competent Chamber of Commerce or similar organization, subject to the exceptions provided for in subparagraph (a) of paragraph (3) hereof.

(2) For indirect shipments an acceptable alternative to the certificate of origin obtained in the country of origin as provided in paragraph (1) shall be proof of origin obtainable in the intermediate country from which the goods are last shipped to the country of final destination. Such proof shall consist of a declaration by the consignor of the goods in the intermediate country before a consular officer of the country of origin resident in the intermediate country, certified by the latter and approved by a consular representative of the country of final destination resident in the intermediate country, it being understood that the consular representatives of the country of origin shall not certify the shipper's declaration for this purpose unless they are satisfied upon examination of documentary or other evidence that the statements made therein are true.

(3) The attached form of certificate of origin for use in connection with direct shipments from the United States to Poland and the attached form for use in connection with indirect shipments from the United States to Poland through an intermediate country or countries,

respectively, conform to the provisions above set forth, it being understood and agreed, however, that

(a) If the circumstances of any particular case render it impracticable for the shipper of the goods to obtain certification on a certificate of origin by a Chamber of Commerce or similar organization, the certificate of origin may be submitted for authentication directly to a Polish consular officer, and the fact that certification by a Chamber of Commerce or similar organization has not been obtained shall not be considered by such consular officer as of itself sufficient ground for refusing to authenticate the document.

(b) If at the time the certificate of origin is made out circumstances render it difficult or inconvenient for shippers to specify on such certificate the name of the vessel on which the goods are to be shipped, the necessities and convenience of shippers shall be taken into account either by waiving this requirement or by making such other provision as the circumstances of the case require.

(c) In exceptional cases in which doubt exists regarding the exact proportion of the value of any given article represented by the costs of the labor and raw material of the United States, or in which such proportion is less than fifty per centum, but the article, in view of the nature and extent of the processes to which it has been subjected, is distinctly an American product, no certification regarding such proportion on a certificate of origin shall be required.

Any article in which the raw material or the labor of the United States represents less than fifty per centum of the total value shall, nevertheless, be deemed to be a product of the United States if a like article from any third country representing less than fifty per centum in value the labor and raw material of such third country is deemed to be a product of that country.

(4) In the event that modification of the requirements outlined in the preceding paragraphs is at any time considered desirable from the viewpoint of either Party, it is agreed that its proposals to this end shall be given sympathetic consideration by the other Party.

I shall be glad to have your confirmation of the accord thus reached.

Accept, Excellency, the renewed assurances of my highest consideration.

The Polish Ambassador (Filipowicz) to the Secretary of State (Stimson) Agreement by Poland.

AMBASADA POLSKA
W WASZYNGTONIE

No. 2241/31 *June 15, 1931.*

SIR:

I have the honor to acknowledge the receipt of your note of this date concerning your understanding of the agreement reached regarding the requirements for furnishing proof of the origin of imported merchandise entitled to the benefits of the treaty of friendship, commerce and consular rights signed this day on behalf of Poland and the United States of America, and to confirm that understanding, as follows:

In the event that proof of the origin of imported goods is required by either Party pursuant to the provisions of the tenth paragraph of Article VI of the treaty, it is agreed that

(1) A declaration by the shipper in the country of origin legalized by a consular representative of the country of final destination resident in the country of origin shall be accepted as satisfactory proof of the origin of the goods. As far as certificates of origin for importation into the Polish customs territory are concerned, the above-mentioned shipper's declaration, before legalization by a consular representative of Poland, has to be certified by a competent Chamber of Commerce or similar organization, subject to the exceptions provided for in subparagraph (a) of paragraph (3) hereof.

(2) For indirect shipments an acceptable alternative to the certificate of origin obtained in the country of origin as provided in paragraph (1) shall be proof of origin obtainable in the intermediate country from which the goods are last shipped to the country of final destination. Such proof shall consist of a declaration by the consignor of the goods in the intermediate country before a consular officer of the country of origin resident in the intermediate country, certified by the latter and approved by a consular representative of the country of final destination resident in the intermediate country, it being understood that the consular representatives of the country of origin shall not certify the shipper's declaration for this purpose unless they are satisfied upon examination of documentary or other evidence that the statements made therein are true.

(3) The attached form of certificate of origin for use in connection with direct shipments from the United States to Poland and the attached form for use in connection with indirect shipments from the United States to Poland through an intermediate country or countries, respectively, conform to the provisions above set forth, it being understood and agreed, however, that

> (a) If the circumstances of any particular case render it impracticable for the shipper of the goods to obtain certification on a certificate of origin by a Chamber of Commerce or similar organization, the certificate of origin may be submitted for authentication directly to a Polish consular officer, and the fact

that certification by a Chamber of Commerce or similar organization has not been obtained shall not be considered by such consular officer as of itself sufficient ground for refusing to authenticate the document.

(b) If at the time the certificate of origin is made out circumstances render it difficult or inconvenient for shippers to specify on such certificate the name of the vessel on which the goods are to be shipped, the necessities and convenience of shippers shall be taken into account either by waiving this requirement or by making such other provision as the circumstances of the case require.

(c) In exceptional cases in which doubt exists regarding the exact proportion of the value of any given article represented by the costs of the labor and raw material of the United States, or in which such proportion is less than fifty per centum, but the article, in view of the nature and extent of the processes to which it has been subjected, is distinctly an American product, no certification regarding such proportion on a certificate of origin shall be required.

Any article in which the raw material or the labor of the United States represents less than fifty per centum of the total value shall, nevertheless, be deemed to be a product of the United States if a like article from any third country representing less than fifty per centum in value the labor and raw material of such third country is deemed to be a product of that country.

(4) In the event that modification of the requirements outlined in the preceding paragraphs is at any time considered desirable from the viewpoint of either Party, it is agreed that its proposals to this end shall be given sympathetic consideration by the other Party.

Accept, Sir, the renewed assurances of my highest consideration.

TYTUS FILIPOWICZ

THE HONORABLE
HENRY L. STIMSON,
Secretary of State.

1. Les Hautes Parties contractantes fourniront annuellement au Comité central permanent, institué par le Chapitre VI de la Convention de Genève, pour chaque drogue et pour chacun de leurs territoires auxquels s'applique la présente Convention, des évaluations conformes aux dispositions de l'article 5 de la présente Convention.

2. Lorsqu'une Haute Partie contractante n'aura pas fourni d'évaluations pour l'un quelconque de ses territoires auxquels la présente Convention s'applique, à la date prévue à l'article 5, paragraphe 4, ladite évaluation sera établie dans la mesure du possible par l'organe de contrôle prévu à l'article 5, paragraphe 6.

3. Le Comité central permanent demandera pour les pays ou territoires auxquels la présente Convention ne s'applique pas, des évaluations établies conformément aux stipulations de la présente Convention. Si, pour l'un quelconque de ces pays ou territoires, il n'est pas fourni d'évaluation, l'Organe de contrôle en établira lui-même dans la mesure du possible.

Article 3.

Toute Haute Partie contractante pourra fournir, si c'est nécessaire, pour une année quelconque, et pour l'un quelconque de ses territoires, des évaluations supplémentaires pour ce territoire pour ladite année, en exposant les raisons qui les justifient.

Article 4.

1. Toute évaluation fournie conformément aux articles précédents se rapportant à l'une quelconque des "drogues" requises pour la consommation intérieure du pays ou du territoire pour lequel elle est établie, sera fondée uniquement sur les besoins médicaux et scientifiques de ce pays ou de ce territoire.

2. Les Hautes Parties contractantes pourront, en dehors des stocks de réserve, constituer et maintenir des stocks d'Etat.

CHAPTER II.—ESTIMATES.

Article 2.

To be furnished annually.

1. Each High Contracting Party shall furnish annually, for each of the drugs in respect of each of his territories to which this Convention applies, to the Permanent Central Board, constituted under Chapter VI of the Geneva Convention, estimates in accordance with the provisions of Article 5 of this Convention.

Party failing to furnish.

2. In the event of any High Contracting Party failing to furnish, by the date specified in paragraph 4 of Article 5, an estimate in respect of any of his territories to which this Convention applies, an estimate will, so far as possible, be furnished by the Supervisory Body specified in paragraph 6 of Article 5.

Nonsignatories.

3. The Permanent Central Board shall request estimates for countries or territories to which this Convention does not apply to be made in accordance with the provisions of this Convention. If for any such country estimates are not furnished, the Supervisory Body shall itself, as far as possible, make the estimate.

Article 3.

Supplementaries.

Any High Contracting Party may, if necessary, in any year furnish in respect of any of his territories supplementary estimates for that territory for that year with an explanation of the circumstances which necessitate such supplementary estimates.

Article 4.

Basis.

1. Every estimate furnished in accordance with the preceding Articles, so far as it relates to any of the drugs required for domestic consumption in the country or territory in respect of which it is made, shall be based solely on the medical and scientific requirements of that country or territory.

Government stocks.

2. The High Contracting Parties may, in addition to reserve stocks, create and maintain Government stocks.

Article 5.

1. Les évaluations prévues aux articles 2 à 4 de la présente Convention devront être établies selon le modèle qui sera prescrit de temps à autre par le Comité central permanent et communiqué par les soins de ce Comité à tous les Membres de la Société des Nations et aux Etats non membres mentionnés à l'article 27.

2. Pour chacune des "drogues", soit sous la forme d'alcaloïdes ou sels ou de préparations d'alcaloïdes ou sels, pour chaque année et pour chaque pays ou territoire, les évaluations devront indiquer:

a) La quantité nécessaire pour être utilisée comme telle pour les besoins médicaux et scientifiques, y compris la quantité requise pour la fabrication des préparations pour l'exportation desquelles les autorisations d'exportation ne sont pas requises, que ces préparations soient destinées à la consommation intérieure ou à l'exportation;

b) La quantité nécessaire aux fins de transformation, tant pour la consommation intérieure que pour l'exportation;

c) Les stocks de réserve que l'on désire maintenir;

d) La quantité requise pour l'établissement et le maintien des stocks d'Etat, ainsi qu'il est prévu à l'article 4.

Par total des évaluations pour chaque pays ou territoire, on entend la somme des quantités spécifiées sous les alinéas *a*) et *b*) du présent paragraphe augmentée des quantités qui peuvent être nécessaires pour porter les stocks des réserves et les stocks d'Etat au niveau désiré, ou déduction faite de toute quantité dont ces stocks pourraient dépasser ce niveau. Il ne sera tenu compte, toutefois, de ces augmentations ou de ces diminutions que pour autant que les Hautes Parties contractantes intéressées auront fait parvenir en temps utile au Comité central permanent les évaluations nécessaires.

3. Chaque évaluation sera accompagnée d'un exposé de la méthode employée pour calculer les différentes quantités qui y seront inscrites. Si les quantités calculées comportent une marge tenant compte des fluctuations possibles de la demande, l'évaluation devra préciser le montant de la marge ainsi prévue. Il est entendu que, dans le cas de l'une quelconque des "drogues" qui sont ou peuvent être comprises dans le groupe II, il peut être nécessaire de laisser une marge plus large que pour les autres "drogues".

4. Toutes les évaluations devront parvenir au Comité central permanent au plus tard le 1er août de l'année qui précédera celle pour laquelle l'évaluation aura été établie.

5. Les évaluations supplémentaires devront être adressées au Comité central permanent dès leur établissement.

6. Les évaluations seront examinées par un Organe de contrôle. La Commission consultative du trafic de l'opium et autres drogues nuisibles de la Société des Nations, le Comité central permanent, le Comité d'hygiène de la Société des Nations et l'Office international d'Hygiène publique auront le droit de désigner chacun un membre de cet Organe. Le Secrétariat de l'Organe de contrôle sera assuré par le Secrétaire général de la Société des Nations en s'assurant la collaboration étroite du Comité central.

Article 5.

Prescribed form, etc.

1. Each estimate provided for in Articles 2 to 4 of this Convention shall be in the form from time to time prescribed by the Permanent Central Board and communicated by the Board to all the Members of the League of Nations and to the non-member States mentioned in Article 27.

Components to be specified.

2. Every estimate shall show for each country or territory for each year in respect of each of the drugs whether in the form of alkaloid or salts or of preparations of the alkaloids or salts:

(*a*) The quantity necessary for use as such for medical and scientific needs, including the quantity required for the manufacture of preparations for the export of which export authorisations are not required, whether such preparations are intended for domestic consumption or for export;

(*b*) The quantity necessary for the purpose of conversion, whether for domestic consumption or for export;

(*c*) The amount of the reserve stocks which it is desired to maintain:

(*d*) The quantity required for the establishment and maintenance of any Government stocks as provided for in Article 4.

The total of the estimates for each country or territory shall consist of the sum of the amounts specified under (*a*) and (*b*) of this paragraph with the addition of any amounts which may be necessary to bring the reserve stocks and the Government stocks up to the desired level, or after deduction of any amounts by which those stocks may exceed that level. These additions or deductions shall, however, not be taken into account except in so far as the High Contracting Parties concerned shall have forwarded in due course the necessary estimates to the Permanent Central Board.

Method of calculation.

3. Every estimate shall be accompanied by a statement explaining the method by which the several amounts shown in it have been calculated. If these amounts are calculated so as to include a margin allowing for possible fluctuations in demand, the estimates must indicate the extent of the margin so included. It is understood that in the case of any of the drugs which are or may be included in Group II, a wider margin may be necessary than in the case of the other drugs.

Time for submitting estimate.

4. Every estimate shall reach the Permanent Central Board not later than August 1st in the year preceding that in respect of which the estimate is made.

Supplementary estimates.

5. Supplementary estimates shall be sent to the Permanent Central Board immediately on their completion.

Examination, etc.

6. The estimates will be examined by a Supervisory Body. The Advisory Committee on the Traffic in Opium and other Dangerous Drugs of the League of Nations, the Permanent Central Board, the Health Committee of the League of Nations and the Office international d'Hygiène publique shall each have the right to appoint one member of this Body. The Secretariat of the Supervisory Body shall be provided by the Secretary-General of the League of Nations, who will ensure close collaboration with the Permanent Central Board.

Pour tout pays ou territoire pour lequel une évaluation aura été fournie, l'Organe de contrôle pourra demander, sauf en ce qui concerne les besoins de l'Etat, toute indication ou précision supplémentaire qu'il jugera nécessaire, soit pour compléter l'évaluation; soit pour expliquer les indications qui y figurent; à la suite des renseignements ainsi recueillis, il pourra modifier les évaluations avec le consentement de l'Etat intéressé. Dans le cas de l'une quelconque des "drogues" qui sont ou peuvent être comprises dans le groupe II, une déclaration sommaire sera suffisante.

7. Après avoir examiné, conformément au paragraphe 6 ci-dessus, les évaluations fournies et après avoir fixé, conformément à l'article 2, les évaluations pour les pays ou territoires pour lesquels il n'en aura pas été fourni, l'Organe de contrôle adressera, par l'entremise du Secrétaire général et au plus tard le 1er novembre de chaque année, à tous les Membres de la Société des Nations et aux Etats non membres mentionnés à l'article 27 un état contenant les évaluations pour chaque pays ou territoire; cet état sera accompagné, pour autant que l'Organe de contrôle le jugera nécessaire, d'un exposé des explications fournies ou demandées, conformément au paragraphe 6 ci-dessus, et de toutes observations que l'Organe de contrôle tiendrait à présenter relativement à toute évaluation, explication ou demande d'explication.

8. Toute évaluation supplémentaire communiquée au Comité central permanent au cours de l'année doit être traitée sans délai par l'Organe de contrôle suivant la procédure spécifiée aux paragraphes 6 et 7 ci-dessus.

Chapitre III.—Limitation de la fabrication.

Article 6.

1. Il ne sera fabriqué dans aucun pays ou territoire, au cours d'une année quelconque, de quantité d'une "drogue" quelconque supérieure au total des quantités suivantes:

a) La quantité requise, dans les limites des évaluations pour ce pays ou ce territoire, pour cette année, pour être utilisée comme telle pour ses besoins médicaux et scientifiques, y compris la quantité requise pour la fabrication des préparations pour l'exportation desquelles les autorisations d'exportation ne sont pas requises, que ces préparations soient destinées à la consommation intérieure ou à l'exportation;

b) La quantité requise dans les limites des évaluations pour ce pays ou ce territoire, pour cette année, aux fins de transformation, tant pour la consommation intérieure que pour l'exportation;

c) La quantité qui pourra être requise par ce pays ou ce territoire, pour l'exécution, au cours de l'année, des commandes destinées à l'exportation et effectuées conformément aux dispositions de la présente Convention;

The Supervisory Body may require any further information or details, except as regards requirements for Government purposes, which it may consider necessary, in respect of any country or territory on behalf of which an estimate has been furnished in order to make the estimate complete or to explain any statement made therein, and may, with the consent of the Government concerned, amend any estimate in accordance with any information or details so obtained. It is understood that in the case of any of the drugs which are or may be included in Group II a summary statement shall be sufficient.

Examination and determination.

7. After examination by the Supervisory Body as provided in paragraph 6 above of the estimates furnished, and after the determination by that Body as provided in Article 2 of the estimates for each country or territory on behalf of which no estimates have been furnished, the Supervisory Body shall forward, not later than November 1st in each year, through the intermediary of the Secretary-General, to all the Members of the League of Nations and non-member States referred to in Article 27, a statement containing the estimates for each country or territory, and, so far as the Supervisory Body may consider necessary, an account of any explanations given or required in accordance with paragraph 6 above, and any observations which the Supervisory Body may desire to make in respect of any such estimate or explanation, or request for an explanation.

Supplementary estimates.

8. Every supplementary estimate sent to the Permanent Central Board in the course of the year shall be dealt with without delay by the Supervisory Body in accordance with the procedure specified in paragraphs 6 and 7 above.

Chapter III.—Limitation of Manufacture.

Article 6.

Limitation of manufacture.

1. There shall not be manufactured in any country or territory in any one year a quantity of any of the drugs greater than the total of the following quantities:

(*a*) The quantity required within the limits of the estimates for that country or territory for that year for use as such for its medical and scientific needs including the quantity required for the manufacture of preparations for the export of which export authorisations are not required, whether such preparations are intended for domestic consumption or for export;

(*b*) The quantity required within the limits of the estimates for that country or territory for that year for conversion, whether for domestic consumption or for export;

(*c*) Such quantity as may be required by that country or territory for the execution during the year of orders for export in accordance with the provisions of this Convention;

d) La quantité éventuellement requise par ce pays ou territoire pour maintenir les stocks de réserve au niveau spécifié dans les évaluations de l'année envisagée;

e) La quantité éventuellement requise pour maintenir les stocks d'Etat au niveau spécifié dans les évaluations de l'année envisagée.

2. Il est entendu que si, à la fin d'une année, une Haute Partie contractante constate que la quantité fabriquée dépasse le total des quantités spécifiées ci-dessus, compte tenu des déductions prévues à l'article 7, premier alinéa, cet excédent sera déduit de la quantité qui doit être fabriquée au cours de l'année suivante. En transmettant leurs statistiques annuelles au Comité central permanent, les Hautes Parties contractantes donneront les raisons de ce dépassement.

Article 7.

Pour chaque "drogue", il sera déduit de la quantité dont la fabrication est autorisée, conformément à l'article 6, au cours d'une année quelconque, dans un pays ou territoire quelconque:

i) Toute quantité de la "drogue" importée, y compris ce qui aurait été retourné et déduction faite de ce qui aurait été réexporté;

ii) Toute quantité de ladite "drogue" saisie et utilisée comme telle pour la consommation intérieure ou la transformation.

S'il est impossible d'effectuer pendant l'exercice en cours l'une des déductions susmentionnées, toute quantité demeurant en excédent à a fin de l'exercice sera déduite des évaluations de l'année suivante.

Article 8.

La quantité d'une "drogue" quelconque, importée ou fabriquée dans un pays ou territoire aux fins de transformation, conformément aux évaluations de ce pays ou de ce territoire, devra être utilisée, si possible, en totalité à cet effet pendant la période visée par l'évaluation.

Toutefois, s'il est impossible d'utiliser ainsi la quantité totale dans la période en question, la fraction demeurant inutilisée à la fin de l'année sera déduite des évaluations de l'année suivante pour ce pays ou ce territoire.

Article 9.

Si, au moment où toutes les dispositions de la présente Convention deviendront applicables, les stocks d'une "drogue" existant à ce moment dans un pays ou territoire dépassent le montant des stocks de réserve de cette "drogue" que ce pays ou territoire désire maintenir, conformément à ses évaluations, cet excédent sera déduit de la quantité qui, normalement, pourrait être fabriquée ou importée, selon le cas, au cours de l'année, conformément aux dispositions de la présente Convention.

Si cette procédure n'est pas appliquée, le gouvernement prendra en charge les stocks en excédent existant au moment où toutes les

(*d*) The quantity, if any, required by that country or territory for the purpose of maintaining the reserve stocks at the level specified in the estimates for that year;

(*e*) The quantity, if any, required for the purpose of maintaining the Government stocks at the level specified in the estimates for that year.

Excess remaining to be deducted.

2. It is understood that, if at the end of any year, any High Contracting Party finds that the amount manufactured exceeds the total of the amounts specified above, less any deductions made under Article 7, paragraph 1, such excess shall be deducted from the amount to be manufactured during the following year. In forwarding their annual statistics to the Permanent Central Board, the High Contracting Parties shall give the reasons for any such excess.

Article 7.

Deductions.

There shall be deducted from the total quantity of each drug permitted under Article 6 to be manufactured in any country or territory during any one year:

(i) Any amounts of that drug imported including any returned deliveries of the drug, less quantities re-exported.

(ii) Any amounts of the drug seized and utilised as such for domestic consumption or for conversion.

If it should be impossible to make any of the above deductions during the course of the current year, any amounts remaining in excess at the end of the year shall be deducted from the estimates for the following year.

Article 8.

Imports for conversion purposes.

The full amount of any of the drugs imported into or manufactured in any country or territory for the purpose of conversion in accordance with the estimates for that country or territory shall, if possible, be utilised for that purpose within the period for which the estimate applies.

In the event, however, of it being impossible to utilise the full amount for that purpose within the period in question, the portion remaining unused at the end of the year shall be deducted from the estimates for that country or territory for the following year.

Article 9.

Restriction on existing stock.

If at the moment when all the provisions of the Convention shall have come into force, the then existing stocks of any of the drugs in any country or territory exceeds the amount of the reserve stocks of that drug, which, according to the estimates for that country or territory, it is desired to maintain, such excess shall be deducted from the quantity which, during the year, could ordinarily be imported or manufactured as the case may be under the provisions of this Convention.

Alternatively, the excess stocks existing at the moment when all the provisions of the Convention shall have come into force shall be

dispositions de la présente Convention deviendront applicables. Le gouvernement n'en délivrera, à certains intervalles, que les quantités qui peuvent être délivrées, conformément à la Convention. Toutes les quantités ainsi délivrées au cours de l'année seront déduites de la quantité totale destinée à être fabriquée ou importée, selon le cas, au cours de cette même année.

Chapitre IV.—Interdictions et restrictions.

Article 10.

1. Les Hautes Parties contractantes interdiront l'exportation de leurs territoires de la diacétylmorphine et de ses sels, ainsi que des préparations contenant de la diacétylmorphine ou ses sels.

2. Toutefois, sur demande émanant du gouvernement d'un pays où la diacétylmorphine n'est pas fabriquée, toute Haute Partie contractante pourra autoriser l'exportation à destination de ce pays des quantités de diacétylmorphine, de ses sels et des préparations contenant de la diacétylmorphine ou ses sels, qui sont nécessaires pour les besoins médicaux et scientifiques de ce pays, à la condition que cette demande soit accompagnée d'un certificat d'importation et soit adressée à l'administration officielle indiquée dans le certificat.

3. Toutes les quantités ainsi importées seront distribuées par le gouvernement du pays importateur et sous sa responsabilité.

Article 11.

1. Le commerce et la fabrication commercial de tout produit dérivé de l'un des alcaloïdes phénanthrènes de l'opium ou des alcaloïdes ecgoniniques de la feuille de coca, qui ne sera pas utilisé à la date de ce jour pour des besoins médicaux ou scientifiques, ne pourront être permis dans un pays ou territoire quelconque que si la valeur médicale ou scientifique de ce produit a été constatée d'une manière jugée probante par le gouvernement intéressé.

Dans ce cas, à moins que le gouvernement ne décide que le produit en question n'est pas susceptible d'engendrer la toxicomanie ou d'être converti en un produit susceptible d'engendrer la toxicomanie, les quantités dont la fabrication est autorisée ne devront pas, dans l'attente des décisions mentionnées ci-après, dépasser le total des besoins intérieurs du pays ou du territoire pour des fins médicales et scientifiques et la quantité nécessaire pour satisfaire aux commandes d'exportation, et les dispositions de la présente Convention seront appliquées audit produit.

2. La Haute Partie contractante qui autorisera le commerce ou la fabrication commerciale d'un de ces produits en avisera immédiatement le Secrétaire général de la Société des Nations, qui communiquera cette notification aux autres Hautes Parties contractantes et au Comité d'hygiène de la Société.

3. Le Comité d'hygiène, après avoir soumis la question au Comité permanent de l'Office international d'hygiène publique, décidera si le produit dont il s'agit peut engendrer la toxicomanie (et doit être assimilé de ce fait aux "drogues" mentionnées dans le sous-groupe *a*)

taken possession of by the Government and released from time to time in such quantities only as may be in conformity with the present Convention. Any quantities so released during any year shall be deducted from the total amount to be manufactured or imported as the case may be during that year.

Chapter IV.—Prohibitions and Restrictions.

Prohibitions and restrictions.

Article 10.

Exports of diacetylmorphine.

1. The High Contracting Parties shall prohibit the export from their territories of diacetylmorphine, its salts, and preparations containing diacetylmorphine, or its salts.

2. Nevertheless, on the receipt of a request from the Government of any country in which diacetylmorphine is not manufactured, any High Contracting Party may authorise the export to that country of such quantities of diacetylmorphine, its salts, and preparations containing diacetylmorphine or its salts, as are necessary for the medical and scientific needs of that country, provided that the request is accompanied by an import certificate and is consigned to the Government Department indicated in the certificate.

Imports.

3. Any quantities so imported shall be distributed by and on the responsibility of the Government of the importing country.

Article 11.

Regulation of traffic, etc., in.

1. No trade in or manufacture for trade of any product obtained from any of the phenanthrene alkaloids of opium or from the ecgonine alkaloids of the coca leaf, not in use on this day's date for medical or scientific purposes shall take place in any country or territory unless and until it has been ascertained to the satisfaction of the Government concerned that the product in question is of medical or scientific value.

In this case (unless the Government determines that such product is not capable of producing addiction or of conversion into a product capable of producing addiction) the quantities permitted to be manufactured, pending the decision hereinafter referred to, shall not exceed the total of the domestic requirements of the country or territory for medical and scientific needs, and the quantity required for export orders and the provisions of this Convention shall apply.

2. Any High Contracting Party permitting trade in or manufacture for trade of any such product to be commenced shall immediately send a notification to that effect to the Secretary-General of the League of Nations, who shall advise the other High Contracting Parties and the Health Committee of the League.

3. The Health Committee will thereupon, after consulting the Permanent Committee of the Office international d'Hygiène publique, decide whether the product in question is capable of producing addiction (and is in consequence assimilable to the drugs mentioned in sub-

du groupe I), ou s'il peut être transformé en une de ces mêmes drogues (et être, de ce fait, assimilé aux "drogues" mentionnées dans le sous-groupe *b*) du groupe I ou dans le groupe II).

4. Si le Comité d'hygiène décide que, sans être une "drogue" susceptible d'engendrer la toxicomanie, le produit dont il s'agit peut être transformé en une telle "drogue", la question de savoir si ladite "drogue" rentre dans le sous-groupe *b*) du groupe I ou dans le groupe II sera soumise pour décision à un Comité de trois experts qualifiés pour en examiner les aspects scientifiques et techniques. Deux de ces experts seront désignés respectivement par le gouvernement intéressé et par la Commission consultative de l'opium; le troisième sera désigné par les deux précités.

5. Toute décision prise conformément aux deux paragraphes précédents sera portée à la connaissance du Secrétaire général de la Société des Nations, qui la communiquera à tous les Membres de la Société et aux Etats non membres mentionnés à l'article 27.

6. S'il résulte de ces décisions que le produit en question peut engendrer la toxicomanie ou peut être transformé en une "drogue" susceptible de l'engendrer, les Hautes Parties contractantes, dès la réception de la communication du Secrétaire général, soumettront ladite "drogue" au régime prévu par la présente Convention, suivant qu'elle sera comprise dans le groupe I ou dans le groupe II.

7. Sur la demande de toute Haute Partie contractante adressée au Secrétaire général, toute décision de cette nature pourra être revisée à la lumière de l'expérience acquise et conformément à la procédure indiquée ci-dessus.

Article 12.

1. L'importation ou l'exportation d'une "drogue" quelconque, en provenance ou à destination du territoire d'une Haute Partie contractante, ne pourront être effectuées que conformément aux dispositions de la présente Convention.

2. Les importations d'une "drogue" quelconque, dans un pays ou territoire quelconque et pour une année quelconque, ne pourront excéder le total des évaluations définies à l'article 5 et de la quantité exportée de ce pays ou territoire pendant la même année, déduction faite de la quantité fabriquée dans le pays ou territoire pendant la même année.

CHAPITRE V.—CONTRÔLE.

Article 13.

1. *a*) Les Hautes Parties contractantes appliqueront à toutes les "drogues" du groupe I les dispositions de la Convention de Genève, dont celle-ci prévoit l'application aux substances spécifiées à son article 4 (ou des dispositions équivalentes). Les Hautes Parties contractantes appliqueront aussi ces dispositions aux préparations de la morphine et cocaïne visées à cet article 4 et à toutes les préparations des autres "drogues" du groupe I, sauf les préparations qui peuvent être soustraites au régime de la Convention de Genève, conformément à l'article 8 de cette Convention.

group (*a*) of Group I), or whether it is convertible into such a drug (and is in consequence assimilable to the drugs mentioned in sub-group (*b*) of Group I or in Group II).

4. In the event of the Health Committee deciding that the product is not itself a drug capable of producing addiction, but is convertible into such a drug, the question whether the drug in question shall fall under sub-group (*b*) of Group I or under Group II shall be referred for decision to a body of three experts competent to deal with the scientific and technical aspects of the matter, of whom one member shall be selected by the Government concerned, one by the Opium Advisory Committee of the League, and the third by the two members so selected.

5. Any decisions arrived at in accordance with the two preceding paragraphs shall be notified to the Secretary-General of the League of Nations, who will communicate it to all the Members of the League and to the non-member States mentioned in Article 27.

6. If the decisions are to the effect that the product in question is capable of producing addiction or is convertible into a drug capable of producing addiction, the High Contracting Parties will, upon receipt of the communication from the Secretary-General, apply to the drug the appropriate régime laid down in the present Convention according as to whether it falls under Group I or under Group II.

7. Any such decisions may be revised, in accordance with the foregoing procedure, in the light of further experience, on an application addressed by any High Contracting Party to the Secretary-General.

Article 12.

Import and export restrictions.

1. No import of any of the drugs into the territories of any High Contracting Party or export from those territories shall take place except in accordance with the provisions of this Convention.

2. The imports in any one year into any country or territory of any of the drugs shall not exceed the total of the estimates as defined in Article 5 and of the amount exported from that country or territory during the year, less the amount manufactured in that country or territory in that year.

CHAPTER V.—CONTROL.

Control.

Article 13.

Provisions of Geneva Convention to apply.

1. (*a*) The High Contracting Parties shall apply to all the drugs in Group I the provisions of the Geneva Convention which are thereby applied to substances specified in its fourth Article (or provisions in conformity therewith). The High Contracting Parties shall also apply these provisions to preparations made from morphine and cocaine and covered by Article 4 of the Geneva Convention and to all other preparations made from the other drugs in Group I except such preparations as may be exempted from the provisions of the Geneva Convention under its eighth Article.

b) Les Hautes Parties contractantes appliqueront aux solutions ou dilutions de morphine ou de cocaïne, ou de leurs sels, dans une substance inerte, liquide ou solide, et contenant 0,2% ou moins de morphine ou 0,1% ou moins de cocaïne, le même traitement qu'aux préparations contenant un pourcentage plus élevé.

2. Les Hautes Parties contractantes appliqueront aux "drogues" qui sont ou qui peuvent être comprises dans le groupe II les dispositions suivantes de la Convention de Genève ou des dispositions équivalentes:

a) Les dispositions des articles 6 et 7, en tant qu'elles s'appliquent à la fabrication, à l'importation, à l'exportation et au commerce de gros de ces "drogues";

b) Les dispositions du chapitre V, sauf en ce qui concerne les compositions qui contiennent l'une de ces "drogues" et qui se prêtent à une application thérapeutique normale;

c) Les dispositions des alinéas 1*b*), *c*) et *e*) et de l'alinéa 2 de l'article 22, étant entendu:

i) Que les statistiques des importations et des exportations pourront être envoyées annuellement et non trimestriellement, et

ii) Que l'alinéa 1*b*) et l'alinéa 2 de l'article 22 ne seront pas applicables aux préparations qui contiennent ces "drogues".

Article 14.

1. Les gouvernements qui auront délivré une autorisation d'exportation, à destination de pays ou de territoires auxquels ne s'appliquent ni la présente Convention ni la Convention de Genève, pour une "drogue" qui est ou pourra être comprise dans le groupe I en aviseront immédiatement le Comité central permanent. Il est entendu que si les demandes d'exportation s'élèvent à 5 kilogrammes ou davantage, l'autorisation ne sera pas délivrée avant que le gouvernement soit assuré auprès du Comité central permanent que l'exportation ne provoquera pas un dépassement des évaluations pour le pays ou territoire importateur. Si le Comité central permanent fait savoir qu'il y aura un dépassement, le gouvernement n'autorisera pas l'exportation de la quantité qui provoquerait ce dépassement.

2. S'il ressort des relevés des importations et des exportations adressés au Comité central permanent ou des notifications faites à ce Comité, conformément au paragraphe précédent, que la quantité exportée ou dont l'exportation a été autorisée à destination d'un pays ou territoire quelconque dépasse le total des évaluations définies à l'article 5 pour ce pays ou ce territoire, pour cette année, augmenté de ses exportations constatées, le Comité en avisera immédiatement toutes les Hautes Parties contractantes. Celles-ci ne pourront plus autoriser, pendant l'année en question, aucune nouvelle exportation à destination dudit pays ou territoire, sauf

i) Dans le cas où une évaluation supplémentaire sera fournie, en ce qui concerne à la fois toute quantité importée en excédent et la quantité supplémentaire requise, ou

ii) Dans les cas exceptionnels où l'exportation est, de l'avis du gouvernement du pays exportateur, essentielle aux intérêts de l'humanité ou au traitement des malades.

(*b*) The High Contracting Parties shall treat solutions or dilutions of morphine or cocaine or their salts in an inert substance, liquid or solid, which contain 0.2 per cent or less of morphine or 0.1 per cent or less of cocaine in the same way as preparations containing more than these percentages.

2. The High Contracting Parties shall apply to the drugs which are or may be included in Group II the following provisions of the Geneva Convention (or provisions in conformity therewith):

(*a*) The provisions of Articles 6 and 7 in so far as they relate to the manufacture, import, export and wholesale trade in those drugs;

(*b*) The provisions of Chapter V, except as regards compounds containing any of these drugs which are adapted to a normal therapeutic use;

(*c*) The provisions of paragraphs 1 (*b*), (*c*) and (*e*) and paragraph 2 of Article 22, provided:

(i) That the statistics of import and export may be sent annually instead of quarterly, and

(ii) That paragraph 1 (*b*) and paragraph 2 of Article 22 shall not apply to preparations containing any of these drugs.

Article 14.

License to export to nonparticipating countries.

1. Any Government which has issued an authorisation for the export of any of the drugs which are or may be included in Group I to any country or territory to which neither this Convention nor the Geneva Convention applies shall immediately notify the Permanent Central Board of the issue of the authorisation; provided that, if the request for export amounts to 5 kilogrammes or more, the authorisation shall not be issued until the Government has ascertained from the Permanent Central Board that the export will not cause the estimates for the importing country or territory to be exceeded. If the Permanent Central Board sends a notification that such an excess would be caused, the Government will not authorise the export of any amount which would have that effect.

2. If it appears from the import and export returns made to the Permanent Central Board or from the notifications made to the Board in pursuance of the preceding paragraph that the quantity exported or authorised to be exported to any country or territory exceeds the total of the estimates for that country or territory as defined in Article 5, with the addition of the amounts shown to have been exported, the Board shall immediately notify the fact to all the High Contracting Parties, who will not, during the currency of the year in question, authorise any new exports to that country except:

(i) In the event of a supplementary estimate being furnished for that country in respect both of any quantity over-imported and of the additional quantity required; or

(ii) In exceptional cases where the export in the opinion of the Government of the exporting country is essential in the interests of humanity or for the treatment of the sick.

3. Le Comité central permanent préparera chaque année un état indiquant pour chaque pays ou territoire et pour l'année précédente:

a) Les évaluations de chaque "drogue";
b) La quantité de chaque "drogue" consommée;
c) La quantité de chaque "drogue" fabriquée;
d) La quantité de chaque "drogue" transformée;
e) La quantité de chaque "drogue" importée;
f) La quantité de chaque "drogue" exportée;
g) La quantité de chaque "drogue" employée à la confection des préparations pour l'exportation desquelles les autorisations d'exportation ne sont pas requises.

S'il résulte dudit état que l'une des Hautes Parties contractantes a ou peut avoir manqué aux obligations prévues par la présente Convention, le Comité sera en droit de lui demander des explications par l'entremise du Secrétatire général de la Société des Nations, et la procédure prévue par les paragraphes 2 à 7 de l'article 24 de la Convention de Genève sera applicable.

Le Comité publiera, le plus tôt possible, l'état visé ci-dessus, et, à moins qu'il ne le juge pas nécessaire, un résumé des explications données ou demandées conformément à l'alinéa précédent, ainsi que toutes observations qu'il tiendrait à faire concernant ces explications ou demandes d'explications.

En publiant les statistiques et autres informations qu'il reçoit en vertu de la présente Convention, le Comité central permanent aura soin de ne faire figurer dans ces publications aucune indication susceptible de favoriser les opérations des spéculateurs ou de porter préjudice au commerce légitime d'une quelconque des Hautes Parties contractantes.

Chapitre VI.—Dispositions administratives.

Article 15.

Les Hautes Parties contractantes prendront toutes les mesures législatives ou autres nécessaires pour donner effet dans leurs territoires aux dispositions de la présente Convention.

Les Hautes Parties contractantes établiront, si elles ne l'ont déjà fait, une administration spéciale ayant pour mission:

a) D'appliquer les prescriptions de la présente Convention;
b) De réglementer, surveiller et contrôler le commerce des "drogues";
c) D'organiser la lutte contre la toxicomanie, en prenant toutes les mesures utiles pour en empêcher le développement et pour combattre le trafic illicite.

Article 16

1. Chacune des Hautes Parties contractantes exercera une surveillance rigoureuse sur:

a) Les quantités de matières premières et de "drogues" manufacturées qui se trouvent en la possession de chaque fabricans aux fins de fabrication ou de transformation de chacune de cet "drogues" ou à toutes autres fins utiles;

3. The Permanent Central Board shall each year prepare a statement showing, in respect of each country or territory for the preceding year:

(*a*) The estimates in respect of each drug;
(*b*) The amount of each drug consumed;
(*c*) The amount of each drug manufactured;
(*d*) The amount of each drug converted;
(*e*) The amount of each drug imported;
(*f*) The amount of each drug exported;
(*g*) The amount of each drug used for the compounding of preparations, exports of which do not require export authorisations.

If such statement indicates that any High Contracting Party has or may have failed to carry out his obligations under this Convention, the Board shall have the right to ask for explanations, through the Secretary-General of the League of Nations, from that High Contracting Party, and the procedure specified in paragraphs 2 to 7 of Article 24 of the Geneva Convention shall apply in any such case.

The Board shall, as soon as possible thereafter, publish the statement above mentioned together with an account, unless it thinks it unnecessary, of any explanations given or required in accordance with the preceding paragraph and any observations which the Board may desire to make in respect of any such explanation or request for an explanation.

The Permanent Central Board shall take all necessary measures to ensure that the statistics and other information which it receives under this Convention shall not be made public in such a manner as to facilitate the operations of speculators or to injure the legitimate commerce of any High Contracting Party.

CHAPTER VI.—ADMINISTRATIVE PROVISIONS.

Administrative provisions.

Article 15.

Laws, etc., to be enacted.

The High Contracting Parties shall take all necessary legislative or other measures in order to give effect within their territories to the provisions of this Convention.

The High Contracting Parties shall, if they have not already done so, create a special administration for the purpose of:

(*a*) Applying the provisions of the present Convention;
(*b*) Regulating, supervising and controlling the trade in the drugs;
(*c*) Organising the campaign against drug addiction, by taking all useful steps to prevent its development and to suppress the illicit traffic.

Article 16.

Supervision by each Power.

1. Each High Contracting Party shall exercise a strict supervision over:

(*a*) The amounts of raw material and manufactured drugs in the possession of each manufacturer for the purpose of the manufacture or conversion of any of the drugs or otherwise;

b) Les quantités de "drogues" (ou de préparations contenant ces drogues) produites;

c) La manière dont il est disposé des "drogues" et préparations ainsi produites, notamment leur distribution au commerce, à la sortie de la fabrique.

2. Les Hautes Parties contractantes ne permettront pas l'accumulation entre les mains d'un fabricant quelconque de quantités de matières premières dépassant les quantités requises pour le fonctionnement économique de l'entreprise, en tenant compte des conditions du marché. Les quantités de matières premières en la possession de tout fabricant, à un moment quelconque, ne dépasseront pas les quantités nécessaires pour les besoins de la fabrication pendant le semestre suivant, à moins que le gouvernement, après enquête, n'estime que des conditions exceptionnelles justifient l'accumulation de quantités additionnelles, mais, en aucun cas, les quantités totales qui pourront être accumulées ainsi ne devront dépasser l'approvisionnement d'une année.

Article 17.

Chacune des Hautes Parties contractantes astreindra chaque fabricant établi sur ses territoires à fournir des rapports trimestriels indiquant:

a) Les quantités de matières premières et de chaque "drogue" qu'il a reçues dans sa fabrique, ainsi que les quantités de "drogues" ou de tout autre produit, quel qu'il soit, fabriqué avec chacune de ces substances. En signalant les quantités de matières premières ainsi reçues par lui, le fabricant indiquera la proportion de morphine, de cocaïne ou d'ecgonine contenue dans celles-ci ou qui peut en être retirée—proportion qui sera déterminée par une méthode prescrite par le gouvernement et dans des conditions que le gouvernement considère comme satisfaisantes;

b) Les quantités, soit de matières premières, soit de produits manufacturés à l'aide de ces matières, qui ont été utilisées au cours du trimestre;

c) Les quantités restant en stock à la fin du trimestre.

Chacune des Hautes Parties contractantes astreindra chaque négociant en gros établi sur ses territoires à fournir, à la fin de chaque année, un rapport spécifiant pour chaque "drogue" la quantité de cette "drogue" contenue dans les préparations exportées ou importées au cours de l'année et pour l'exportation ou l'importation desquelles il n'est pas requis d'autorisation.

Article 18.

Chacune des Hautes Parties contractantes s'engage à ce que toutes les "drogues" du groupe I qu'elle saisira dans le trafic illicite soient détruites ou transformées en substances non stupéfiantes ou réservées à l'usage médical ou scientifique, soit par le gouvernement, soit sous son contrôle, une fois que ces "drogues" ne sont plus nécessaires pour la procédure judiciaire ou toute autre action de la part des autorités de l'Etat. Dans tous les cas, la diacétylmorphine devra être détruite ou transformée.

(*b*) The quantities of the drugs or preparations containing the drugs produced;

(*c*) The disposal of the drugs and preparations so produced with especial reference to deliveries from the factories.

2. No High Contracting Party shall allow the accumulation in the possession of any manufacturer of quantities of raw materials in excess of those required for the economic conduct of business, having regard to the prevailing market conditions. The amounts of raw material in the possession of any manufacturer at any one time shall not exceed the amounts required by that manufacturer for manufacture during the ensuing six months, unless the Government, after due investigation, considers that exceptional conditions warrant the accumulation of additional amounts, but in no case shall the total quantities which may be accumulated exceed one year's supply.

Article 17.

Quarterly reports required of each manufacturer.

Each High Contracting Party shall require each manufacturer within his territories to submit quarterly reports stating:

(*a*) The amount of raw materials and of each of the drugs received into the factory by such manufacturer and the quantities of the drugs, or any other products whatever, produced from each of these substances. In reporting the amounts of raw materials so received, the manufacturer shall state the proportion of morphine, cocaine or ecgonine contained in or producible therefrom as determined by a method prescribed by the Government and under conditions considered satisfactory by the Government;

(*b*) The quantities of either the raw material or the products manufactured therefrom which were disposed of during the quarter;

(*c*) The quantities remaining in stock at the end of the quarter.

Each High Contracting Party shall require each wholesaler within his territories to make at the close of each year a report stating, in respect of each of the drugs, the amount of that drug contained in preparations, exported or imported during the year, for the export or import of which authorisations are not required.

Article 18.

Seizures in illicit traffic.

Each High Contracting Party undertakes that any of the drugs in Group I which are seized by him in the illicit traffic shall be destroyed or converted into non-narcotic substances or appropriated for medical or scientific use, either by the Government or under its control, when these are no longer required for judicial proceedings or other action on the part of the authorities of the State. In all cases diacetylmorphine shall either be destroyed or converted.

Article 19.

Les Hautes Parties contractantes exigeront que les étiquettes sous lesquelles est mise en vente une "drogue" quelconque ou une préparation contenant cette "drogue" indiquent le pourcentage de celle-ci. Elles devront aussi en indiquer le nom de la manière prévue par la législation nationale

CHAPITRE VII.—DISPOSITIONS GÉNÉRALES.

Article 20.

1. Toute Haute Partie contractante dans l'un quelconque des territoires de laquelle une "drogue" quelconque sera fabriquée ou transformée au moment de l'entrée en vigueur de la présente Convention ou qui, à ce moment ou ultérieurement, se proposera d'autoriser sur son territoire cette fabrication ou transformation, enverra une notification au Secrétaire général de la Société des Nations en indiquant si la fabrication ou la transformation est destinée aux besoins intérieurs seulement ou également à l'exportation, et à quelle époque cette fabrication ou transformation commencera; elle spécifiera également les "drogues" qui doivent être fabriquées ou transformées, ainsi que le nom et l'adresse des personnes ou des maisons autorisées.

2. Au cas où la fabrication ou la transformation de l'une quelconque des "drogues" cesserait sur son territoire, la Haute Partie contractante enverra une notification à cet effet au Secrétaire général en indiquant la date et le lieu où cette fabrication ou transformation a cessé ou cessera et en spécifiant les "drogues" visées, les personnes ou maisons visées, ainsi que leur nom et leur adresse.

3. Les renseignements fournis conformément aux paragraphes 1 et 2 seront communiqués par le Secrétaire général aux Hautes Parties contractantes.

Article 21.

Les Hautes Parties contractantes se communiqueront par l'entremise du Secrétaire général de la Société des Nations les lois et règlements promulgués pour donner effet à la présente Convention, et lui transmettront un rapport annuel relatif au fonctionnement de la Convention sur leurs territoires, conformément à un formulaire établi par la Commission consultative du trafic de l'opium et autres "drogues" nuisibles.

Article 22.

Les Hautes Parties contractantes feront figurer dans les statistiques annuelles fournies par elles au Comité central permanent les quantités de chacune des "drogues" employées par les fabricants et grossistes pour la confection de préparations, destinées à la consommation intérieure ou à l'exportation, pour l'exportation desquelles les autorisations ne sont pas requises.

Les Hautes Parties contractantes feront également figurer dans leurs statistiques un résumé des relevés établis par les fabricants, conformément à l'article 17.

Article 19.

Marking labels.

The High Contracting Parties will require that the labels under which any of the drugs, or preparations containing those drugs, are offered for sale, shall show the percentage of the drugs. These labels shall also indicate the name of the drugs as provided for in the national legislation.

CHAPTER VII.—GENERAL PROVISIONS.

General provisions.

Article 20.

Information to be furnished the League of Nations.

1. Every High Contracting Party in any of whose territories any of the drugs is being manufactured or converted, at the time when this Convention comes into force, or in which he proposes either at that time or subsequently to authorise such manufacture or conversion, shall notify the Secretary-General of the League of Nations indicating whether the manufacture or conversion is for domestic needs only or also for export, the date on which such manufacture or conversion will begin, and the drugs to be manufactured or converted as well as the names and addresses of persons or firms authorised.

2. In the event of the manufacture or conversion of any of the drugs ceasing in the territory of any High Contracting Party, he shall notify the Secretary-General to that effect, indicating the place and date at which such manufacture or conversion has ceased or will cease and specifying the drugs affected, as well as the names and addresses of persons or firms concerned.

Article 22.

Reports, to include drugs used in compounds.

The High Contracting Parties shall include in the annual statistics furnished by them to the Permanent Central Board the amounts of any of the drugs used by manufacturers and wholesalers for the compounding of preparations whether for domestic consumption or for export for the export of which export authorisations are not required.

Summary of returns. *Ante*, p. 1573.

The High Contracting Parties shall also include a summary of the returns made by the manufacturers in pursuance of Article 17.

Article 23.

Les Hautes Parties contractantes se communiqueront par l'entremise du Secrétaire général de la Société des Nations, dans un délai aussi bref que possible, des renseignements sur tout cas de trafic illicite découvert par elles et qui pourra présenter de l'importance, soit en raison des quantités de "drogues" en cause, soit en raison des indications que ce cas pourra fournir sur les sources qui alimentent en "drogues" le trafic illicite ou les méthodes employées par les trafiquants illicites.

Ces renseignements indiqueront, dans toute la mesure possible:

a) La nature et la quantité des "drogues" en cause;

b) L'origine des "drogues", les marques et étiquettes;

c) Les points de passage où les "drogues" ont été détournées dans le trafic illicite;

d) Le lieu d'où les "drogues" ont été expédiées et les noms des expéditeurs, agents d'expédition ou commissionnaires, les méthodes de consignation et les noms et adresses des destinataires s'ils sont connus.

e) Les méthodes employées et routes suivies par les contrebandiers et éventuellement les noms des navires qui ont servi au transport;

f) Les mesures prises par les gouvernements en ce qui concerne les personnes impliquées (et, en particulier, celles qui posséderaient des autorisations ou des licences), ainsi que les sanctions appliquées;

g) Tous autres renseignements qui pourraient aider à la suppression du trafic illicite.

Article 24.

La présente Convention complétera les Conventions de La Haye de 1912 et de Genève de 1925 dans les rapports entre les Hautes Parties contractantes liées par l'une au moins de ces dernières Conventions.

Article 25.

S'il s'élève entre les Hautes Parties contractantes un différend quelconque relatif à l'interprétation ou à l'application de la présente Convention, et si ce différend n'a pu être résolu de façon satisfaisante par voie diplomatique, il sera réglé conformément aux dispositions en vigueur entre les Parties concernant le règlement des différends internationaux.

Au cas où de telles dispositions n'existeraient pas entre les Parties au différend, elles le soumettront à une procédure arbitrale ou judiciaire. A défaut d'un accord sur le choix d'un autre tribunal, elles soumettront le différend, à la requête de l'une d'elles, à la Cour permanente de Justice internationale, si elles sont toutes parties au Protocole du 16 décembre 1920, relatif au Statut de ladite Cour, et, si elles n'y sont pas toutes parties, à un tribunal d'arbitrage, constitué conformément à la Convention de La Haye du 18 octobre 1907, pour le règlement pacifique des conflits internationaux.

Article 23.

Illicit traffic particulars.

The High Contracting Parties will communicate to each other through the Secretary-General of the League of Nations, as soon as possible, particulars of each case of illicit traffic discovered by them which may be of importance either because of the quantities involved or because of the light thrown on the sources from which drugs are obtained for the illicit traffic or the methods employed by illicit traffickers.

The particulars given shall indicate as far as possible:

(*a*) The kind and quantity of drugs involved;
(*b*) The origin of the drugs, their marks and labels;
(*c*) The points at which the drugs were diverted into the illicit traffic;

Article 24.

Present convention supplementary to previous conventions. Vol. 38, p. 1912.

The present Convention shall supplement the Hague Convention of 1912 and the Geneva Convention of 1925 in the relations between the High Contracting Parties bound by at least one of these latter Conventions.

Article 25.

Settlement of disputes.

If there should arise between the High Contracting Parties a dispute of any kind relating to the interpretation or application of the present Convention and if such dispute cannot be satisfactorily settled by diplomacy, it shall be settled in accordance with any applicable agreements in force between the Parties providing for the settlement of international disputes.

In case there is no such agreement in force between the Parties, the dispute shall be referred to arbitration or judicial settlement. In the absence of agreement on the choice of another tribunal, the dispute shall, at the request of any one of the Parties, be referred to the Permanent Court of International Justice, if all the Parties to the dispute are Parties to the Protocol of December 16th, 1920, relating to the Statute of that Court, and, if any of the Parties to the dispute is not a Party to the Protocol of December 16th, 1920, to an arbitral tribunal constituted in accordance with the Hague Convention of October 18th, 1907, for the Pacific Settlement of International Disputes.

Vol. 36, p. 2221.

Article 26.

Toute Haute Partie contractante pourra déclarer, au moment de la signature, de la ratification ou de l'adhésion, qu'en acceptant la présente Convention, elle n'assume aucune obligation pour l'ensemble ou une partie de ses colonies, protectorats, territoires d'outre-mer ou territoires placés sous sa souveraineté ou sous son mandat, et la présente Convention ne s'appliquera pas aux territoires mentionnés dans cette déclaration.

Toute Haute Partie contractante pourra ultérieurement donner, à tout moment, avis au Secrétaire général de la Société des Nations qu'elle désire que la présente Convention s'applique à l'ensemble ou à une partie de ses territoires qui auront fait l'objet d'une déclaration aux termes de l'alinéa précédent, et la présente Convention s'appliquera à tous les territoires mentionnés dans cet avis, comme dans le cas d'un pays ratifiant la Convention ou y adhérant.

Chacune des Hautes Parties contractantes pourra déclarer à tout moment, après l'expiration de la période de cinq ans prévue à l'article 32, qu'elle désire que la présente Convention cesse de s'appliquer à l'ensemble ou à une partie de ses colonies, protectorats, territoires d'outre-mer ou territoires placés sous sa souveraineté ou sous son mandat, et la Convention cessera de s'appliquer aux territoires mentionnés dans cette déclaration, comme s'il s'agissait d'une dénonciation faite conformément aux dispositions de l'article 32.

Le Secrétaire général communiquera à tous les Membres de la Société, ainsi qu'aux Etats non membres mentionnés à l'article 27, toutes les déclarations et tous les avis reçus aux termes du présent article.

Article 27.

La présente Convention, dont les textes français et anglais feront également foi, portera la date de ce jour et sera, jusqu'au 31 décembre 1931, ouverte à la signature au nom de tout Membre de la Société des Nations ou de tout Etat non membre qui s'est fait représenter à la Conférence qui a élaboré la présente Convention, ou auquel le Conseil de la Société des Nations aura communiqué copie de la présente Convention à cet effet.

Article 28.

La présente Convention sera ratifiée. Les instruments de ratification seront transmis au Secrétaire général de la Société des Nations, qui en notifiera le dépôt à tous les Membres de la Société ainsi qu'aux Etats non membres visés à l'article précédent.

Article 29.

A dater du 1er janvier 1932, tout Membre de la Société des Nations et tout Etat non membre visé à l'article 27 pourra adhérer à la présente Convention.

Article 26.

Obligations of signatories over colonies, etc.

Any High Contracting Party may, at the time of signature, ratification, or accession, declare that, in accepting the present Convention, he does not assume any obligation in respect of all or any of his colonies, protectorates and overseas territories or territories under suzerainty or mandate, and the present Convention shall not apply to any territories named in such declaration.

Any High Contracting Party may give notice to the Secretary-General of the League of Nations at any time subsequently that he desires that the Convention shall apply to all or any of his territories which have been made the subject of a declaration under the preceding paragraph, and the Convention shall apply to all territories named in such notice in the same manner as in the case of a country ratifying or acceding to the Convention.

Any High Contracting Party may, at any time after the expiration of the five-years period mentioned in Article 32, declare that he desires that the present Convention shall cease to apply to all or any of his colonies, protectorates and overseas territories or territories under suzerainty or mandate, and the Convention shall cease to apply to the territories named in such declaration as if it were a denunciation under the provisions of Article 32.

The Secretary-General shall communicate to all the Members of the League and to the non-member States mentioned in Article 27, all declarations and notices received in virtue of this Article.

Article 27.

Date; open for signature until December 31, 1931.

The present Convention, of which the French and English texts shall both be authoritative, shall bear this day's date, and shall, until December 31st, 1931, be open for signature on behalf of any Member of the League of Nations, or of any non-member State which was represented at the Conference which drew up this Convention, or to which the Council of the League of Nations shall have communicated a copy of the Convention for this purpose.

Article 28.

Ratification.

The present Convention shall be ratified. The instruments of ratification shall be transmitted to the Secretary-General of the League of Nations, who shall notify their receipt to all Members of the League and to the non-member States referred to in the preceding Article.

Article 29.

Accession of nonsignatory powers.

As from January 1st, 1932, the present Convention may be acceded to on behalf of any Member of the League of Nations or any non-member State mentioned in Article 27.

Les instruments d'adhésion seront transmis au Secrétaire général de la Société des Nations, qui en notifiera le dépôt à tous les Membres de la Société ainsi qu'aux Etats non membres visés audit article.

Article 30.

La présente Convention entrera en vigueur quatre-vingt-dix jours après que le Secrétaire général de la Société des Nations aura reçu les ratifications ou les adhésions de vingt-cinq Membres de la Société des Nations ou Etats non membres, y compris quatre Etats parmi les suivants:

Allemagne, Etats-Unis d'Amérique, France, Royaume-Uni de Grande-Bretagne et d'Irlande du Nord, Japon, Pays-Bas, Suisse, Turquie.

Les dispositions autres que les articles 2 à 5 ne deviendront toutefois applicable que le 1er janvier de la première année pour laquelle les évaluations seront fournies, conformément aux articles 2 à 5.

Article 31.

Les ratifications ou adhésions déposées après la date de l'entrée en vigueur de la présente Convention prendront effet à l'expiration d'un délai de quatre-vingt-dix jours à partir du jour de leur réception par le Secrétaire général de la Société des Nations.

Article 32.

A l'expiration d'un délai de cinq ans à partir de l'entrée en vigueur de la présente Convention, celle-ci pourra être dénoncée par un instrument écrit déposé auprès du Secrétaire général de la Société des Nations. Cette dénonciation, si elle est reçue par le Secrétaire général le 1er juillet d'une année quelconque ou antérieurement à cette date, prendra effet le 1er janvier de l'année suivante, et, si elle est reçue après le 1er juillet, elle prendra effet comme si elle avait été reçue le 1er juillet de l'année suivante ou antérieurement à cette date. Chaque dénonciation ne sera opérante que pour le Membre de la Société des Nations ou l'Etat non membre au nom duquel elle aura été déposée.

Le Secrétaire général notifiera à tous les Membres de la Société et aux Etats non membres mentionnés à l'article 27 les dénonciations ainsi reçues.

Si, par suite de dénonciations simultanées ou successives, le nombre des Membres de la Société des Nations et des Etats non membres qui sont liés par la présente Convention se trouve ramené à moins de vingt-cinq, la Convention cessera d'être en vigueur à partir de la date à laquelle la dernière de ces dénonciations prendra effet, conformément aux dispositions du présent article.

The instruments of accession shall be transmitted to the Secretary-General of the League of Nations, who shall notify their receipt to all the Members of the League and to the non-member States mentioned in that Article.

Article 30.

Effective dates.

The present Convention shall come into force ninety days after the Secretary-General of the League of Nations has received the ratifications or accessions of twenty-five Members of the League of Nations or non-member States, including any four of the following:

France, Germany, United Kingdom of Great Britain and Northern Ireland, Japan, Netherlands, Switzerland, Turkey, and the United States of America.

Provided always that the provisions of the Convention other than Articles 2 to 5 shall only be applicable from the first of January in the first year in respect of which estimates are furnished in conformity with Articles 2 to 5.

Article 31.

Ratifications received after Convention in force.

Ratifications or accessions received after the date of the coming into force of this Convention shall take effect as from the expiration of the period of ninety days from the date of their receipt by the Secretary-General of the League of Nations.

Article 32.

Denunciation.

After the expiration of five years from the date of the coming into force of this Convention, the Convention may be denounced by an instrument in writing, deposited with the Secretary-General of the League of Nations. The denunciation, if received by the Secretary-General on or before the first day of July in any year, shall take effect on the first day of January in the succeeding year, and, if received after the first day of July, shall take effect as if it had been received on or before the first day of July in the succeeding year. Each denunciation shall operate only as regards the Member of the League or non-member State on whose behalf it has been deposited.

The Secretary-General shall notify all the Members of the League and the non-member States mentioned in Article 27 of any denunciations received.

If, as a result of simultaneous or successive denunciations, the number of Members of the League and non-member States bound by the present Convention is reduced to less than twenty-five, the Convention shall cease to be in force as from the date on which the last of such denunciations shall take effect in accordance with the provisions of this Article.

Article 33.

Une demande de revision de la présente Convention pourra être formulée en tout temps par tout Membre de la Société des Nations ou Etat non membre lié par la Convention, par voie de notification adressée au Secrétaire général de la Société des Nations. Cette notification sera communiquée par le Secrétaire général à tous les autres Membres de la Société des Nations et Etats non membres ainsi liés, et, si elle est appuyée par un tiers au moins d'entre elles, les Hautes Parties contractantes s'engagent à se réunir en une conférence aux fins de revision de la Convention.

Article 34.

La présente Convention sera enregistrée par le Secrétaire général de la Société des Nations le jour de l'entrée en vigueur de la Convention.

Article 33.

Such notice shall be communicated by the Secretary-General to the other Members of the League of Nations or non-member States bound by this Convention, and, if endorsed by not less than one-third of them, the High Contracting Parties agree to meet for the purpose of revising the Convention.

Article 34.

(1) The Government of the United States of America reserves the right to impose, for purpose of internal control and control of import into and export from territory under its jurisdiction, of opium, coca leaves, all of their derivatives and similar substances produced by synthetic process, measures stricter than the provisions of the Convention.

(2) The Government of the United States of America reserves the right to impose, for purposes of controlling transit through its territories of raw opium, coca leaves, all of their derivatives and similar substances produced by synthetic process, measures by which the production of an import permit issued by the country of destination may be made a condition precedent to the granting of permission for transit through its territory.

(3) The Government of the United States of America finds it impracticable to undertake to send statistics of import and export to the Permanent Central Opium Board short of sixty days after the close of the three-months' period to which such statistics refer.

(4) The Government of the United States of America finds it impracticable to undertake to state separately amounts of drugs purchased or imported for Government purposes.

(5) Plenipotentiaries of the United States of America formally declare that the signing of the Convention for Limiting the Manufacture and Regulating the Distribution of Narcotic Drugs by them on the part of the United States of America on this date is not to be construed to mean that the Government of the United States of America recognises a regime or entity which signs or accedes to the Convention as the Government of a country when that regime or entity is not recognised by the Government of the United States of America as the Government of that country.

(6) The plenipotentiaries of the United States of America further declare that the participation of the United States of America in the Convention for limiting the manufacture of and regulating the distribution of narcotic drugs, signed on this date, does not involve any contractual obligation on the part of the United States of America to a country represented by a regime or entity which the Government of the United States of America does not recognise as the Government

of that country until such country has a Government recognised by the Government of the United States of America.[1]

(1) Le Gouvernement des Etats-Unis d'Amérique se réserve le droit d'appliquer, en vue de l'exercice d'un contrôle intérieur et d'un contrôle des importations et des exportations d'opium, de feuilles de coca et de tous leurs dérivés, et de produits synthétiques analogues, effectués par les territoires placés sous sa juridiction, des mesures plus strictes que les dispositions de la Convention.

(2) Le Gouvernement des Etats-Unis d'Amérique se réserve le droit d'appliquer, en vue de l'exercice d'un contrôle sur le transit à travers ses territoires de l'opium brut, des feuilles de coca, de tous leurs dérivés et des produits synthétiques analogues, des mesures en vertu desquelles l'octroi d'une autorisation de transit à travers son territoire pourra être subordonné à la production d'un permis d'importation délivré par le pays de destination.

(3) Le Gouvernement des Etats-Unis d'Amérique ne voit pas la possibilité de s'engage à envoyer au Comité central permanent de l'opium des statistiques des importations et des exportations avant un délai de soixante jours à dater de la fin de la période de trois mois à laquelle se rapportent ces statistiques.

(4) Le Gouvernement des Etats-Unis d'Amérique ne voit pas la possibilité de s'engager à indiquer séparément les quantités de stupéfiants achetées ou importées pour les besoins de l'Etat.

(5) Les plénipotentiaires des Etats-Unis d'Amérique declarent formellement que le fait qu'ils ont signé ce jour, pour le compte des Etats-Unis d'Amérique, la Convention pour la limitation de la fabrication et la réglementation de la distribution des stupéfiants, ne doit pas être interprété comme signifiant que le Gouvernement des Etats-Unis d'Amérique reconnaît un régime ou une entité qui signe la Convention ou y accède comme constituant le gouvernement d'un pays, lorsque ce régime ou cette entité n'est pas reconnue par le Gouvernement des Etats-Unis d'Amérique comme constituant le gouvernement de ce pays.

(6) Les plénipotentiaires des Etats-Unis d'Amérique déclarent, en outre, que la participation des Etats-Unis d'Amérique à la Convention pour la limitation de la fabrication et la réglementation de la distribution des stupéfiants, signée ce jour, n'implique aucune obligation contractuelle de la part des Etats-Unis d'Amérique à l'égard d'un pays représenté par un régime ou une entité que le Gouvernement des Etats-Unis d'Amérique ne reconnaît pas comme constituant le gouvernement de ce pays, tant que ce pays n'a pas un gouvernement reconnu par le Gouvernement des Etats-Unis d'Amérique.

PROTOCOLE DE SIGNATURE

I. En signant la Convention pour limiter la fabrication et réglementer la distribution des stupéfiants en date de ce jour, les Plénipotentiaires soussignés, dûment autorisés à cet effet, et au nom de leurs gouvernements respectifs, déclarent être convenus de ce qui suit:

Si, à la date du 13 juillet 1933, ladite Convention n'est pas entrée en vigueur conformément aux dispositions de l'article 30, le Secrétaire général de la Société des Nations soumettra la situation au Conseil de la Société des Nations, qui pourra, soit convoquer une nouvelle conférence de tous les Membres de la Société des Nations et Etats non membres au nom desquels la Convention aura été signée ou des ratifications ou des adhésions auront été déposées, en vue d'examiner la situation, soit prendre les mesures qu'il considérerait comme nécessaires. Le gouvernement de chaque Membre de la Société des Nations ou Etat non membre signataire ou adhérent s'engage à se faire représenter à toute conférence ainsi convoquée.

II. Le Gouvernement du Japon a fait la réserve exprimée ci-dessous, qui est acceptée par les autres Hautes Parties contractantes:

> La morphine brute produite au cours de la fabrication de l'opium à fumer dans la fabrique du Gouvernement général de Formose et tenue en stock par ce gouvernement, ne sera pas soumise aux mesures de limitation prévues à la présente Convention.
>
> Il ne sera retiré de temps à autre de ces stocks de morphine brute que les quantités qui pourront être requises pour la fabrication de la morphine raffinée dans les fabriques munies d'une licence par le Gouvernement japonais conformément aux dispositions de la présente Convention.

If, on July 13th, 1933, the said Convention is not in force in accordance with the provisions of Article 30, the Secretary-General of the League of Nations shall bring the situation to the attention of the Council of the League of Nations, which may either convene a new Conference of all the Members of the League and non-member States on whose behalf the Convention has been signed or ratifications or accessions deposited, to consider the situation, or take such measures as it considers necessary. The Government of every signatory or acceding Member of the League of Nations or non-member State undertakes to be present at any Conference so convened.

Reservation by Japan.

II. The Japanese Government made the following reservation, which is accepted by the other High Contracting Parties:

> Crude morphine resulting from the manufacture of prepared opium in the factory of the Government-General of Formosa and held in stock by that Government shall not be subjected to the limitation measures provided for in this Convention.

ARTICLE V

Prohibitions.

1. It is forbidden to inclose in parcels:

a) Communications or notes having the character of letters. It is permissible, however, to enclose in the parcel the open invoice reduced to its essential features, as well as a simple copy of the address of the parcel with mention of the address of the sender.

Explosive or inflammable articles, as well as documents, pictures or other articles injurious to public morals, may be destroyed on the spot by the Administration which has found them in the mails.

The fact that a parcel contains a letter or a communication having the nature of a letter may not in any case entail the return of the parcel to the sender. The letter is, however, marked for the collection of postage due from the addressee at the regular rate.

3. Les deux Administrations se communiquent, au moyen de la "Liste des Objets Interdits" publiée par le Bureau International de l'Union Postale Universelle, la nomenclature de tous les objets interdits. Toutefois, elles n'assument de ce chef aucune responsabilité envers les organes de la douane ou de la police ou envers l'expéditeur.

ARTICLE VI.

Les colis peuvent être assurés jusqu'au montant de 500 francs-or ou l'équivalent en monnaie du pays d'origine. Cependant, les Chefs des Administrations Postales des deux pays contractants peuvent, d'un commun accord, augmenter ou diminuer ce montant maximum d'assurance.

ARTICLE VII.

Responsabilité. Indemnité.

1. Les Administrations Postales des deux pays contractants ne seront pas responsables de la perte, de l'abstraction ou du dommage d'un colis ordinaire; mais l'une ou l'autre des Administrations est libre de payer indemnité pour la perte, l'abstraction ou le dommage qui ait eu lieu dans son service, sans recours contre l'autre Administration.

ARTICLE VI.

A parcel cannot give rise to the payment of an indemnity higher than the actual value of its contents, but it is permissible to insure it for only part of that value. Limitation.

ARTICLE VII.

Responsibility. Indemnity. Responsibility, etc.

Except in the cases mentioned in the Section following, the Administrations are responsible for the loss of insured parcels mailed in one of the two contracting countries for delivery in the other and for the loss, abstraction of or damage to their contents, or a part thereof. The sender, or other rightful claimant, is entitled on this account to an indemnity corresponding to the actual amount of the loss, abstraction or damage. Restriction.

Dans le cas où l'indemnité est payable pour la perte d'un colis ou pour la destruction ou abstraction de son contenu entier, l'expéditeur a le droit à la restitution des taxes postales, sur demande. Toutefois, les droits d'assurance ne sont remboursés dans aucun cas.

Parcel originating in a country not a party hereto.

Lorsqu'un colis avec valeur déclarée provenant d'un pays et destiné à être remis dans l'autre pays est réexpédié de là sur un tiers pays ou y est renvoyé à la demande de l'expéditeur ou du destinataire, l'ayant-droit à l'indemnité, en cas de perte, de spoliation ou d'avarie survenue subséquemment à la réexpédition ou au renvoi du colis par le pays de l'adresse primitive, ne peut prétendre, le cas échéant, qu'à l'indemnité que consent à verser ou—suivant l'entente intervenue entre les pays intéressés directement à la réexpédition ou au renvoi—que doit payer le pays où le fait s'est produit. Chacun des deux pays signataires du présent Arrangement qui réexpédie à tort un colis avec valeur déclarée sur un tiers pays, est responsable envers l'expéditeur dans la même mesure que le pays d'origine, donc dans les limites du présent Arrangement.

In the case where indemnity is payable for the loss of a parcel or for the destruction or abstraction of the whole of the contents thereof, the sender is entitled to the return of the postal charges, if claimed. However, the insurance fees are not in any case returned.

In the absence of special agreement to the contrary between the countries involved, no indemnity will be paid by either country for the loss of transit insured parcels originating in a country not participating in this Agreement and destined for one of the two contracting countries.

When an insured parcel originating in one country and destined to be delivered in the other country is reforwarded from there to a third country or is returned to a third country, at the request of the sender or of the addressee, the party entitled to the indemnity in case of loss, rifling or damage occurring subsequent to the reforwarding or return of the parcel by the original country of destination, can lay claim, in such a case, only to the indemnity which the country where the loss, rifling or damage occurred consents to pay, or which that country is obligated to pay in accordance with the agreement made between the countries directly interested in the reforwarding or return. Either of the two countries signing the present Agreement which wrongly forwards an insured parcel to a third country is responsible to the sender to the same extent as the country of origin, that is, within the limits of the present Agreement.

2. Les Administrations sont dégagées de toute responsabilité:

(a) En cas de colis dont les destinataires ont pris livraison sans réserves.

(b) En cas de perte ou d'avarie due à la force majeure; bien que chacune des Administrations puisse, de son gré et sans recours contre l'autre Administration, payer indemnité pour la perte ou l'avarie due à la force majeure, même si l'Administration du pays dans le service duquel la perte ou l'avarie a eu lieu reconnait que le dommage a été causé par la force majeure.

(c) Lorsqu'elles ne sont pas à même de se rendre compte des colis à la suite de la destruction des documents officiels due à la force majeure.

(d) Lorsque le dommage s'est produit par la faute ou la négligence de l'expéditeur, du destinataire, ou du représentant de l'un ou l'autre, ou lorsqu'il est dû à la nature de l'envoi.

(e) Pour les colis qui contiennent des objets interdits.

(f) Au cas où l'expéditeur d'un colis assuré, avec intention frauduleuse, déclare le contenu avec une valeur supérieure à sa valeur réelle; cette règle ne porte préjudice à aucun poursuit judiciaire nécessité par la législation du pays d'origine.

(g) Pour les colis saisis par la douane à la suite d'une fausse déclaration de leur contenu.

(h) Lorsqu'une réclamation ou une application d'indemnité n'a pas été présentée par le réclamant ou son agent dans la période d'un an à compter du lendemain du dépôt du colis assuré.

(i) Pour les colis qui contiennent des objets sans valeur intrinsèque ou des objets périssables, ou des objets qui ne remplissaient pas les stipulations de cet Arrangement, ou qui n'avaient pas été mis à la poste de la manière prescrite; mais le pays responsable de la perte, la spoliation ou l'avarie pourra payer indemnité du chef de tels colis sans recours contre l'autre Administration.

2. The Administrations are relieved of all responsibility. Release in certain cases.

(a) In case of parcels of which the addressee has accepted delivery without reservation. Unconditional acceptance.

(b) In case of loss or damage through force majeure (causes beyond control) although either Administration may at its option and without recourse to the other Administration pay indemnity for loss or damage due to force majeure even in cases where the Administration of the country in the service of which the loss or damage occurred recognizes that the damage was due to force majeure. (h) When no inquiry or application for indemnity has been made by claimant or his representative within a year commencing with the day following the posting of the insured parcel. No claim made within a year.

Matter of no intrinsic value, etc.

However, the paying Postal Administration may exceptionally defer payment of indemnity for a longer period than that stipulated if, at the expiration of that period, it has not been able to determine the disposition made of the article in question or the responsibility incurred.

Payment by country of origin if country of destination delays 9 months.

5. Sauf les cas où le payement est exceptionellement différé en conformité avec le deuxième alinéa du paragraphe précédent, l'Administration postale qui se charge du payement de la compensation est autorisée à payer l'indemnité pour le compte de l'Office qui, ayant été dûment notifié de la demande d'indemnité, a laissé s'écouler neuf mois sans donner de solution à l'affaire.

5. Except in cases where payment is exceptionally deferred as provided in the second paragraph of the foregoing section, the Postal Administration which undertakes the payment of compensation is authorized to pay indemnity on behalf of the Office, which, after being duly informed of the application for indemnity, has let nine months pass without settling the matter.

Country responsible.

6. L'obligation de payer l'indemnité incombe à l'Administration postale dont dépend le bureau d'origine, pourvu qu'au cas où l'indemnité est payée au destinataire selon le premier alinéa du paragraphe 1, elle incombe à l'Administration postale de destination.

6. 9. Si la perte, la spoliation ou l'avarie s'est produite en cours de transport sans qu'il soit possible d'établir sur le territoire ou dans le service de quel pays le fait s'est accompli, les Offices en cause supportent le dommage par parts égales.

Customs-Clearance, Delivery and Storage Charges.

1. The Administration of the country of destination may collect from the addressee, for the fulfillment of customs formalities and delivery at his residence, a charge not exceeding 20 cents (100 gold centimes) per parcel, as well as a supplementary charge of 10 cents (50 gold centimes) per parcel for each new presentation when the first presentation has been unsuccessful.

2. Each Administration is authorized to collect a suitable storage charge for parcels addressed "Poste Restante" or which are not withdrawn within the period which it has fixed. This charge may not, however, exceed 1 dollar (5 gold francs) per parcel.

ARTICLE XIV

Missent Parcels.

Ordinary parcels when missent are reforwarded to their true destination by the most direct route at the disposal of the reforwarding Administration. They must not be charged with customs or other charges by that Administration. Insured parcels, when missent, may not be reforwarded to their destination except as such. If this is impossible, they are returned to origin.

When the reforwarding involves the return of the parcel to the office of origin, the retransmitting Administration refunds to that office the credits received and reports the error by a Bulletin of Verification.

When the reforwarding involves the dispatch of a parcel to a third country and if the amount credited to the retransmitting

La raison de cette réclamation est notifiée audit bureau d'échange au moyen d'un bulletin de verification.

ARTICLE XV

Réexpédition.

1. Un colis peut être réexpédié à la suite du changement d'adresse du destinataire dans le pays de destination, sur la demande soit de l'expéditeur soit du destinataire.

La réexpédition d'un colis dans l'intérieur d'un des pays contractants donne lieu à la perception des taxes supplémentaires prévues par l'Administration de ce pays. Il en est de même, le cas échéant, en ce qui concerne la remise de ce colis à une autre personne au lieu de destination primitif. Ces taxes ne seront pas annullées, même au cas où le colis est renvoyé à l'origine ou réexpédié sur un autre pays.

2. Si un colis doit être réexpédié sur un des deux pays signataires du présent Arrangement, il est passible des nouvelles taxes de transport, et, le cas échéant, de la taxe à la valeur, à moins que ces taxes n'aient pas été payées d'avance. Les nouveaux droits sont perçus sur le destinataire par l'Administration qui effectue la remise. Les colis avec valeur déclarée doivent être réexpédiés comme tels.

3. Sur demande de l'expéditeur ou du destinataire, les colis peuvent aussi être réexpédiés sur un autre pays ou y être renvoyés. Les colis avec valeur déclarée ne peuvent cependant être réexpédiés ou renvoyés que comme tels. Les expéditeurs peuvent

The reason for this claim is notified to the latter by means of a Bulletin of Verification.

ARTICLE XV

Reforwarding.

1. A parcel may be redirected in consequence of the addressee's change of address in the country of destination, at the request of either the sender or the addressee. Redirection allowed.

The reforwarding of a parcel within one of the contracting countries gives rise to the collection of the supplementary charges provided for by the Administration of that country. The same is true, if occasion arises, in regard to the delivery of such parcel to another person at the original place of destination. These charges shall not be cancelled even in case the parcel is returned to origin or reforwarded to another country. Additional charges.

2. If a parcel must be reforwarded to one of the two countries signatory to the present Agreement, it is liable to new postage charges, and, if occasion arises, new insurance fees, unless such charges and fees have been paid in advance. The new fees are collected from the addressee by the Administration effecting the delivery. Insured parcels must be reforwarded as such.

3. At the request of the sender or addressee, parcels may also be reforwarded or returned to another country. Insured parcels may not, however, be reforwarded or returned except as such. The senders may mark the parcels: "Do not forward to a Forwarding, etc., to another country. Forbidden, if so instructed.

En cas de perte, de spoliation ou d'avarie d'un colis avec valeur déclarée réexpédié sur un tiers pays ou renvoyé par ce pays, l'indemnité est déterminée exclusivement d'après les dispositions de l'Article VII, Paragraphe 1, 5ième alinéa, du présent Arrangement.

Les taxes sont exigibles de l'expéditeur et perçues par l'Administration qui lui rend les colis.

5. Les colis tombés en rebut dont l'expéditeur a fait abandon, peuvent, à l'expiration du délai de 30 jours, être vendus au profit de l'Administration du pays de destination. If, for any reason, sale is impossible, the deteriorated or corrupted articles are destroyed. The sale or destruction gives rise to the making of a report which is sent to the Administration of origin.

5. Undeliverable parcels which the sender has abandoned may, at the expiration of a 30-day period, be sold for the profit of the Administration of the country of destination. However, in the case of an insured parcel, a report is made up, which must be sent to the Administration of the country of origin. Conditionnement des Colis.

1. Le nom et l'adresse de l'expéditeur et du destinataire doivent être écrits d'une façon lisible et exacte, si possible sur le colis même ou sur une étiquette fixée solidement à l'envoi.

Il est recommandé d'insérer un double de l'adresse dans chaque colis, surtout lorsque l'usage d'une étiquette volante est rendu nécessaire par le conditionnement ou par la forme de l'envoi.

Les colis dont l'adresse de l'expéditeur ou du destinataire consiste en initiales seulement ne sont pas admis, exception faite des désignations commerciales (raisons sociales) composées d'initiales.

Preparation of Parcels.

Preparation of parcels.

1. The name and address of the sender and of the addressee must be written, legibly and correctly, if possible on the parcel itself, or on a label affixed securely to the parcel.

It is recommended that a duplicate of the address be inserted in every parcel, especially when the use of a tag is rendered necessary by the packing or form of the parcel.

Parcels on which the name of the sender or of the addressee is indicated merely by initials are not admitted, except in the case of commercial designations (trade names) composed of initials.

Addresses in pencil are not admitted. However, addresses written in indelible pencil on a previously dampened surface are accepted.

2. Parcels containing coins, gold or silver in bars, precious stones, or other precious articles, must always be sent insured.

When a parcel containing coin, gold or silver in bars, precious stones or other precious articles is sent uninsured through error, the post office first discovering it is bound to treat it as an insured parcel, and in accordance with the legislation of its country.

3. Each parcel must be packed in such a manner that the contents are protected over the whole route, and in such a way as to

à empêcher le contenu d'endommager des autres colis ou envois, ou blesser les agents postaux. L'emballage doit protéger le contenu suffisamment afin que les traces soient faciles à découvrir en cas de spoliation. Les colis avec valeur déclarée doivent être scellés par des cachets à la cire, par des plombs ou par un autre moyen équivalent. Pour les colis ordinaires, un ficelage soigneux suffit comme moyen de fermeture, mais ils peuvent aussi être scellés.

Comme mesure de sécurité, chaque Administration peut exiger qu'une empreinte ou marque spéciale de l'expéditeur figure sur les plombs ou cachets de fermeture des colis avec valeur déclarée.

L'Administration des douanes du pays de destination est autorisée à ouvrir les colis. A cet effet, les cachets ou toute autre fermeture peuvent être brisés ou rompus. Les envois ouverts par la douane doivent être refermés et, en outre, scellés d'office, si l'expéditeur les avait scellés.

4. Pour les colis avec valeur déclarée, le montant de la valeur déclarée doit figurer sur le colis, exprimé dans la monnaie du pays d'origine, en caractères latins. Ce montant doit être converti en francs-or par l'expéditeur ou par le bureau d'origine, et le résultat de la conversion est ajouté au-dessous de l'indication originale. Le montant de la valeur assurée doit aussi être indiqué sur le bulletin d'expédition.

5. Chaque colis avec valeur déclaré doit porter du côté de l'adresse un numéro (insurance number) et l'indication "insured" ou "valeur déclarée". Le même numéro d'assurance et la même annotation doivent également figurer sur le bulletin d'expédition.

6. Les étiquettes ou timbres-poste apposés sur les colis avec valeur déclarée doivent être espacés afin qu'ils ne puissent servir à cacher des lésions de l'emballage. Ils ne doivent pas, non plus, être repliés sur deux faces de l'emballage, de manière à couvrir la bordure.

prevent the contents from damaging other parcels or objects or injuring postal agents. The packing must protect the contents sufficiently that, in case of rifling, the traces thereof may be easily discovered. Insured parcels must be sealed with wax or lead or by some equivalent means. For ordinary parcels, careful tying is sufficient as a mode of closing, but they may also be sealed.

As a protective measure, either Administration may require that a special imprint or mark of the sender appear on the wax or lead seals closing insured parcels.

The Customs Administration of the country of destination is authorized to open the parcels. To that end, the seals or any other fastenings may be broken. Parcels opened by the customs must be refastened and also officially sealed, if the sender has sealed them.

4. For insured parcels, the amount of insured value must appear on the parcel in the currency of the country of origin and in Roman letters. This amount must be converted into gold francs by the sender or by the office of origin, and the result of the conversion is added below the original indication. The amount of the insured value must also be indicated on the dispatch note.

5. Each insured parcel must bear on the address side an insurance number and the notation "Insured" or "Valeur declaree". The same insurance number and notation must also be shown on the dispatch note.

6. The labels or postage stamps affixed to insured parcels must be spaced so that they cannot serve to conceal injuries to the packing. Neither must they be folded over two faces of the wrapping so as to cover the edge.

7. Les liquides et les corps facilement liquéfiable doivent être expédiés dans un double récipient. Entre le premier (bouteille, flacon, boîte, etc.) et le second (boîte en métal, en bois résistant, en fibre de solide qualité ou récipient de résistance équivalente), une espace doit être laissée qui sera remplie de sciure, de son ou de toute autre matière spongieuse, en quantité suffisante pour absorber tout le liquide en cas de bris du récipient.

8. Les poudres et les matières colorantes en poudre doivent être emballées dans de fortes boîtes en fer-blanc ou autre métal, qui, après avoir été soudées, seront placées à leur tour dans des emballages extérieurs résistants de manière à exclure tout endommagement d'autres envois.

7. Liquids and easily liquefiable substances must be sent in a double receptacle. Between the first (bottle, flask, box, etc.) and the second (box of metal, strong wood, or strong carton of fiberboard, or receptacle of equal strength), there must be left a space to be filled with sawdust, bran or other absorbent material, in sufficient quantity to absorb all the liquid in case that the receptacle is broken.

8. Powders and dyes in powder form must be packed in strong boxes of tin or other metal, which, after soldering, must be placed in turn in substantial outer covers in such a way as to avoid all damage to other articles.

ARTICLE 2.

Déclarations en douane et Bulletins d'expédition.

1. L'expéditeur doit préparer une déclaration en douane et un bulletin d'expédition pour chaque colis expédié de l'un ou l'autre pays, sur des formules spéciales fournies à cet effet par le pays d'origine.

La déclaration en douane doit fournir une description générale du colis, une liste exacte et détaillée de son contenu et de sa valeur, la date de sa mise à la poste, le poids réel, le nom et l'adresse de l'expéditeur, et le nom et l'adresse du destinataire; et elle sera attachée solidement au colis.

Le bulletin d'expédition doit indiquer le bureau d'origine, le nom et l'adresse de l'expéditeur, le nombre de déclarations en douane, le poids du colis, le port payé, le nom et l'adresse du destinataire, et le bureau de destination; et il sera attaché solidement au colis.

Toutefois, par exception à ce qui précède, lorsque plus d'un colis non assuré est déposé simultanément par le même expéditeur à l'adresse du même destinataire,

Customs declarations, etc.

1. The sender shall prepare one customs declaration and one dispatch note for each parcel sent from either country, upon special forms provided for the purpose by the country of origin.

The customs declaration shall give a general description of the parcel, an accurate statement in detail of its contents and value, date of mailing, actual weight, the sender's name and address and the name and address of the addressee, and shall be securely attached to the parcel.

The dispatch note shall show the office of mailing, the name and address of the sender, the number of customs declarations, the weight of the parcel, the postage paid, the name and address of the addressee, and the office of destination and shall be securely attached to the parcel.

Telles déclarations en douane et tels bulletins d'expédition doivent indiquer, outre les détails prévus aux deux alinéas précédents, le nombre total de colis constituant le lot entier; et ils seront attachés solidement à l'un des colis. Dans de tels cas, chaque colis d'un groupe doit être numéroté 1, 2 ou 3, à titre de numéros d'identification; et lorsque plus de trois colis sont envoyés simultanément chaque groupe est désignée par une lettre (a, b, c, etc.); pour exemple, lorsqu'il y a deux groupes de trois colis chacune, les colis doivent être marqués "a-1", "a-2" et "a-3"; et "b-1", "b-2" et "b-3".

In such case, each parcel in a group must be numbered 1, 2 or 3, as identification numbers, and when more than 3 parcels are sent at the same time each group is indicated by a letter (a, b, c, etc.); for example, when there are 2 groups of 3 parcels each, the parcels shall be marked "a-1", "a-2" and "a-3" and "b-1", "b-2" and "b-3".

Le bureau d'origine, ou un autre bureau quelconque désigné par l'Administration expéditrice, doit remplir une formule d'avis de réception et l'attacher au colis. Si la formule ne parvient pas au bureau de destination, celui-ci prépare un duplicata.

2. Le bureau de destination, après avoir dûment rempli la formule d'avis de réception, la renvoie en franchise de port à l'adresse de l'expéditeur du colis.

Contracting Powers.

The United States of America and the United Mexican States having taken into consideration the studies and engineering plans carried on by the International Boundary Commission, and specially directed to relieve the towns and agricultural lands located within the El Paso-Juarez Valley from flood dangers, and securing at the same time the stabilization of the international boundary line, which, owing to the present meandering nature of the river it has not been possible to hold within the mean line of its channel; and fully conscious of the great importance involved in this matter, both from a local point of view as well as from a good international understanding, have resolved to undertake, in common agreement and cooperation, the necessary works as pro-

Los Estados Unidos de América y los Estados Unidos Mexicanos habiendo tomado en consideración los estudios y proyectos de carácter técnico llevados a cabo por la Comisión Internacional de Límites, encaminados especialmente a librar a las poblaciones y a las tierras laborables, situadas dentro del Valle de El Paso-Juárez, de los peligros de inundación, logrando al mismo tiempo la estabilización de la línea divisoria internacional, que dada la actual naturaleza divagante del Río, no ha sido posible conservar dentro de la línea media del cauce del mismo; y penetrados de la gran importancia que tanto desde el punto de vista del interés local, como de la buena inteligencia internacional, reviste este asunto, han resuelto ejecutar, de común acuerdo y cooperación,

vided in Minute 129 (dated July 31, 1930) of the International Boundary Commission, approved by the two Governments in the manner provided by treaty; and in order to give legal and final form to the project, have named as their plenipotentiaries:

I.

El Gobierno de los Estados Unidos de América y el Gobierno de los Estados Unidos Mexicanos han convenido en ejecutar las obras de rectificación del Río Grande (Bravo del Norte) previstas en el Acta número 129 de la Comisión Internacional de Límites y el informe anexo, que ha sido aprobada por ambos Gobiernos, en el tramo que comienza en el punto de intersección del cauce actual del Río con el trazo del proyecto tal como aparece en el mapa anexo No. 2, Acta 129 de dicha Comisión, (intersección que queda al Sur del Monumento No. 15 del polígono limítrofe de la Isla de Córdova), y termina en el Box Canyon (Cañón de Cajoncitos.)

Para la ejecución de las obras se seguirá el procedimiento fijado en el estudio técnico del proyecto. Las obras comenzarán y serán llevadas a cabo en primer lugar en el extremo inferior, pudiendo a la vez ejecutarse obras en tramos superiores del Valle por razones de emergencia.

III.

Proration of costs.

En atención a la diferencia que existe entre los beneficios reportados con las obras de rectificación por cada uno de los países contratantes, el costo a repartir a pro rata de las mismas será expensado por ambos Gobiernos en la proporción de 88%—ochenta y ocho por ciento—por los Estados Unidos de América y 12%—doce por ciento—por los Estados Unidos Mexicanos.

En el cauce ya rectificado del río—tanto en los tramos normales como en los construídos—y en cualquier parte de dicho cauce que haya sido terminado, la línea divisoria internacional permanente será el centro del cauce más profundo del río dentro de dicho cauce rectificado del río.

Minute No. 129 of International Boundary Commission.

INTERNATIONAL BOUNDARY COMMISSION UNITED STATES AND MEXICO.

Mexico City
July 31, 1930.

MINUTE NO. 129.

Subject: Report on Rio Grande Rectification.

The Commission met in the conference room at the Department of Foreign Relations, Mexico City, at ten o'clock a.m. July 31, 1930, in accordance with Minute No. 128, to complete its action in reporting and recommending a plan for Rio Grande rectification.

(1) Each section of the International Boundary Commission has been requested by the Foreign Relations Department of its Government to study and develop an international plan for the removal of the flood menace of the Rio Grande from the El Paso-Juarez Valley. Studies and investigations have now reached the point where it is possible to report to the two Governments a definite plan with estimates of cost; and the following is the report of the International Boundary Commissioners, together with a joint report prepared by the consulting engineers and technical advisers. Minute No. 111 of the Joint Commission, dated December 21, 1928, outlined in a general way the necessities for international action and gave a general description of the areas involved, a preliminary summary of the proposed plan and recommended proceeding with the development of the final details of the plans and estimates. During the past few months a most important step taken by the Commission consisted in rendering decisions determining the national jurisdiction and dominion of a number of

ACTA NUMERO 129.

Asunto: Informe sobre Rectificación del Río Bravo.

La Comisión se reunió en la Sala de Conferencias de la Secretaría de Relaciones Exteriores en la Ciudad de México, a las 10 horas del día 31 de julio de 1930, de acuerdo con lo convenido en el Acta No. 128, para formalizar por medio de esta Acta su informe y recomendaciones a los dos Gobiernos sobre el proyecto de Rectificación del Río Bravo.

(1) Cada una de las Secciones de la Comisión Internacional de Límites ha recibido instrucciones de la Secretaría de Relaciones Exteriores de su respectivo Gobierno para estudiar y preparar un proyecto de carácter internacional a fin de conjurar el peligro de inundación por aguas del Río Bravo, que se cierne sobre el Valle de Juárez-El Paso. Los estudios y las investigaciones han llegado a un punto tal que permiten presentar a los dos Gobiernos un proyecto definido y un presupuesto de costos, y a continuación aparece el Informe de los Comisionados de la Comisión Internacional de Límites, acompañado de un informe común preparado por los Ingenieros Consultores y los Asesores Técnicos. En el Acta No. 111 de la Comisión Unida, de fecha 21 de Diciembre de 1928 se delineó, en términos generales, la necesidad de tomar medidas de carácter internacional y se hizo una descripción general de los terrenos afectados y un resumen preliminar del proyecto y se recomendó que se elaborara éste hasta sus detalles finales y costos. Durante los últimos meses la Comisión ha dado un

banco cases in the area under consideration.

(2) The plan prepared and developed by the Joint Commission is attached hereto as an exhibit to this minute. In transmitting it to the two Goverments[1] the Commissioners offer it as being both practical and feasible as an engineering and economic project. In general the plan consists of straightening the present river channel, effecting decrease in length from one hundred fifty-five (155) miles to eighty-eight (88) miles, and confining this channel between two parallel levees. In addition to this channel the plan includes the construction of a flood retention dam at the only available site, twenty-two (22) miles below Elephant Butte on the Rio Grande, creating reservoir storage of one hundred thousand (100,000) acre feet. Careful studies based on actual past flood performance show the advantage of reducing the flood flow reaching El Paso-Juarez by storage in the proposed reservoir. The reduction in flood flow thru the El Paso-Juarez Valley accomplished by such storage of flood waters effects a saving of a quarter of a million dollars in the works required thru the valley by decreasing the size of the channel and reducing the area required for right-of-way, and amount of yardage in levees.

(3) The meandering and uncontrolled Rio Grande below El Paso-Juarez has in recent years become a very serious menace to adjacent lands on both sides. Authorities of both countries have unsuccessfully attempted the protection of the improvements in the El Paso-Juarez Valley and the two cities. Considering the fu-

paso muy importante al dictar sus decisiones determinando el dominio y jurisdicción nacionales correspondientes a varios bancos en la zona de que se trata.

(2) El proyecto elaborado por la Comisión Unida va agregado como un anexo a la presente Acta, y al enviarlo a los dos Gobiernos, los Comisionados lo presentan como un proyecto viable y práctico desde los puntos de vista económico y de ingeniería. En términos generales, el proyecto consiste en enderezar el cauce actual del Río y disminuir su longitud de 247 kilómetros (155 millas) a 141 kilómetros (88 millas), y confinar este cauce entre dos diques paralelos. El proyecto comprende, además de este cauce, la construcción de una Presa de retención de avenidas en el único lugar adecuado, que queda sobre el Río Grande a 35 kilómetros (22 millas) abajo de la Presa del Elefante, para formar un vaso de almacenamiento de 123.350.000 metros cúbicos (100.000 acres pies). El estudio cuidadoso de las crecientes e inundaciones pasadas aconseja la conveniencia de disminuir el gasto de creciente que llegue a Juafez-El Paso mediante el almacenamiento que se propone. La reducción en el gasto de crecientes en el Valle de El Paso-Juárez que se obtiene mediante este almacenamiento se traduce en un ahorro de cerca de $250,000.00 dólares en las obras en el Valle, pues permite disminuir las dimensiones del cauce, la extensión necesaria para el derecho de vía y el volumen de terracerías de los diques.

(3) El Río Bravo, por la falta de control y por su carácter divagante abajo de Juárez-El Paso, ha llegado a constituir en los últimos años una seria amenaza para los terrenos ribereños en ambos lados. Las autoridades de ambos Países han tratado de proteger las mejoras materiales que existen en ambas ciudades y en el

tility of providing adequate and proper protection on the present meandering river location, the two affected communities have expended the limit of a reasonable and justifiable amount in local flood protection works. A proper and sound plan for accomplishing desired results lies in a coordinated international project.

(4) Existing treaties provide for the center of the Rio Grande, except in isolated cases, being the International Boundary line. The present river channel, with excessive length, was produced by natural conditions which no longer exist. Increase in settlement, cultivation and values justify both Governments in considering means of removing the flood menace and providing an adequate flood channel.

(5) Actual field surveys were continued in the location on the ground of a rectified channel subject, of course, to some later slight modification, but generally sufficiently definite to permit estimates of right-of-way and construction costs. With office and field location of this channel line which generally follows and straightens the present meandering river, it has been possible to estimate acreages and values of the relatively small areas that would be detached from one country and attached to the other—so balanced in area that neither country would gain nor lose national territory.

(6) At the present time the bed of the Rio Grande between El Paso and Juarez is at a higher elevation than some of the streets and other properties of the two cities. Accumulations of sedi-

Valle, sin conseguirlo, y ambas comunidades han gastado una suma que consideran como el máximo razonable y justificado en obras de defensa de carácter local, pues reconocen la futilidad de pretender dar protección adecuada y completa siguiendo el actual cauce divagante del Río. Para alcanzar el resultado deseado la solución más adecuada requiere un programa coordinado de carácter internacional.

(4) De acuerdo con los Tratados en vigor, la Línea Divisoria Internacional es el centro del Río Bravo, con excepción de algunos casos aislados. La longitud excesiva del cauce actual del Río se produjo por condiciones naturales que ya no existen. Los aumentos en la población, en el cultivo y en el valor de la propiedad, justifican que ambos Gobiernos busquen los medios de conjurar el peligro de inundación y de crear un cauce adecuado para las crecientes.

(5) Se han continuado los trabajos en el campo para la localización sobre el terreno de un cauce rectificado que, como es natural, podrá ser modificada ligeramente, pero que en general está suficientemente definida para poder hacer estimaciones de costos de derecho de vía y de construcción. Estos trabajos de campo y de gabinete han tenido por objeto hacer una localización del cauce proyectado, que en general sigue y rectifica el actual cauce divagante del Río, y han permitido hacer estimaciones de las áreas y de los valores de las parcelas (relativamente pequeñas) que resultarán segregadas de un País y adheridas al otro. La localización se ha hecho de modo que sean iguales las áreas de las parcelas cortadas de cada País, a fin de que ninguno pierda ni gane territorio.

(6) En la actualidad el lecho del Río Bravo frente a las Ciudades de Juárez y El Paso está más alto que algunas de las calles y edificios de dichas poblaciones. La acumulación continua de

ment are continuing to aggravate this situation, and until proper grades and hydraulic conditions are introduced by artificial works, there are no means for carrying off these deposits which are encroaching upon the carrying capacity of the channel. The consensus of opinion of engineers who have studied the situation is that the correction lies in the plan proposed of straightening and confining the channel. One of the principal requirements to permit such artificial rectification is the equitable adjustment of the areas which would be necessarily detached from one side of the river and attached to the other in the straightening process. The plan evolved, of having each Government acquire the private titles to these equal areas for later exchange, provides a feasible solution. These areas to be acquired are generally seeped and waterlogged, and so shaped and situated as to be unsusceptible of proper irrigation and drainage.

(7) The benefits to be derived from the straightened and rectified channel plans are mutual to the two Governments in affording flood protection and in permitting cultivation, improvement and settlement of even larger areas adjoining the Rio Grande than are now possible under the meandering river conditions. It is of utmost importance that the Governments own and control the flood channel in order that private encroachments be definitely prevented and eliminated. Such ownership and control will also be of great assistance in the enforcement of national immigration and customs laws of both countries.

(8) In giving consideration to the determination of proper and justifiable proration of costs between the two countries, conditions other than gross and irrigated areas are necessarily in-

azolve sigue agravando la situación, y no es posible lograr el acarreo de estos depósitos que reducen notablemente la capacidad del cauce, sino hasta que se modifiquen las condiciones hidráulicas y las pendientes en forma adecuada, mediante obras arificiales. En opinión general de los Ingenieros que han estudiado el problema, la solución consiste en rectificar y canalizar el cauce, que es lo que se propone hacer. Uno de los requisitos principales para realizar esta rectificación artificial es el de hacer un ajuste equitativo sobre las parcelas que forzosamente tienen que segregarse de un lado del Río y pasarse al otro lado al hacer la rectificación. Esto se logra mediante la adquisición por cada Gobierno de los títulos de propiedad particular sobre los terrenos por segregar, que son iguales en extensión, y que se canjearán al hacer las obras. Estas parcelas son terrenos ensalitrados y pantanosos, y por su forma y situación no pueden regarse ni drenarse debidamente.

(7) Ambos Países se beneficiarán por las ventajas que resultarán al rectificar y canalizar el Río, pues así se defiende la región de las inundaciones, se aumentan las extensiones cultivadas, las mejoras materiales y las posibilidades de colonización en las orillas del Río, lo que no es posible en las actuales condiciones divagantes de la corriente. Es de capital importancia que los Gobiernos sean dueños del cauce mayor del Río y tengan control sobre él a fin de evitar definitivamente su obstrucción u ocupación por intereses privados. Siendo los Gobiernos dueños del cauce, se facilitará la vigilancia de la frontera y el cumplimiento de las leyes aduanales y de migración de ambos Países.

(8) Al analizar la forma de repartir los costos entre los dos Países en condiciones equitativas hay que tomar en cuenta forzosamente, además de las extensiones brutas de terrenos y de las ex-

cluded. Economic features and values in the two countries are distinct and different. While the use of areas may be entirely proper in a distribution of costs for irrigation development, this unit of proration for an international flood control plan is unsuitable and produces serious irregularities. The Commission has taken into consideration the benefits that each country would receive according to the areas and their values to be protected rather than the benefits each would receive on the sole acreage basis. On the American side of the valley there are about fifty-three thousand (53,000) acres of land under the Rio Grande Federal Irrigation Project with water rights assured; the greater part of which is in full cultivation, and about seventeen thousand (17,000) acres in the lower portion of the valley below the project limits which are irrigated with project surplus water. The total irrigated area is seventy thousand (70,000) acres. This area is served with irrigation and drainage works, and first-class roads. Finance companies facilitate the financing of the production and distribution of agricultural products.

(9) On the Mexican side of the valley there are about thirty-five thousand (35,000) acres of land in cultivation, of which twenty thousand (20,000) acres have assured water rights under the Rio Grande Federal Irrigation Project, provided for by the Water Treaty of 1906. Practically no drainage works have been constructed and the irrigation works are largely insufficient. The productiveness of the lands on the Mexican side is under these circumstances much less than the corresponding lands on the north side of the river, and there are large areas with insignificant or no production. No

tensiones regadas, algunas otras circunstancias. Las condiciones económicas y el valor de la propiedad son muy diferentes en los dos Países. Si bien es cierto que en la distribución del costo de un sistema de irrigación sería adecuado tomar como base las extensiones de terreno, si se adoptara esta misma base para el reparto del costo del proyecto internacional de obras de defensa se llegaría a conclusiones injustificadas e inaceptables. La Comisión ha tomado en cuenta al estimar los beneficios que cada País recibiría no solamente la proporción entre las superficies de los terrenos protegidos en cada margen sino el verdadero valor de ellos. En el lado americano del Valle hay 21.200 hectáras (53.000 acres) con derechos de agua asegurados dentro del Sistema Federal de Irrigación "Río Grande", estando la mayor parte de esta extensión bajo cultivo; hay también 6.800 hectáras (17.000 acres) en la región inferior del Valle, y fuera de los límites del Sistema, que se riegan con las aguas sobrantes del mismo. El área total regada es de 28.000 hectáras (70.000 acres), que tienen obras de riego y de drenaje y caminos de primera clase. Existen además Compañías Refaccionarias que facilitan la producción agrícola y la distribución de los productos.

(9) En el lado mexicano del Valle hay aproximadamente 14.000 hectáras (35.000 acres) bajo cultivo, de las cuales 8.000 hectáras (20.000 acres) tienen derechos de agua seguros en el Sistema de Irrigación Federal "Río Grande", según el Tratado de Aguas de 1906. Prácticamente no existen obras de drenaje y las de riego son inadecuadas. En estas circunstancias, la productividad de las tierras del lado mexicano es muy inferior a la correspondiente a las tierras de la margen Norte del Río, y hay grandes extensiones en que la producción es prácticamente nula. No existen buenos caminos y las Compañías Refaccionadoras

major road improvements exist, and the finance companies organized to serve Mexican farmers are very limited in number and resources. The industrial plants and means for handling agricultural products are in very small proportion when compared with those in the valley in the United States.

(10) The estimated value of agricultural investments in the American part of the valley, according to figures assembled by the Bureau of Reclamation, including purchase of land and its preparation, farm improvements, equipment and live stock, is seventeen million dollars ($17.-000,000) or thirty-four million gold pesos. The value of agricultural improvements on the Mexican side as estimated by Engineer Salvador Arroyo, Chief of the Flood Protection Work, is five million four hundred thousand ($5,400,000) gold pesos. Comparing these agricultural values in one part of the valley with those in the other it is seen that the Mexican side represents thirteen per cent of the total and the American eighty-seven per cent. Valley lands on either side of the river without water rights and assured irrigation service have very nominal value as compared with the lands obtaining water service from project sources; a comparison of such areas on this basis results in twenty-seven per cent for Mexico and seventy-three per cent for the United States.

(11) As the cities and suburbs of El Paso and Juarez not only are included in the flood protection plan, but either directly or indirectly would receive a large part of the benefits of the rectification of the channel, the Commission has considered the proration of values which each city bears to the other and giving proper weights to various percentages, believes the justifiable proration to be twelve (12) per cent

organizadas para servir a los agricultores mexicanos son en número limitado y de escasos recursos. Las plantas industriales y los medios para la distribución de los productos agrícolas son inferiores a los que hay del lado de los Estados Unidos en este Valle.

(10) De acuerdo con los datos recopilados por el "Bureau of Reclamation", se estima en $17,-000.000.00 de dólares ($34.000.-000.00 de pesos oro nacional) el valor de las inversiones agrícolas en la parte americana del Valle, incluyendo precio de la tierra, su preparación, las mejoras materiales y edificios de los ranchos, los implementos y semovientes. El valor de las inversiones agrícolas en el lado mexicano es de $5.400.000 oro nacional según el avalúo hecho por el Ingeniero Salvador Arroyo, Jefe de la Comisión de Obras de Defensa contra Inundaciones. Si se comparan las inversiones agrícolas en un lado del Valle con las del otro, puede verse que el lado mexicano representa el 13% del total, y el lado americano el 87%. Los terrenos en cada lado del Río que no tienen derechos de agua asegurados ni servicio de riego permanente, tienen un valor insignificante comparados con los terrenos que se surten de agua del Sistema de Riego, y al comparar las extensiones correspondientes a terrenos de esta categoría, resulta el 27% de ellos en México y el 73% en los Estados Unidos.

(11) Puesto que las ciudades y los suburbios de Juárez y El Paso, además de quedar cubiertos por el Proyecto de Obras de Defensa contra las Inundaciones, reciben directa o indirectamente una gran parte de los beneficios de la rectificación del cauce, la Comisión ha tomado en cuenta los valores relativos de una y otra ciudad, y después de asignar a los varios porcentajes los pesos debidos, considera que el reparto equita-

for Mexico and eighty-eight (88) per cent for the United States.

(12) With reference to the estimates (exhibit number five of the engineers' report) the grand total of six million one hundred six thousand five hundred dollars ($6.106,500) includes certain items in which the Commissioners concur as being non-proratable and properly and practically chargeable to each Government separately. These are: rights-of-way four hundred twelve thousand five hundred dollars ($412,-500), for purchase of private channel rights above Cordova seventy-five thousand dollars ($75,000), segregated tracts two hundred sixty-six thousand dollars ($266,000), changes in irrigation works two hundred twenty-five thousand dollars ($225,000). The total of these items, with twenty per cent overhead and contingencies is one million one hundred seventy-four thousand two hundred dollars ($1.174,200). This amount subtracted from the grand total leaves a proratable total of four million nine hundred thirty-two thousand three hundred dollars ($4,932.300). Using twelve per cent (12%) and eighty eight per cent (88%) as the basis of proration Mexico's share of the cost of the project would be five hundred ninety-one thousand eight hundred seventy-six dollars ($591,876) and that of the United States four million three hundred forty thousand four hundred twenty-four dollars ($4.340,424).

(13) On the basis that this report and the engineers' statement have been prepared and submitted with the view of generally straightening the present river location between the International Dam above El Paso-Juarez and the Box Canyon below Fort Quitman, the question of using the present river at Fabens or following the boundary route on the south of the San Elizario area is left for later determination. From the data

tivo de los costos puede hacerse a razón de 12% para México y 88% para los Estados Unidos.

(12) En cuanto al presupuesto contenido en el anexo No. 5 del informe de los Ingenieros, los Comisionados juzgan que del total de $6.106,500.00 dólares, algunos gastos no deben repartirse a "pro-rata", sino cargarse a cada Gobierno separadamente, por razones de conveniencia práctica. Estas partidas son: Derecho de vía $412,500.00 dólares; compra de propiedades particulares dentro del cauce del Río arriba de Córdova $75.000.00 dólares; terrenos segregados, $266.000.00 dólares y cambios en las obras de riego, $225.000.00 dólares. El total de estas partidas, aumentado en un 20% por gastos de administración e imprevistos, es de $1.174,200.00 dólares, que, deducido del gran total, arroja un total de $4.932,300.00 dólares que repartido en la proporción de 12% y de 88%, resulta que correspondería a México como participación en este proyecto, la cantidad de $591.876.00 dólares y a los Estados Unidos $4.340,424.00 dólares.

(13) Partiendo de la base de que el presente informe y el estudio de los Ingenieros se han preparado y se presentan con la idea de rectificar en general el cauce actual del Río entre la Presa Internacional arriba de Juárez-El Paso y el Cañón de Cajoncitos abajo de Fort Quitman, se ha dejado para decidirse en el futuro la elección entre los dos trazos en la Isla de San Elizario, es decir, si debe seguirse el cauce actual del Río que pasa por Fabens o si debe llevarse por

at hand, apparently there is argument in favor of both routes. Following either the present river or the boundary line route requires adjustment of detached areas, and the proposed channel below this section can be so located as to compensate for any inequalities of such areas.

(14) The following are the recommendations of the Commission:

(a) The Commissioners recommend that the two Governments approve the plan for river rectification as outlined in the attached engineering report, including the feature of the flood retention dam, the general straightening of the present river location and the establishment of a flood channel which generally will follow and straighten the present river from International Dam to the Box Canyon below Fort Quitman.

(b) That both countries in view of the serious situation proceed to an agreement, without delay, which will carry into effect the engineering and construction features as outlined in the attached report.

(c) That the International Boundary Commission be authorized to prepare detail plans, and to direct and supervise the construction and all other engineering operations, utilizing such established governmental agencies as each government may deem proper.

(d) That each section of the International Boundary Commission be authorized to acquire for its country the necessary rights-of-way and detached areas located within its territorial limits, thru the proper governmental agencies.

el actual Límite Internacional al Sur de la Isla. Con los datos de que se dispone hay razones en apoyo de cada uno de los trazos. Ya sea que se siga el trazo por el cauce actual del Río o el trazo por el Límite Internacional, es requisito esencial que se igual en las áreas segregadas, y con este objeto puede desalojarse el trazo proyectado abajo de la Isla de manera que haya compensación en dichas áreas.

(14) RECOMENDACIONES.—A continuación constan las recomendaciones de la Comisión:

(a).–Los Comisionados recomiendan que los dos Gobiernos aprueben el proyecto de Rectificación del Río descrito en el informe de los Ingenieros que se acompaña, y que comprende la construcción de una Presa de retención, la rectificación general del cauce actual del Río y la creación de un cauce mayor o de avenidas que, en general, siga y rectifique el Río actual desde la Presa Internacional hasta el Cañón de Cajoncitos abajo de Fort Quitman.

(b).–Que en vista de la seriedad de la situación, ambos países celebren sin demora un arreglo para ejecutar el proyecto de ingeniería y de construcción descrito en el informe adjunto.

(c).–Que se autorice a la Comisión Internacional de Límites para preparar los planos de detalle, y para dirigir e inspeccionar la construcción y todas las otras operaciones de ingeniería, utilizando las dependencias que cada Gobierno juzgue adecuadas.

(d).–Que se autorice a cada una de las Secciones de la Comisión Internacional de Límites para que, por los conductos debidos, adquiera dentro de su propio territorio y a nombre de su País los terrenos necesarios para el derecho de vía y porciones segregadas.

Minute No. 129 of International Boundary Commission—Contd.

(e) That agreement between the two Governments provide for the exchange of one-half of the area required for right-of-way and the total area of detached tracts of each country.

(f) That the total proratable cost of four million nine hundred thirty two thousand three hundred dollars ($4.932,300) be divided between Mexico and the United States on the basis of twelve per cent (12%) and eighty-eight per cent (88%) respectively, and that each Government provide annually such required appropriations as will complete the work in four or five years.

(g) That the agreement between the two countries provide for the jurisdiction of the International Boundary Commission over all matters concerning the rectified channel.

(h) That this Commission be authorized to adopt such rules and regulations as it may deem necessary to the end that the preservation of the rectified channel may be perpetuated.

(i) That each country hold the other immune from all private or national claims arising from the construction and maintenance of the rectified channel or any other cause whatsoever in connection with this project.

JOINT REPORT OF CONSULTING ENGINEERS RIO GRANDE RECTIFICATION EL PASO-JUAREZ VALLEY.

Mexico, D.F.
July 16, 1930.

I.–INTRODUCTION.

1.–*Outline of Proposed Plan.*

(a) It is proposed to reduce materially the flood flow at El Paso-Juarez by the construction of a detention dam with a one hundred thousand (100,000) acre foot–(123,350,000 cubic meter) reservoir at Caballo, and to control this flood flow thru the El Paso-Juarez Valley in a shortened channel by the construction of parallel levees. The proposed artificial channel will follow and rectify, in a general way, the present river from Land Monument Number One to the Box Canyon below Fort Quitman, and is so located as to segregate the same area from each country.

(b) The general engineering features of the project involve: the reduction of river length from one hundred fifty-five (155) miles (247 kilometers) to eighty-eight (88) miles (141 kilometers); the establishment between levees of a floodway five hundred ninety (590) feet (180 meters) wide with a capacity of eleven thousand (11,000) second feet (314 cubic meters per second); and the increasing of the gradient from a slope of .00035 (1.82 feet per mile) to a slope of .00061 (3.20 feet per mile). The levees require the placement of eight million nine hundred eighty-five thousand (8,985,000) cubic yards (6,870,000 cubic meters) of earth, their average height being 7.5 feet (2.25 meters). Four million seven hundred seventy-five thousand (4,775,000) cubic yards (3,650,000 cubic meters) of earth

INFORME COMUN DE LOS INGENIEROS CONSULTORES SOBRE EL PROYECTO DE RECTIFICACION DEL RIO BRAVO, EN EL VALLE DE JUAREZ-EL PASO.

México, D.F.,
Julio 16 de 1930.

I.–INTRODUCCION.

1.–*BOSQUEJO DEL PLAN PROPUESTO.*

(a) Se propone disminuir de manera considerable el gasto de inundación en el Valle de Juafez-El Paso, construyendo al efecto una presa de retención de avenidas, con un vaso de 123.350,000 metros cúbicos (100,000 acres pies) de capacidad en Caballo, y confinar este gasto de crecientes a través del Valle de Juafez-El Paso en un cauce artificial, por medio de la construcción de diques paralelos. El cauce artificial en proyecto seguirá y rectificará, de manera general, el cauce actual del Río desde el monumento Número 1 de la línea divisoria terrestre hasta el cañón de Cajoncitos abajo de Fort Quitman y quedará localizado de manerá de segregar la misma área de cada uno de los dos países.

(b) Las principales características técnicas de este proyecto son: la reducción de la longitud del Río de 247 kilómetros (155 millas) a 141 kilómetros (88 millas); la formación de un cauce de crecientes de 180 metros de ancho (590 pies) con capacidad para 314 metros cúbicos (11.000 pies cúbicos) por segundo, mediante la construcción de diques paralelos; el incremento de la pendiente del Río de 0.00035 (1.82 pies por milla) a 0.00061 (3.20 pies por milla). La formación de los diques requiere la colocación de 6.870.000 metros cúbicos (8.985.000 yardas cúbicas) de tierra, siendo su altura media de 2.25 metros (7.5 pies). La formación del cauce artificial exige la exacavación de 3.650,000 metros cúbicos (4.775,000 yardas cúbicas) de tierra. Para el derecho de vía de este cauce, son necesarias

are required to be excavated to provide artificial channel. The areas required for right-of-way for this channel are four thousand seventy-five (4,075) acres (1650 hectares) from the United States and also four thousand seventy-five (4,075) acres (1650 hectares) from Mexico.

(c) The tentative proposed location of the rectified channel segregates three thousand four hundred sixty (3460) acres (1400 hectares) from the United States and also three thousand four hundred sixty (3460) acres (1400 hectares) from Mexico.

(d) The estimated cost of the project, including Caballo Dam, is about six million (6,000,000) dollars.

(e) This project will eliminate the flood menace throughout the El Paso-Juarez Valley in both the United States and Mexico, will prevent channel changes and detachment of areas from one country to the other, and will permit the reclaiming of low-lying areas.

2.–*Present Conditions.*

(a) The Rio Grande forms generally the International Boundary between the United States and Mexico from Land Monument Number One to the Box Canyon below Fort Quitman in the El Paso-Juarez Valley, and is a meandering stream subject to changes, creating detached areas from one country to the other.

(b) The gross area of valley land in both the The United States and Mexico, between El Paso-Juarez and the Box Canyon, is one hundred sixty-five thousand (165,000) acres (66,000 hectares) of which ninety six thousand (96,000) acres (38,400 hectares) are in the United States and sixty-nine thousand (69,000) acres (27,600 hectares are in Mexico. Estimated values existing in the cities of El Paso and Juarez and their valleys, including irrigation and drainage works and improved roads, are in excess of one hundred million dollars ($100,000,000).

1650 hectáras (4075 acres) en México y 1650 hectaras (4075) cuatro mil setenta y cinco acres en Estados Unidos.

(c) La localización proyectada para el cauce rectificado corta 1400 hectáras (3.460 acres) de México y también 1400 hectáras (3460 acres) de Estados Unidos.

(d) El costo del proyecto, incluyendo la presa en Caballo, es aproximadamente de Dls. 6.000.000.00.

(e) Este proyecto suprimirá la amenaza de inundaciones en el Valle de Juárez-El Paso, tanto en México como en Estados Unidos; evitará cambios de cauce y segregación de terrenos de un país al otro; y permitirá ganar para el cultivo muchas de las tierras bajas ribereñas.

2.–*Condiciones Actuales.*

(a) El Río Bravo (Grande) forma, en general, el Límite Internacional entre México y los Estados Unidos desde el monumento Número 1 al Cañón de Cajoncitos abajo de Fort Quitman en el Valle de Juárez-El Paso; es una corriente divagante cuyos cambios de cauce segregan terre nos de un país a otro.

(b) El área total de terrenos en las vegas, tanto en México como en Estados Unidos, entre Juárez-El Paso y el Cañón de Cajoncitos es de 66,000 hectáras (165,000 acres), de las cuales 38,400 hectáras (96,000 acres) están en Estados Unidos y 27,600 hectáras (69,000 acres) están en México. El valor en que se estiman las ciudades de Juárez y El Paso y sus Valles, incluyendo las obras de riego, de drenaje y caminos, excede de Dls. 100.000.000.00.

(c) Notwithstanding tha [1] fact that the present total amount of sediment annually carried thru this valley by the Rio Grande is only a very small percentage of that carried previous to the construction of the Elephant Butte Dam, the absence of the former large scouring floods has resulted in the silting up of the river channel to a point where rainfall discharges from arroyos entering the river between Elephant Butte and El Paso-Juarez menace the improved and developed properties of both cities and valley lands. Only large floods of destructive proportions are capable of eroding accumulations of sediment as they now occur in the meandering channel.

(d) The Mexican Department of Communications and Public Works and the city and county of El Paso have expended in the last few years over seven hundred fifty thousand dollars ($750,000) to protect the cities of El Paso-Juarez and the Valley lands from floods. These works consist largely of levees built along the banks of the meandering channel, and require constant strengthening and repair on account of the raising of the river bed. A more substantial and effective plan must be adopted to secure permanent and efficient protection.

II.–DETAIL REPORT.

Since the joint preliminary report, dated December 1928, was submitted to the Commission, location surveys covering the entire lenght [1] of river from the cities of El Paso and Juarez to Quitman Canyon have been completed. These surveys have furnished additional data, and form in a large measure the basis for the report which follows.

[1] So in original.

(c) A pesar de que la cantidad total de sedimento que al año acarrea actualmente el Río Bravo en este Valle, es sólo un tanto por ciento pequeño de la que acarreaba antes de la construcción de la Presa del Elefante, la carencia de fuertes crecientes de carácter erosivo ha determinado el depósito de sedimentos en el cauce del Río a un grado tal que las avenidas producidas por las lluvias en las cuencas de los arroyos que desembocan en el Río entre la Presa del Elefante y Juárez-El Paso, constituyen una amenaza para ambas ciudades, así como para las mejoras y terrenos en ambas márgenes. La erosión y arrastre de los sedimentos acumulados actualmente en el cauce divagante del Río, es posible solamente por grandes crecientes de carácter destructivo.

(d) Tanto la Secretaría de Comunicaciones y Obras Públicas de México como la Ciudad y el Condado de El Paso, han gastado en unos cuantos años más de Dls. 750.000.00 para proteger contra inundaciones las ciudades de Juárez y El Paso, así como sus respectivos Valles. Estas obras de protección consisten en su mayor parte de diques construidos siguiendo las márgenes del cauce divagante, los cuales deben ser continuamente reforzados y reparados como consecuencia del ascenso del cauce del Río; siendo necesario adoptar un programa de trabajos coordinado y eficaz a fin de lograr una protección efectiva y permanente.

II.–INFORME DETALLADO.

Después de que fué sometido a la Comisión el informe preliminar unido fechado en diciembre de 1928, se han efectuado los trabajos de localización del tramo del Río comprendido entre las Ciudades de Juárez-El Paso y el Cañón de Cajoncitos. Estos trabajos han proporcionado datos topográficos adicionales que, en gran parte, sirven de base al presente informe.

Minute No. 129 of International Boundary Commission—Contd.

1.—DESCRIPTION.

(a) The Rio Grande is a sediment bearing stream and as such is constantly building up its bed, and would from this cause, in time of flood, change its channel to a lower location where it would again start building up its bed and repeat. the cycle at some future flood stage. This phase of changing channel has been largely prevented thru El Paso-Juarez Valley by the construction of artificial works, such as railroad and road grades, canal and drain banks, and in late years, levees. Under these conditions the river bed has been continuously elevated. The Elephant Butte Dam was completed in the year 1916, and as a result of its function of providing an irrigation supply during years of low run-off, it stores the floods, which previous to its construction had passed on down the river. The action of these floods was to scour out the river channel, partly by carrying deposits on thru the valleys and partly by making deposits upon the valley floor whenever bank overflow stage was reached. The absence, since the completion of Elephant Butte Dam, of large scouring floods has changed the characteristics of the river channel thru the El Paso-Juarez Valley. Although large floods have been controlled behind the Elephant Butte Dam, smaller floods from the run-off area lying between Elephant Butte and El Paso-Juarez are of annual occurrence. These usually occur during the rainy season, that is, in August and September, and are generally flashy in character, the peak lasting only a few hours, and would pass harmlessly thru the valley were it not for the elevated bed.

1.—DESCRIPCION.

(a) El Río Bravo (Grande), es una corriente de carácter sedimentario y por lo tanto sobre-eleva continuamente su lecho, lo que da lugar a que en épocas de crecientes cambie de cauce pasando a localizaciones más bajas, donde vuelve a sobre-elevar su lecho, repitiéndose indefinidamente este proceso. Esta fase de cambios de cauce, ha sido en gran parte prevenida, a través del Valle de Juárez-El Paso, por la construcción de obras artificiales como terraplenes de ferrocarriles y de caminos, bordos de canales de riego y drenaje y, en los últimos años, diques de protección contra inundaciones. En estas circunstancias el lecho del Río ha continuado sobre-elevándose. La Presa del Elefante terminada el año de 1916, al llenar su objeto, que consiste en asegurar una dotación permanente para el riego de terrenos durante los años de poca precipitación, almacena las crecientes que, antes de su construcción, pasaban Río abajo. El efecto de estas crecientes era socavar el cauce del Río, arrastrando parte de los azolves y depositando otra parte sobre los terrenos adyacentes al desbordarse la corriente. La carencia de fuertes crecientes erosivas después de la terminación de la Presa del Elefante, marcó el cambio del régimen de la corriente en el Valle de Juárez-El Paso. A pesar de que las grandes avenidas se almacenan en el vaso del Elefante, anualmente ocurren crecientes más pequeñas que provienen de la cuenca tributaria del Río entre el Elefante y Juárez-El Paso. Estas últimas crecientes se presentan durante la estación de lluvias, generalmente en los meses de agosto y septiembre; son repentinas y de poca duración y pasarían a través del Valle sin causar daños si no fuese por la posición elevada del cauce del Río con respecto a los terrenos adyacentes.

(b) With the first release of clear water from Elephant Butte, a limited scouring of the river channel began immediately below the dam. The clear water picked up the finer particles of silt and sand and carried them downstream. This effect has reached some forty miles (64 kilometers) below Elephant Butte, and might eventually reach El Paso-Juarez and degrade the river thru the El Paso-Juarez Valley, were it not for the annual increment of sand, gravel and silt brought into the river channel from the many side arroyos which debouch into the stream along its course between the dam and El Paso-Juarez. Even this annual increment of sand might be carried on were it not for the need of diverting the flow onto lands for irrigation. Three diversions are made above El Paso, one each at Percha, the Leasburg, and the Mesilla Dams. The main diversions in the El Paso Valley are at the International Dam, where lands of both countries are served, and at the Riverside and Tornillo headings, where supplementary diversions to American lands are made. At each of these diversions sand skimming and canal sluicing devices are used so that a great percentage of the sand and silt is returned to the river bed, while a great percentage of the water is diverted for the irrigation of the lands. This process continuously returns the sand to the river bed while also continuously depleting the volume, and hence the carrying capacity.

(b) Al salir por primera vez de la Presa del Elefante una corriente de agua limpia se inició una socavación restringida del cauce del Río inmediatamente abajo de la Presa. El agua limpia arrastró consigo las partículas más finas de arena y sedimento. Este efecto se ha hecho sentir aproximadamente hasta a 64 kilómetros (40 millas) abajo de la Presa del Elefante y quizás hubiera llegado hasta Juárez y socavado el Río a través del Valle de Juárez-El Paso, si no fuese por el incremento anual de arena, grava y sedimento descargado en el Río por los numerosos arroyos que desembocan en el tramo de su recorrido entre el Elefante y Juárez-El Paso. Quizás hubiese sido posible el acarreo de este incremento de arena, si no existiese la necesidad de derivar para riego una parte del gasto de estiaje. Aguas arriba de El Paso se hacen tres derivaciones, en cada una de las Presas de Percha, Leasburg y Mesilla. Las principales derivaciones en el Valle de Juárez-El Paso, se hacen: en la Presa Internacional, para regar terrenos en ambos países; y en las bocatomas de los canales Riverside y Tornillo para completar el riego de terrenos en Territorio Americano. En las obras de toma de los canales, en cada una de estas derivaciones, se usan dispositivos para desarenarlas y limpiarlas volviéndose al Río una gran parte de la arena y limo depositados en ellas, a la vez que un volumen considerable de agua se deriva para riego de terrenos. Este proceso continuamente devuelve la arena al lecho del Río y disminuye continuamente el gasto de estiaje y, por lo tanto, la capacidad de transporte de la corriente.

2.—CABALLO DAM AND RESERVOIR

(a) The uncontrolled drainage areas which lie between Elephant Butte and El Paso-Juarez total about eight thousand (8,000) square miles (20,700 square kilometers). Large parts of this area

2.—PRESA Y VASO DE CABALLO.

(a) La superficie no controlada de la cuenca del Río entre el Elefante y Juárez-El Paso, tiene aproximadamente 20.700 kilómetros cuadrados (8.000 millas cuadradas). Una gran parte de

have dead drainage with no direct outlet into the Rio Grande. About two thousand three hundred (2300) square miles (6,000 square kilometers) drain directly into the river, of which some one thousand two hundred (1200) square miles (3100 square kilometers) are above and would be controlled by a dam constructed at the Caballo site.

(b) This damsite is located in Sierra County, New Mexico on the Rio Grande about twenty-two (22) miles (35 kilometers) below Elephant Butte Dam. Studies of the Caballo Dam and the resulting reservoir have been made by the Bureau of Reclamation, Department of the Interior, United States Government, in conjunction with the proposed water power development at Elephant Butte. These studies were begun in the year 1924 and included the surveying of the site, the testing of the foundation, the design and cost estimates of structures of various heights, and the effect on water supply and flood control. Two reports were written by the United States Bureau of Reclamation engineers, covering this dam and related features, one dated December 15, 1924, and the other April 1925.

3.—RIVER DISCHARGE AT EL PASO-JUAREZ

(a) Floods at El Paso-Juarez occurring since the completion of Elephant Butte Dam have been built up from the run-off of the area between Elephant Butte and El Paso-Juarez, supplemented by the concurrent irrigation discharge from the reservoir. There is a possibility that such floods would be increased at such times when the reservoir was full and water passing over the spillway.

esta área la forman cuencas cerradas que carecen de salida directa al Río Bravo (Grande).—De los 6000 kilómetros cuadrados (2300 millas cuadradas) que aproximadamente son tributarios directos del Río, 3.100 kilómetros cuadrados (1.200 millas cuadradas), quedan arriba del lugar denominado Caballo y el escurrimiento de esta última área podría controlarse por una presa que se construyera en dicho sitio.

(b) La boquilla de "Caballo" está en el Río Grande, en el Condado de Sierra, del Estado de Nuevo México, aproximadamente a 35 kilómetros (22 millas) abajo de la Presa del Elefante. Como parte del estudio del proyecto de desarrollo de fuerza motriz en la Presa del Elefante, el "Bureau of Reclamation", dependiente del Departamento del Interior de los Estados Unidos, hizo los estudios de la Presa y Vaso de Caballo. Estos estudios se iniciaron el año de 1924 e incluyeron los trabajos de topografía del vaso, los experimentos del terreno de cimentación, y proyectos y presupuestos para estructuras de diversas alturas, considerando sus efectos sobre el abastecimiento de agua y retención de la misma para fines de protección contra inundaciones. Los Ingenieros de la Oficina del "Reclamation" prepararon dos informes acerca del proyecto de esta Presa, fechados, uno el 15 de diciembre de 1924 y el otro en abril de 1925.

3.—GASTOS DEL RIO EN JUAREZ-EL PASO

(a) Las crecientes que han pasado enfrente de Juárez-El paso, después de la construcción de la Presa del Elefante, han provenido de precipitaciones en la cuenca tributaria del Río Grande entre el Elefante y El Paso, que se han sumado a la dotación para riego que proviene del vaso del Elefante. Estas crecientes hubieran sido mayores si el receptáculo se hubiera encontrado lleno y el agua estuviera derramándose por el Vertedor de Demasías.

4.—PROBABLE SPILL AT ELEPHANT BUTTE DAM.

(a) An estimate of the probable spill at Elephant Butte Dam has been made from a study of the spills as shown in the report of the Denver office of the Bureau of Reclamation, dated March 10, 1928 and entitled "Review of Quinton, Code and Hill Reports on Elephant Butte Power Development of July 2, 1927 and September 30, 1927". This review sets up the following assumptions:

1.—Irrigation storage is to be carried to elevation 4401, leaving six feet (1.83 meters), or the elevation 4407, for flood control storage. This six feet (1.83 meters) will store two hundred thirty-nine thousand (239,000) acre feet (294.806,000 cubic meters). Additional flood control storage of about one hundred thousand (100,000) acre feet (123.350,000 cubic meters) is available to elevation 4410, at which height a discharge of about four thousand five hundred (4,500) second feet (128 cubic meters per second) will be passing over the spillway crest.

2.—Irrigation demand is to be limited to seven hundred thousand (700,000) acre feet (863.450.000 cubic meters) annually when on June 30th of any year the reservoir content is less than one million five hundred thousand (1.500,000) acre feet (1.850,250,000 cubic meters). Irrigation demand is to be limited to seven hundred eighty-seven thousand (787,000) acre feet (970.764,000 cubic meters) annually when on June 30th of any year the reservoir content is more than one million five hundred thousand (1.500,000) acre feet (1.850,250,000 cubic meters).

3.—Reservoir capacity depletion thru silt deposit is at the average rate of twenty thousand (20,000) acre feet (26.670,000 cubic meters) per year.

4.—PROBABLES DEMASIAS DE LA PRESA DEL ELEFANTE.

(a) En un estudio hecho por la Oficina de Denver del "Bureau of Reclamation" fechado el 10 de marzo de 1928 y titulado "Review of Quinton, Code and Hill Reports on Elephant Power Development of July 2, 1927 and September 30, 1927" se hace la estimación de las probables Demasías de la Presa del Elefante. Este estudio establece los siguientes supuestos:

1.—El almacenamiento para riego debe limitarse hasta la cota 4401, dejando 1.83 Mts. (6 pies), o hasta la cota 4407, para almacenamiento de protección contra inundaciones. En esta altura de 1.83 Mts. (6 pies) se almacenará un volumen de 294.806,000 metros cúbicos (239,000 acres pies). Puede obtenerse un almacenamiento adicional para protección contra inundaciones con volumen aproximado de 123.350,000 metros cúbicos (100,000 acres pies) hasta la cota 4410, altura a la cual escurrirá sobre la Cresta del Vertedor de Demasías un gasto de 128 metros cúbicos por segundo (4500 pies cúbicos por segundo).

2.—El volumen necesario para cubrir las necesidades del riego debe limitarse a 863.450,000 metros cúbicos (700,000 acres pies) anualmente, cuando el contenido del receptáculo el 30 de junio de un año cualquiera sea menor de 1.850,250,000 metros cúbicos, (1.500,000 acres pies). El volumen para riego debe limitarse a 970.764,000 metros cúbicos (787,000 acres pies) anuales, cuando el contenido del receptáculo el 30 de junio de un año cualquiera, exceda de 1.850.250,000 metros cúbicos (1.500,000 acres pies).

3.—La diminución de la capacidad del vaso por azolve se estima a razón de 24.670,000 metros cúbicos (20,000 acres pies) al año.

Minute No. 129 of International Boundary Commission—Contd.

4.–San Marcial, New Mexico inflow records are corrected for changed conditions above.

5.–The cycle of inflow, with the corrections, will repeat using the year 1898 as equal to 1930; the reservoir was full on January 1, 1898, and the irrigation storage capacity had been depleted by silt inflow to two million one hundred thousand (2.100,000) acre feet, (2.580,350,000 cubic meters) on that date.

(b) These assumed conditions required the theoretical use of flood storage in the years 1930, 1937, 1944, 1948, 1953, 1954, and 1956, with the maximum requirements coming in 1956. If a flow of four thousand five hundred (4500) second feet (128 cubic meters per second) was started in 1956 at the time the water reached elevation 4401 or the limit of irrigation storage a flow over the spillway of 4500 second feet (128 cubic meters) would have been just reached at the end of the flood. This condition occurs but once in the assumed cycle of thirty years and spill has not been necessary during the fifteen years of actual reservoir operation 1915–1930. Therefore, it seems safe to assume that the probable spill from Elephant Butte Dam will not at any time be more than six thousand (6,000) second feet (171 cubic meters per second).

4.–Los registros de gastos de entrada en San Marcial, Nuevo México, han sido corregidos de acuerdo con el cambio de las condiciones arriba de este punto.

5.–El ciclo de gasto de entrada, con sus correciones, se repetirá considerando el año de 1898 igual al de 1930; considerando el vaso lleno en el primero de enero de 1898, y su capacidad de almacenamiento en esa fecha, reducida por causa del azolve, a 2.580.350,-000 metros cúbicos (2.100,000 acres pies).

(b) Estas condiciones que se han supuesto, exigieron el uso teórico del almacenamiento de protección contra inundaciones, en los años de 1930, 1937, 1944, 1948, 1953, 1954 y 1956, correspondiendo las exigencias máximas al año de 1956. En este año de 1956 el máximo de demasías al final de una creciente cualquiera no excederá de 128 metros cúbicos (4500 pies cúbicos) por segundo, siempre que desde que el almacenamiento para riegos llegue a su altura máxima, cota 4401, se deje salir por las compuertas de la Presa un gasto de 128 metros cúbicos (4500 pies) por segundo y éste se regule hasta suprimirlo cuando el derrame por el vertedor de demasías llegue a su máximo de 128 metros cúbicos (4.500 pies) cúbicos por segundo. Esto no ocurre sino una vez en el ciclo de 30 años considerado; y durante los 15 años de funcionamiento del vaso, de 1915 a 1930, no ha habido derrames por el vertedor de demasías. En consecuencia, se cree quedar del lado de la seguridad, suponiendo un gasto probable de Demasías de la Presa del Elefante de 170 metros cúbicos (6.000 pies cúbicos) por segundo.

5.–PROBABLE FLOODS AT EL PASO-JUAREZ.

(a) The largest flood at El Paso-Juarez since the building of Elephant Butte Dam occured[1] on September 1, 1925 when a peak of thirteen thousand five hundred

5.–GASTO PROBABLE DE CRECIENTES FRENTE DE JUAREZ-EL PASO.

(a) La mayor creciente frente a Juárez-El Paso, después de la construcción de la Presa del Elefante, se presentó el 1o. de Septiembre de 1925, habiendo alcan-

(13,500) second feet (382 cubic meters per second) passed the gaging station at Courchesne. This flood resulted from heavy rainfall in the Black Range between Elephant Butte and Leasburg, on top of a flow of two thousand (2000) second feet (57 cubic meters per second) already released from the reservoir. If a spill of six thousand (6000) second feet (170 cubic meters per second) was occuring[1] at the time of this flood, a peak of about eighteen thousand (18,000) second feet (510 cubic meters per second) would have occurred at El Paso-Juarez. If the Caballo Dam and reservoir had been available at the time of this flood, and if the six thousand (6000) second feet (170 cubic meters per second of spill was occurring at Elephant Butte, prior information of rain on the tributaries would have permitted the closing of the Caballo gates before the flow of the tributaries could have reached the Rio Grande, and the resulting peak at El Paso-Juarez could have been reduced to between ten thousand (10,000) and eleven thousand (11,000) second feet (283 and 314 cubic meters per second). The Caballo reservoir, by controlling one-half of the direct drainage area, and by acting as a temporary check on the spills from Elephant Butte Dam will reduce by almost one-half the probable peak at El Paso-Juarez.

6.—DRAINAGE AREA IN EL PASO-JUAREZ VALLEY.

At El Paso-Juarez

(a) The Arroyo Colorado empties into the river immediately above the city of Juarez, Chihuahua, Mexico. This arroyo has been estimated to have had a peak flood of some three thousand (3,000) second feet (85 cubic

zado un gasto máximo de 382 metros cúbicos (13.500 pies cúbicos) por segundo en la Estación de Aforos de Courchesne. Esta creciente fué el resultado de fuertes precipitaciones en la región de "Black Range" entre el Elefante y Leasburg que llegaron al Río cuando éste llevaba un gasto de 57 metros cúbicos (2000 pies cúbicos) por segundo que habían salido del vaso del Elefante. Si al llegar esta creciente hubiese estado pasando por el vertedor de demasías de la Presa un gasto de 170 metros cúbicos (6.000 pies cúbicos) por segundo, la creciente frente a Juárez-El Paso habría llegado a un máximo de 510 metros cúbicos (18.000 pies cúbicos) por segundo. Si en la época de esta creciente hubieran existido la presa y el vaso de Caballo, y si a la vez hubiesen estado derramando los 170 metros cúbicos (6.000 pies cúbicos) por segundo de Demasías de la Presa del Elefante, el aviso previo de lluvias sobre los arroyos tributarios, habría permitido cerrar las compuertas en Caballo antes de que la creciente de los arroyos llegara al Río Grande; lo que habría permitido reducir el máximo de creciente en Juárez-El Paso hasta un gasto entre 283 y 314 metros cúbicos (10.000 y 11.000 pies cúbicos) por segundo. Como el vaso de Caballo controlará la mitad del área directamente tributaria del Río Grande abajo del Elefante, al retener temporalmente el volumen de Demasías de dicha Presa del Elefante, reducirá casi a la mitad el máximo de crecientes frente a Juárez-El Paso.

6.—AREA TRIBUTARIA DEL RIO EN EL VALLE DE JUAREZ-EL PASO.

(a) *Frente a Juárez-El Paso.*

El Arroyo Colorado desemboca en el Río inmediatamente arriba de Ciudad Juárez, Chihuahua, México. Se considera que las crecientes de este arroyo han llegado a 85 metros cúbicos (3.000 pies cúbicos) por segundo. Hay

Minute No. 129 of International Boundary Commission—Contd.

meters per second). Other smaller arroyos empty into the river directly above the International Dam. Their drainage areas are small, and their discharge, together with that of the Arroyo Colorado, cannot increase the peak floods in the Rio Grande except in the improbable event of their occurrence simultaneously with the peak flow past El Paso-Juarez. Additional freeboard has been allowed in the design to take care of this improbable occurrence.

Below El Paso-Juarez

(b) Practically no direct discharge of side drainage occurs below El Paso-Juarez until the Arroyo Alamo in Hudspeth County is reached. Below this point three large arroyos and many small ones empty directly into the river. The total drainage area on the American side between the Arroyo Alamo and Quitman Canyon is six hundred eighty (680) square miles (1760 square kilometers), of which four hundred ninety (490) square miles (1270 square kilometers) have direct discharge into the river and one hundred ninety (190) square miles (490 square kilometers) are indirectly discharged into the river. The drainage area on the Mexican side is considerably less, although, due to the absence of maps, little detail knowledge is available. However, no arroyos empty directly into the river from the south until considerably below the town of McNary, Texas, and observations of the arroyo channels below this point show that their drainage areas are probably limited and their discharges small.

(c) The three largest arroyos on the American side are: the Alamo, with a drainage area of one hundred forty-five (145) square miles (375 square kilometers); the Diablo, with a drainage area of sixty-two (62) square miles (160 square kilometers); and the Guayuco, with a drainage

otros pequeños arroyos que desembocan en el Río inmediatamente aguas arriba de la Presa Internacional. Sus áreas de drenaje son pequeñas y sus gastos, unidos al del Arroyo Colorado, no pueden aumentar el máximo de crecientes del Río Bravo, sino en el caso improbable de que se presenten simultáneamente con la cresta de las crecientes en frente de Juárez-El Paso. Para tomar en consideración esta simultaneidad poco probable, se ha dado una sobreelevación de seguridad a la corona de los bordos.

(b) *Abajo de Juárez-El Paso.*

Puede decirse que no hay ningún desagüe de arroyos abajo de Juárez-El Paso, sino hasta llegar al Arroyo del Alamo en el Condado de Hudspeth. Abajo de este punto desembocan directamente en el Río tres arroyos grandes y otros muchos pequeños. El área total de drenaje en el lado Americano entre el Arroyo del Alamo y el Cañón de Quitman, es de 1760 kilómetros cuadrados (680 millas cuadradas), de los cuales 1270 kilómetros cuadrados (490 millas cuadradas), descargan directamente en el Río y 490 kilómetros (190 millas) cuadrados descargan indirectamente en la corriente. El área de drenaje en el lado Mexicano es mucho menor, sin que se conozca en detalle por la carencia de planos de esta región. Sin embargo, no hay arroyos que, del Sur, entren directamente al Río, sino hasta muy abajo de la población de McNary, Texas, pudiendo deducirse de la inspección de los cauces de los arroyos abajo de este lugar, que sus áreas de drenaje son probablemente limitadas y sus gastos pequeños.

(c) Los tres arroyos más grandes en el lado Americano, son: el del Alamo, con una área de drenaje de 375 kilómetros cuadrados (145 millas cuadradas); el del Diablo, con una área de drenaje de 160 kilómetros cuadrados (62 millas cuadradas); y el del Guayuco, con una área de drenaje de

area of one hundred sixty-five (165) square miles (427 square kilometers). The Alamo and the Guayuco have been known to discharge in excess of five thousand (5,000) second feet (142 cubic meters per second), and hearsay information gives probable peaks of twice that amount. If such flows should occur at the time the peak of a flood from upper river sources was passing, doubtless the designed channel would be overtaxed. Some additional safety has been provided by increasing the freeboard a short distance above and below these arroyos. However, as these arroyos empty into the river channel well below most of the area to be protected, it will be uneconomical to make any large expenditures against unlikely possibilities.

(d) The discharge from these arroyos must be taken into the channel and the location has been made at some distance from the present arroyo mouths to permit, in a measure, the deposit of detritus before the flows reach the channel.

7.—THE RIVER ABOVE EL PASO-JUAREZ

(a) The distance by the river between Elephant Butte and El Paso-Juarez is about one hundred fifty (150) miles (241 kilometers), and the valley axial distance is about one hundred twenty (120) miles (193 kilometers). Immediately below the dam the river passes thru fifteen miles (24 kilometers) of canyon where the fall varies from .00037 (1.94 feet per mile) to .00080 (4.26 feet per mile) then thru the Palomas Valley for thirteen miles (21 kilometers) with a fall of .00080 (4.26 feet per mile), then thru three miles (5 kilometers) of canyon where the Caballo damsite is located, then thru the Rincon Valley, the first seven miles (11 kilometers) of which have an average fall of .00074 (3.93 feet per mile), and

427 kilómetros cuadrados (165 millas cuadradas). Se sabe que los gastos de los arroyos del Alamo y del Guayuco han excedido de 142 metros cúbicos (5000 pies cúbicos) por segundo y se dice que el máximo puede ser del doble. Si estas crecientes ocurrieran al pasar la cresta de la avenida proveniente de la parte alta del Río, el canal proyectado indudablemente resultaría sobrecargado. Se ha previsto un margen de seguridad adicional, sobre elevando la corona de los bordos en cortos tramos inmediatamente arriba y abajo de estos arroyos. Sin embargo, puesto que los arroyos de que se trata desembocan en el Río bastante abajo de la mayor parte del área por proteger, se considera anti-económico hacer una fuerte erogación para precaverse contra estas contingencias poco probables.

(d) Como la corriente de estos arroyos debe admitirse dentro del cauce del Río, éste se ha localizado a alguna distancia de la desembocadura actual de los arroyos, a fin de permitir en cierto modo el depósito de detritus antes de que la corriente de dichos arroyos llegue al cauce del Río.

7.—EL RIO ARRIBA DE JUAREZ-EL PASO.

(a) La distancia entre la Presa del Elefante y Juárez-El Paso es de cerca de 241 kilómetros (150 millas) a lo largo del Río, mientras que la distancia por el eje de los Valles es de 193 kilómetros (120 millas). Inmediatamente abajo de la Presa, el Río pasa por un cañón de 24 kilómetros (15 millas) de longitud, con una pendiente que varía entre 0.00037 y 0.00080 (de 1.94 a 4.26 pies por milla); recorre después el Valle de Palomas, con un desarrollo de 21 kilómetros (13 millas) y una pendiente de 0.00080 (4.26 pies por milla); sigue por un cañón de 5 kilómetros de longitud (3 millas) en el que está situada la Boquilla de Caballo; y pasa el Valle de Rincón, en el que la pendiente es de 0.00074, (3.93 pies por milla)

Minute No. 129 of International Boundary Commission—Contd.

the last fourteen miles (22 kilometers) a fall of .00064 (3.40 feet per mile). The river then traverses seven miles (11 kilometers) known as the Selden Canyon, where the average fall is .00064 (3.4 feet per mile), and then reaches the Leasburg Dam which is at the head of the Mesilla Valley. From Leasburg Dam to Mesilla Dam, a distance of twenty four miles (39 kilometers), the river has a fall of .00073 (3.84 feet per mile). From Mesilla Dam to Canutillo Bridge, a distance of twenty-eight miles (45 kilometers) the river has a fall of .00070 (3.67 feet per mile), and from the Canutillo Bridge to the International Dam, some nineteen miles (30 kilometers) the river has a fall of .00048 (2.53 feet per mile).

(b) As previously stated, the effect of the release of clear water from Elephant Butte Dam has been to degrade the river bed in the upper reaches immediately below the dam, and to build it up thru the El Paso-Juarez Valley. There is necessarily a stretch of river between these two actions which is quiescent, where neither degradation nor building up is going on. Studies of river sections indicate that the river bed thru the lower Mesilla Valley rests in this state.

8.—THE RIVER BELOW EL PASO-JUAREZ

(a) The length of the channel of the river between El Paso-Juarez and the Quitman Canyon is about one hundred fifity[1]-five (155) miles (250 kilometers) while the length measured along the valley axis is eighty-five (85) miles (137 kilometers). The fall of the river is about .00034 (1.82 feet per mile) while the fall of the valley is .00061 (3.20 feet per mile). It is thus seen that if the alignment of the river can be straightened a fall of approximately .00061 (3.2 feet per mile)

[1]So in original.

en los primeros once kilómetros (7 millas) y de 0.00064 (3.40 pies por milla) en los últimos 22 kilómetros (14 millas). El Río atraviesa en seguida el cañón Selden de 11 kilómetros de longitud (7 millas) con una pendiente media de 0.00064 (3.40 pies por milla) y llega a la presa de Leasburg, situada en la parte alta del Valle de Mesilla. Desde la Presa de Leasburg hasta la de Mesilla, el Río tiene 39 kilómetros de longitud (24 millas) con una pendiente de 0.00073 (3.84 pies por milla). Desde la Presa de Mesilla hasta el Puente de Canutillo, la longitud del Río es de 45 kilómetros (28 millas) con una pendiente de 0.00070 (3.67 pies por milla), y desde el Puente de Canutillo hasta la Presa Internacional, la longitud es de 30 kilómetros (19 millas) y la pendiente de 0.00048 (2.53 pies por milla).

(b) Como se ha dicho antes, el efecto de la salida de agua clara de la Presa del Elefante ha sido el de socavar el lecho del Río en la región inmediatamente abajo de la Presa, y azolvarlo en el Valle de Juárez-El Paso. Debe existir forzosamente un tramo del Río en el que estas dos acciones se equilibran, y en el que, por lo tanto, no se verifica ni socavación ni azolve. Estas condiciones existen en la parte baja del Valle de Mesilla, según lo demuestra el estudio de las secciones del Río.

8.—EL RIO ABAJO DE JUAREZ-EL PASO.

(a) La longitud aproximada del cauce del Río entre Juárez-El Paso y el cañón de Quitman es de 250 kilómetros (155 millas), mientras que la distancia medida a lo largo del eje del Valle es de 137 kilómetros (85 millas). La pendiente del Río es aproximadamente de 0.00034 (1.82 pies por milla), en tanto que la pendiente del Valle es de 0.00061 (3.20 pies por milla). Por lo tanto se ve que si se endereza el alineamiento del Río, puede obtenerse una pendiente aproximada de 0.00061,

can be obtained. It will be noted that this fall is in excess of that in the last stretch of the Mesilla Valley, or between Canutillo Bridge and the International Dam, where a fall of .00048 (2.53 feet per mile) was indicated and that this fall of .00061 (3.2 feet per mile) is somewhat under that of .00070 (3.67 feet per mile) for the upper part of the Mesilla Valley. If the lower stretch of the river in the Mesilla Valley is in equilibrium, that is, shows neither scour nor fill, with a gradient of .00048 (2.53 feet per mile) the river thru the El Paso-Juarez Valley must have a greater gradient to reach the same state of equilibrium since the quantities of water normally carried are greatly reduced at the International Dam

III.–PROPOSED PLAN

(a) The treatment to be given the river thru the valley to increase the fall from .00034 (1.82 feet per mile) to .00061 (3.2 feet per mile), in order to accelerate the velocity and to let the current of the river carry along the burden of sand and sediment, which has caused the rapid river bottom rising, so marked since the construction of the Elephant Butte Dam, consists of a general straightening following the present channel of the river wherever possible, and cutting across the bends where necessary to decrease length. Along each side of the new channel, and also along each side of the present river where followed, levees will be built of sufficient height and far enough apart to pass the floods. The channel thus created will always be kept clear of brush and other obstructions which might retard the flow. In the alignment, due consideration has been given to the general principle of the compensation of the artificially segregated areas, in order to equalize

(3.20 pies por milla). Esta pendiente es mayor que la del tramo inferior del Valle de Mesilla y que la del tramo entre el Puente de Canutillo y la Presa Internacional, puesto que la pendiente en este ultimo tramo es de 0.00048 (2.53 pies por milla); en cambio, dicha pendiente de 0.00061 (3.20 pies por milla) es ligeramente inferior a la pendiente del tramo superior del Valle de Mesilla, que es de 0.00070 (3.67 pies por milla). Ahora bien, si con una pendiente de 0.00048 (2.53 pies por milla) el Río está en equilibrio en el tramo inferior del Valle de Mesilla, puesto que no hay ni socavación ni azolve, debe darse al Río mayor pendiente en el Valle de Juárez-El Paso para llegar a alcanzar el mismo estado de equilibrio, ya que la cantidad de agua que escurre normalmente se reduce mucho en la Presa Internacional.

III.–PROYECTO

(a) A fin de aumentar la pendiente del Río en el Valle de Juárez-El Paso de 0.00034 (1.82 pies por milla) a 0.00061 (3.20 pies por milla) y acelerar la velocidad de la corriente de modo que ésta pueda acarrear el azolve que ha determinado el ascenso rápido del fondo del Río, tan marcado desde la construcción de la Presa del Elefante, se proyecta modificar el Río enderezándolo en lo general, siguiendo el cauce actual en donde sea posible, y cortando las vueltas cuando sea necesario, a fin de disminuir la longitud. A cada lado del cauce nuevo y a los lados del cauce actual del Río en donde se siga éste, se construirán diques de altura suficiente y a distancia conveniente para permitir el paso de las avenidas. El cauce así formado se conservará siempre libre de yerbas y obstrucciones que pudieran retardar el escurrimiento. Al hacer el trazo se ha atendido como principio fundamental a igualar las áreas que se segreguen artificialmente, a fin de que la extensión total que

the areas which will be cut from one country with those which will be cut from the other.

(b) This treatment brings about the result that the right-of-way to be acquired by each nation will balance practically in area. In general, the water-way proposed will consist of a normal channel of similar size and capacity to the present river bed, with levees set back with a total distance of about five hundred ninety (590) feet (180 meters) between them. Levees will be wide enough on top to permit travel for inspection and repair. The alignment has been so chosen as to avoid as far as possible all highly improved and cultivated areas, but at many places this was impracticable due to the meanderings of the river channel.

(c) The above plan of shortening the river by cut-offs is feasible in this case because Elephant Butte Dam, in conjunction with the proposed Caballo Dam and reservoir, will give practically complete control of the floods. Consequently the river thru the El Paso-Juarez Valley will take on more the nature of a large central drain or canal than a river.

IV.–BASIS OF ESTIMATE.

1.–*Cost of Caballo Reservoir*

(a) The cost of the Caballo Dam, including the purchase of the lands to be submerged, has been estimated by the Bureau of Reclamation at about one million two hundred fifty thousand dollars ($1,250.000) for the one hundred thousand (100,000) acre feet (123,350,000 cubic meters) capacity.

(b) The volume of water passing the Caballo Damsite during the flood of September 1925 was in the neighborhood of twenty-five thousand (25,000) acre feet (30,837,000 cubic meters). Storage in excess of this amount must be

se corte de un país, sea igual a la que se corte del otro.

(b) El trazo hecho de acuerdo con este principio, dá lugar a que las zonas de derecho de vía que debe adquirir cada nación sean prácticamente iguales en extensión. En términos generales, el cauce artificial proyectado consistirá de un cauce de estiaje de dimensiones y capacidad semejantes a las del actual lecho menor del Río y de un cauce mayor limitado en ambos lados por diques distantes como 180 metros (590 pies) uno de otro. Estos diques tendrán un ancho en corona bastante para permitir el tráfico para fines de inspección y reparación. El trazo se ha hecho procurando, en lo posible, no cruzar terrenos cultivados o con mejoras; pero en algunos lugares ésto ha sido impracticable debido a las sinuosidades del Río.

(c) El proyecto de acortamiento del Río por cortes artificiales es factible porque el efecto combinado de las Presas del Elefante y de Caballo, será el de controlar casi por completo las crecientes, y en consecuencia el Río adquirirá más bien los carácteres de un gran canal central en el Valle de Juárez-El Paso.

IV.–BASES PARA EL PRESUPUESTO

1.–*Costo de la Presa de Caballo.*

(a) El costo de la Presa de Caballo, incluyendo la adquisición de los terrenos que resulten inundados, ha sido estimado por el "Bureau of Reclamation" en cerca de un millón doscientos cincuenta mil dólares para un almacenamiento de 123.350,000 metros cúbicos (100.000 acres pies).

(b) El volumen de agua que pasó por el sitio de la Presa de Caballo durante la creciente de Septiembre de 1925 fué alrededor de 30.837,000 metros cúbicos (25.000 acres pies). El vaso debe tener capacidad mayor, pa-

provided to take care of possible larger floods and silt depletion. Provision must also be made to store the probable spill from Elephant Butte during times of flood run-off below the dam. Fifty thousand (50,000) acre feet (61,675,000 cubic meters) are allowed for this item and would probably store three or four days' spill. This would permit the floods entering below Caballo to have receded.

(c) Of the total proposed storage of one hundred thousand (100,000) acre feet (123.350,000 cubic meters) approximately fifty thousand (50,000) acre feet (61,675,000 cubic meters) are allowed for flood storage and silt depletion, and fifty thousand (50,000) acre feet (61,675,000 cubic meters) for the control of spill from Elephant Butte.

2.–*Segregated Tracts.*

(a) In order that neither nation shall sacrifice national area, it is required that the total land to be segregated or cut off from one country shall equal that to be segregated or cut off from the other. On the attached maps these tracts and their total areas have been shown. Fifty-nine (59) separate tracts will be cut from Mexico and sixty-five (65) separate tracts will be cut from the United States. Their areas vary from 0.10 hectares (.25 acre) to 151 hectares (377 acres). The approximate total area to be cut from Mexico is one thousand four hundred (1400) hectares (3460 acres) and the approximate total area to be cut from the United States is one thousand four hundred (1400) hectares (3460 acres).

3.–*San Elizario Island.*

(a) Two alternate routes for the location of the rectified channel along the San Elizario Island are shown on Exhibit No. 2. One

ra recibir azolves y crecientes más grandes que pueden ocurrir. Debe también preverse una capacidad suficiente para retener las demasías probables de la Presa del Elefante durante la época de crecientes abajo de la Presa, habiéndose destinado a este fin un volumen de 61.675,000 metros cúbicos (50.000 acres pies), que corresponde al derrame de la Presa del Elefante durante tres o cuatro días. De esta manera se dará tiempo a que bajen las crecientes abajo de Caballo, antes de que sea necesario dejar salir agua de esta Presa.

(c) Del almacenamiento total proyectado de 123.350,000 metros cúbicos (100.000 acres pies), la mitad aproximadamente, o sean 61.675,000 metros cúbicos (50.000 acres pies) se destinan al almacenamiento de aguas de creciente y al azolve, y la otra mitad, o sean 61.675,000 metros cúbicos (50.000 acres pies) al control de las demasías del Elefante.

2.–*Terrenos por Segregar.*

(a) A fin de que ninguno de los dos países sufra pérdida de territorio Nacional, se ha establecido como requisito fundamental que la extensión total de terreno que se segregue de un país sea igual a la que se segregue del otro. En los planos adjuntos aparecen estos terrenos por segregar y sus áreas totales, figurando 59 parcelas que deberán segregarse de México y 65 parcelas por segregar de los Estados Unidos, con áreas variables desde 0.10 hectáreas (0.25 acres) hasta 151 hectáreas (377 acres). La extensión total aproximada que se segregará de México es de 1400 hectáras (3460 acres) y la extensión total aproximada que se segregará de los Estados Unidos es también de 1400 hectáras (3460 acres).

3.–*Isla de San Elizario.*

(a) En el anexo No. 2 aparecen a lo largo de la Isla de San Elizario dos trazos para el cauce rectificado, de los cuales uno

Minute No. 129 of International Boundary Commission—Contd.

route follows in a general way the present river while the other follows in a general way the present boundary. The two routes are almost identical in length, and have practically the same gradient and grade elevation.

(b) The river route, by following the present river, is located entirely in the United States and passes thru areas largely undrained and uncultivated, while the boundary route passes largely thru highly cultivated and valuable areas. Therefore the costs of rights-of-way will be less with the river route and no areas will be segregated in the sense of changed national jurisdiction. The alignment possible with the boundary route is considerably better than that of the river route, especially at the lower end of the Island, where a sharp curve is necessary if the river route is used.

(c) The boundary route makes more feasible the carrying thru of irrigation and drainage works needed by Mexico, as the present boundary in places is located practically against the toe of the mesa. On the other hand, the abandonment of the river requires the building in the United States of a feeder canal to reestablish water deliveries to the Tornillo Canal system.

(d) The boundary route is estimated to cost about seventy-five thousand dollars ($75,000) more than the river route, due largely to the higher value of the lands required for the right-of-way and the segregated areas, and to the disestablishment of some of the irrigation and drainage works now constructed in the United Sates of America with the river in its present location. The equalizing of all the segregated tracts and the estimate submitted herewith both are based on following the boundary route along the San Elizario Island.

sigue en general, el cauce actual del Río, y el otro el actual Límite Internacional. Los dos trazos son prácticamente de las mismas longitud, pendiente y elevación.

(b) Como el trazo por el Río sigue el cauce actual de la corriente, queda enteramente en los Estados Unidos y atraviesa terrenos en su mayor parte incultos y sin drenaje, mientras que el trazo por el Límite Internacional cruza terrenos cultivados y valiosos. Por lo tanto, el costo del derecho de vía será menor si se sigue el trazo por el Río, y no habrá cambios de jurisdicción nacional en los terrenos por segregar. El trazo por el Límite Internacional es notablemente mejor que el trazo por el Río, principalmente en el extremo inferior de la Isla, en donde se requiere una curva pronunciada en caso de seguir el trazo por el Río.

(c) El trazo por el Límite Internacional facilita la ejecución de obras de riego y de drenaje necesarias para México, pues el actual Límite Internacional en varios lugares toca el pie de las lomas. Por otra parte, el abandono del Río, exige la construcción en territorio de Estados Unidos, de un canal para abastecer de agua el actual sistema del canal de Tornillo.

(d) El trazo por el Límite Internacional costará como 75.000 dólares más que el trazo por el Río, principalmente por el mayor valor de los terrenos destinados a derecho de vía y de las parcelas por segregar, y por la inutilización de algunas obras de riego y de drenaje que actualmente existen en esta zona de los Estados Unidos. En el proyecto que se presenta, la compensación de las áreas por segregar y el costo de las obras están estudiados para el trazo por el Límite Internacional en la Isla de San Elizario.

V.-GENERAL.

1.–*Velocities.*

(a) The requirements of the project indicate two important limiting velocities; namely, that the maximum velocity in the flood channel at full flow must not entail expensive bank protection, and that the minimum velocity in the normal flow channel must be high enough to carry the annual increment of sand and silt to prevent channel upbuilding.

(b) The increase in average gradient, which is from .00035 to .00061, or from 1.82 feet per mile to 3.2 feet per mile, and which is brought about by the shortening in the river length, will produce velocities of from five to six feet (1.52 to 1.83 meters) per second at full flow, depending on the cross section and the gradient of the particular section considered.

(c) These velocities can be safely carried in the channel designed for this project where the alignment is reasonably straight and the cross section relatively wide.

(d) The data on normal flow indicates that the low water channel will have a velocity of around three feet (0.91 meters) per second. Experience on the Rio Grande Irrigation Project, in the sluicing of canals in the design of sand skimming devices, has shown that such velocities are capable of carrying the usual sand and silt borne by the Rio Grande.

2.–*Coefficient of Roughness.*

(a) The value of "n" in Kutter's Formula adopted for use on this project is n=.025 for the normal flow channel and n=.030 for the flood channel. These values follow closely those determined on the Miami Conservancy District at Dayton, Ohio, taking such tests as are believed to nearly duplicate the conditions to be encountered on this project. On one particular determination where the channel was covered with weeds, and the flow was

V.-GENERAL.

1.–*Velocidades.*

(a) Las necesidades del proyecto establecen los siguientes límites de velocidad: La velocidad máxima en el cauce mayor a plena capacidad no debe motivar trabajos costosos de protección de los diques, y la velocidad mínima en el cauce de estiaje debe ser suficiente para acarrear el incremento anual de azolve a fin de evitar la elevación del cauce.

(b) El aumento de pendiente media de 0.00035 a 0.00061 (de 1.82 a 3.20 pies por milla), que se obtendrá mediante el acortamiento de la longitud del Río, producirá velocidades a plena capacidad entre 1.52 y 1.83 metros por segundo (5 y 6 pies por segundo), de acuerdo con la sección transversal y la pendiente en el lugar que se considere.

(c) Estas velocidades máximas pueden alcanzarse sin peligro en el cauce que se ha proyectado, en vista de que el trazo está constituido por numerosos tramos rectos y las secciones transversales son relativamente anchas.

(d) Los cálculos hechos para el gasto de estiaje indican que la velocidad en el cauce menor será alrededor de 0.91 metros por segundo (3.0 pies por segundo). Por experiencia se ha visto en el Sistema de Irrigación del Río Grande que esta velocidad tiene capacidad bastante para acarrear los sedimentos que comunmente lleve el Río Bravo.

2.–*Coeficiente de Rugosidad.*

(a) En los cálculos se han adoptado como valores de "n" en la fórmula de Kutter, para el cauce de estiaje n–0.025 y para el cauce mayor n–0.030. Estos valores son semejantes a los que se determinaron experimentalmente en el Distrito de Miami, en Dayton, Ohio, para aquellos casos en que las condiciones eran casi las mismas que las del actual proyecto. En uno de los experimentos, estando el cauce cubierto de yerbas, y siendo el gasto de

Minute No. 129 of International Boundary Commission—Contd.

around twenty-three thousand (23,000) second feet (6520 cubic meters per second) the value of "n" was determined to be .0298, whereas the values for the same channel when free from weeds varied from .023 to .0255.

3.–*Cross-sections*

(a) The cross-sections adopted as best suited to the requirements of the project are shown on the attached Exhibit No. 3. It will be noted that two cross-sections are shown. These are identical except in the placement of the normal flow channel. The one to be used from El Paso-Juarez to the lower end of the San Elizario Island places the normal flow channel in the center while the one to be used from the lower end of the San Elizario Island to the mouth of Quitman Canyon places the normal flow channel adjacent to the left levee. This different treatment of the two sections of the river is required because, in the upper part, the land passed thru in the making of cut-offs is generally low ground lying from only slightly above the proposed river grade to, in some cases, slightly below the proposed grade. Thru this section the amount of material to be excavated from the proposed new channel is small and can be wasted adjacent to the normal flow channel without seriously decreasing flood channel capacities. Throughout the lower section deeper cuts are encountered and spoiling into the flood channel is impracticable. This changed condition is met by placing the normal channel adjacent to the left levee where the material excavated can be placed to form the left levee or can be wasted beyond the flood channel.

(b) The proposed cross-section has levees spaced 180 meters (590 feet) apart with levee heights of

cerca de 652 metros cúbicos por segundo (23.000 pies cúbicos por segundo), se obtuvo para "n" el valor de 0.0298, y en el mismo cauce en el tramo en que se encontraba libre de vegetación, los valores de "n" variaron de 0.023 a 0.0255.

3.–*Secciones Transversales.*

(a) Las secciones transversales adoptadas como más adecuadas para las exigencias de este proyecto, se muestran en el anexo No. 3. Podrá observarse que aparecen dos secciones transversales que difieren sólo en la posición del cauce de estiaje. En la Sección para el tramo comprendido entre Juárez-El Paso y el extremo inferior de la Isla de San Elizario, el cauce de estiaje está colocado en el centro, mientras que en la sección correspondiente al tramo comprendido entre el extremo inferior de la Isla de San Elizario y la entrada del Cañón de Quitman, el cauce de estiaje queda situado junto al dique del lado izquierdo. Esta diferencia en las secciones obedece a que en la parte superior, el terreno en que se harán los cortes es en general bajo, queda un poco más alto que la plantilla del cauce proyectado, y en algunos casos ligeramente más abajo. En este tramo el volumen de material que debera excavarse para formar el cauce menor proyectado, es relativamente pequeño y puede depositarse a los lados del cauce de estiaje sin que por ellos disminuya seriamente la capacidad del cauce mayor. En cambio, en el tramo inferior los cortes son más profundos y no puede hacerse dentro del cauce mayor el depósito del material excavado, por lo que se ha pensado colocar el cauce de estiaje adyacente al dique izquierdo y poder así aprovechar el material excavado en la construcción de este dique o moverlo hasta afuera del cauce mayor.

(b) En las secciones transversales proyectadas, los diques distan 180 metros (590 pies) y su

about 2.2 meters (7.2 feet). In actual construction levee heights will vary from nothing, where bench lands are encountered, to four and a half meters (15 feet) where the old river channel is crossed. The levee section proposed has a five meter (16.4 feet) crown with side slopes of two to one. This will permit the use of the top as a road for inspection and repair.

(c) The normal flow channel is designed with a bottom width of twenty meters (66 feet) as this channel width seems to best fit the present channel width of the river. Side slopes are 1:1 except throughout the lower section where 2:1 slope is proposed on the side adjacent to the left levee.

(d) Gradients vary from .00045 (2.38 feet per mile) to .0008 (4.26 feet per mile) and the levee heights have been changed to conform, always adding 0.6 meters (2 feet) as freeboard.

(e) The estimated capacity below the 0.6 meters (2 feet) freeboard varies from ten thousand seven hundred (10,700) second feet (3,030 cubic meters per second) to eleven thousand five hundred (11,500) second feet (3,260 cubic meters per second).

4.–*Right-of-way.*

(a) The total right-of-way required is eight thousand one hundred sixty (8,160) acres (3,300 hectares). This is equally divided between the two countries to Mexico four thousand eighty (4,080) acres (1650 hectares) and to the United States four thousand eighty (4,080) acres (1650 hectares). In addition to the land actually occupied by the works, a strip fifteen meters (49 feet) wide outside the land tow of each levee has been included for use in levee maintenance or possible future levee widening.

altura media es de 2.25 metros (7.2 pies). En la práctica, las alturas de los diques variarán desde cero, en donde haya terreno alto, hasta 4.5 metros (15 pies) en los cruzamientos del cauce viejo del Río. Según el proyecto, la sección de los diques tiene 5 metros en la corona (16.4 pies), con taludes de dos por uno. En estas condiciones se podrán usar las coronas como camino para fines de inspección y reparación.

(c) El cauce de estiaje proyectado tiene un ancho en el fondo de 20 metros (66 pies), que es el que parece concordar mejor con el del cauce actual del Río. Los taludes son de uno por uno, y solamente en el tramo inferior se proyecta un talud de dos por uno en el lado adyacente al dique izquierdo.

(d) Las pendientes varían desde 0.00045 hasta 0.00080 (2.37 a 4.26 pies por milla) y las alturas de los diques se han ajustado a la pendiente del cauce, aumentando siempre una altura de 0.60 metros (2 pies) como margen de seguridad.

(e) La capacidad calculada para el cauce hasta una altura de 0.60 metros (2 pies) abajo de la corona de los diques, varía entre 3030 y 3260 metros cúbicos por segundo (10.700 y 11.500 pies cúbicos por segundo).

4.–*Derecho de Vía.*

(a) La extensión total necesaria de terreno para derecho de vía es de 3.300 hectáras (8160 acres), repartida por mitad entre los dos países, correspondiendo a México 1650 hectáras (4080 acres) y a los Estados Unidos 1650 hectáras (4080 acres). El derecho de vía incluye, además del terreno ocupado por las obras, una faja de 15 metros (49 pies) de ancho contada desde el pie del talud del lado de tierra de cada dique, y que se destina a la conservación o a la ampliación futura de los diques.

Minute No. 129 of International Boundary Commission—Contd.

5.–*Clearing.*

(a) The area to be cleared is estimated as seventy per cent of the total area required for the right-of-way. A part of the right-of-way is now cleared and in cultivation, and in addition a considerable part is now occupied by the present river. Unit cost is sixty-two dollars fifty cents per hectare, or about twenty-five dollars per acre. The work to be done consists of brush cutting, some grubbing, and the plowing of the area between the borrow pits and the normal channel.

6.–*Earthwork.*

(a) All earthwork of both channel excavation and levee embankment is planned to be accomplished by machine methods, and the unit cost used in the estimates is eighteen cents per cubic meter which is about that developed on similar work in that locality. The machines best suited to the work are draglines equipped with one hundred foot booms, with buckets from two to three cubic yards in capacity, although on a great part of the levee work smaller equipment can be used economically. Proper provision has been made in the unit cost for full machine upkeep and depreciation, and for the hazards of the work such as untimely high water, soft and marshy ground and unusable soft material.

(b) It is planned to secure material for the levee embankment from the channel excavation in building the left levee from the lower end of San Elizario Island to the mouth of Quitman Canyon. At practically all the other locations the material will be secured from discontinuous borrow pits located on the channel side of the levees. Practically no material will require a second handling.

5.–*Desmonte.*

(a) Se estima necesario desmontar el 70 por ciento de la extensión total del derecho de vía, pues parte de esa faja está actualmente en cultivo y otra parte considerable está ocupada por el cauce actual del Río. Se ha calculado un costo de 62.50 dólares por hectára (25 dólares por acre) para este trabajo, que consistirá en cortar las yerbas desenraizar y arar la parte comprendida entre las zanjas de préstamo y el canal de estiaje.

6.–*Terracerías.*

(a) Todo el trabajo de terracerías, tanto el correspondiente a la excavación del cauce, como a los terraplenes de los diques, se hará empleando excavadoras; habiéndose aceptado un costo unitario en el presupuesto, de 18 centavos de dólar por metro cúbico, costo análogo al obtenido en trabajos semejantes en la localidad. Las máquinas más adecuadas para el trabajo serán palas o dragas mecánicas provistas de plumas de cien pies de longitud y cucharones de dos a tres yardas cúbicas de capacidad, aunque en algunas partes de los diques puede usarse con economía equipo más chico. Al fijar el precio unitario se han incluido partidas correspondientes a reparaciones, depreciación de maquinaria y circunstancias imprevistas, como crecientes extemporáneas, terreno flojo y pantanoso, y material escurridizo e inútil.

(b) En el tramo comprendido desde el extremo inferior de la Isla de San Elizario hasta la entrada del cañón de Quitman, se proyecta emplear el material de excavación del cauce para construir el dique izquierdo. En todos los demás casos, el material se tomará de zanjas de préstamo interrumpidas situadas del lado del Río de los diques. En la práctica no será necesario el doble traspaleo del material.

7.–*Work near El Paso-Juarez.*

(a) The item of one hundred twenty five thousand dollars (125,000) covers contemplated work on the section of river between International Dam and Cordova Island, and includes the extension and straightening of the present levees, the removal of existing obstructions, and purchase of title to all lands lying on the channel side of the present levees.

7.–*Obras cerca de Juárez-El Paso.*

(a) En el presupuesto figura una partida de 125.000 dólares destinada a las obras que se consideran necesarias en el tramo del Río comprendido entre la Presa Internacional y el Corte de Córdova, tales como la prolongación y el refuerzo de los diques actuales y la remoción de las obstrucciones existentes y a la adquisición del título de propiedad sobre todos los terrenos particulares que ahora quedan dentro del cauce entre los diques.

8.–*Changes in Canals and Drains.*

(a) The sum of two hundred twenty five thousand dollars ($225,000) is carried in the estimate to cover the cost of rebuilding all constructed irrigation and drainage works where they will be interfered with by the proposed river work. This work will include the rearrangement of the irrigation systems on both sides of the river, especially in the area below Monument No. 1 of San Elizario Island, and changed drain outlets on the United States side in the same area. The sum of seventy-five thousand dollars has been allocated to Mexico and one hundred fifty thousand dollars to the United States.

8.–*Cambios en los Canales y en los Drenes.*

(a) En el presupuesto aparece la suma de 225.000 dólares para cubrir los gastos de reconstrucción de las obras de riego y drenaje ahora existentes que resulten afectadas con los trabajos de rectificación proyectados. Estas obras incluyen la readaptación de los sistemas de riego en ambos lados del Río, especialmente en la región abajo del monumento No. 1 de la Isla de San Elizario, y los cambios de desagues de los drenes en el lado Americano en la misma región. Se ha asignado a México la suma de 75.000 dólares y a los Estados Unidos 150.000 dólares.

9.–*Bridges.*

(a) Present bridges will either have to be lengthened or moved, depending on how they fit with the new plan and probably several more bridges will have to be built. The estimate of the amount of this item is three hundred thousand dollars. ($300.000).

9.–*Puentes.*

(a) Será necesario alargar o cambiar de sitio varios de los Puentes existentes para adaptarlos al nuevo cauce y además será tal vez necesario construir varios puentes nuevos. Para estos objetos se ha incluido una partida de 300.000 dólares.

10.–*Grade Controls.*

(a) Because the effects of the introduction of steeper gradients in the river channel are problematical, and considerable scour may develop, and because the irrigation supply must be diverted at certain places, there has been set up in the estimate

10.–*Estructuras de Control de la Pendiente.*

(a) Teniendo en cuenta que los efectos del aumento de pendiente del cauce del río no pueden precisarse de antemano, y que pudieran ocurrir socavaciones; y considerando también que debe derivarse agua para riego en determinados lugares, se ha hecho

Minute No. 129 of International Boundary Commission—Contd.

an amount of dollars 675.000 to meet the cost of grade control structures. This amount is deemed sufficient to build ten such structures. The immediate construction of three or four is contemplated—located at such places as the need of irrigation diversion dictates. The others will be built if their need becomes apparent.

11.–*Engineering, Contingencies and Overhead.*

(a) An allowance of twenty per cent has been added to cover the cost of the above item. A relatively low engineering cost should result, due to the magnitude of the quantities involved. Contingencies are not serious, as the flow of the river is largely controlled by Elephant Butte Dam, and no long-lasting floods are probable. Overhead should be no higher than on other similar work.

VI.–COST WITHOUT CABALLO DAM.

(a) During December 1928, a report was made on the probable floods at El Paso-Juarez, with and without, the additional flood control of a retention reservoir at Caballo. The data then available indicated a maximum flood of eight thousand (8.000) second feet (226 cubic meters per second) with the Caballo Dam, and a maximum flood of eighteen thousand second feet (510 cubic meters per second) without the Caballo Dam. Since that time additional data has been acquired, and restudies have shown that the assumed maximum flood with the Caballo Dam should be eleven thousand second feet (314 cubic meters per second), and that the assumed maximum flood without the Caballo Dam should be twenty thousand second feet (576 cubic meters per second).

figurar en el presupuesto la suma de 675.000 dólares destinada a la construcción de estructuras que permitan controlar la pendiente, estimándose que dicha suma es suficiente para construir hasta diez estructuras. Por lo pronto se proyecta la construcción inmediata de tres o cuatro estructuras de control en aquellos lugares en que sea necesario derivar agua para riego; las demás se construirán si así lo exigen las necesidades.

11. *Dirección Técnica, Administración e Imprevistos.*

(a) Por estos conceptos se ha aumentado al costo de las obras el 20%. Los gastos por concepto de dirección técnica serán bajos, debido a la magnitud de las obras. Las contingencias no serán muy serias, dado que el Río está regularizado por la Presa del Elefante y no es probable que ocurran crecientes de larga duración. Los gastos de administración no serán mayores que en obras semejantes.

VI.–COSTO SIN LA PRESA DE CABALLO.

(a) En diciembre de 1928 se hizo un estudio comparativo de gastos de crecientes probables frente a Juárez-El Paso considerando dos casos: 1o. Que se construyera el vaso de retención de Caballo y 2o. Que no se construyera este vaso. Los datos entonces disponibles indicaban que en caso de construirse la Presa de Caballo el gasto máximo de crecientes podría ser de 226 metros cúbicos (8.000 pies cúbicos) por segundo; y que en caso de no construirse esa presa el gasto máximo de crecientes podría ser de 510 metros cúbicos (18.000 pies cúbicos) por segundo. Datos recogidos posteriormente y estudios más recientes, han aconsejado tomar como gastos máximos de crecientes, los de 314 metros cúbicos (11.000 pies cúbicos) por segundo, con la presa de Caballo y 576 metros cúbicos (20.000 pies cúbicos) por segundo, sin la presa de Caballo.

(b) In adopting a design for the twenty thousand second feet (576 cubic meters per second) channel it was found necessary to increase the distance between levees from one hundred eighty meters (590 feet) to two hundred ninety meters (950 feet) for the upper part of the valley, or from El Paso-Juarez to Alamo Arroyo. For the lower part, or from Alamo Arroyo to the end it was found necessary to increase the size of the excavated channel from twenty meter (66 foot) base to a thirty meter (99 foot) base, and to raise the levees one meter (3.3 feet).

(c) Estimates show that the works required from Land Monument No. 1 to the mouth of the canyon below Fort Quitman will cost about one million five hundred thousand dollars more when designed for the twenty thousand second foot (576 cubic meters per second) channel than when designed for the eleven thousand second foot (314 cubic meters per second) channel. The principal items of difference are the increase in rights-of-way required due to the widening between levees in the upper part, or from El Paso-Juarez to the Alamo Arroyo; the increase in earthwork, due principally to the larger cross-section needed thru the deep cuts below the Alamo Arroyo, and to the lengthening of the grade control structures and the bridges. There is also an increase in the amount of clearing necessary.

(d) The additional area required for rights-of-way is about eight hundred hectares (2,000 acres) and will cost one hundred thousand dollars. The additional earthwork required is about four million one hundred fifty thousand cubic meters (5,424,000 cubic yards) which at eighteen cents per cubic meter amounts to seven hundred forty-seven thousand

(b) Al hacer los estudios del proyecto para un cauce de 576 metros cúbicos (20.000 pies cúbicos) por segundo, se vió la necesidad de aumentar la distancia entre los diques de 180 metros (590 pies) a 290 metros (950 pies), en la parte alta del Valle comprendida entre Juárez-El Paso y el Arroyo del Alamo. En la parte inferior, es decir, desde el Arroyo del Alamo hasta el final, fué necesario aumentar el ancho del fondo del canal por exceder de 20 metros (66 pies) a 30 metros (99 pies) y aumentar en un metro (3.3 pies) la altura de los diques.

(c) Estimaciones comparativas de costo, hacen ver que las obras necesarias en el tramo desde el monumento número uno de la línea terrestre hasta la entrada del cañón abajo de Fort Quitman implicaría un costo excedente como de 1.500,000 dólares cuando se proveyera un cauce de 576 metros cúbicos (20.000 pies cúbicos) por segundo, sobre el costo correspondiente a un cauce de 314 metros cúbicos (11.000 pies cúbicos) por segundo. Esta diferencia se debe principalmente al aumento en la superficie del terreno destinado a derecho de vía, debido a la mayor distancia entre los diques, en la parte alta, entre Juárez-El Paso y el arroyo El Alamo; al aumento en el volumen de terracerías, debido principalmente a la mayor sección transversal requerida en los cortes profundos abajo del Arroyo del Alamo; y a la mayor longitud de los puentes y de las estructuras de control de la pendiente. También se aumenta el área por desmontar.

(d) El área adicional para derecho de vía es como de 800 hectáras (2000 acres), con un costo de 100.000 dólares. El volumen adicional de terracerías se estima en 4.150,000 metros cúbicos (5.424,000 yardas cúbicas), que, a razón de 0.18 dólares por metro cúbico importaría 747.000 dólares. El aumento de longitud de las estructuras de

Minute No. 129 of International Boundary Commission—Contd.

dollars. The lengthening of grade control structures and bridges will cost an additional three hundred fifty thousand dollars. The additional clearing required will cost thirty-five thousand dollars. The total of the above items is one million two hundred thirty-two thousand dollars which, when increased by twenty per cent allowed for engineering, overhead and contingencies, makes a total additional cost of one million four hundred eighty thousand dollars.

(e) Therefore, the cost ($1,250,000) of the Caballo Dam is more than offset by the economies made possible in the works from Land Monument No. 1 to the mouth of Quitman Canyon. Indeed, a saving of two hundred fifty thousand dollars is achieved. This saving is in addition to a reduction of 800 hectares (2,000 acres) in the land used for the channel which would be otherwise irredeemably lost for cultivation, and to an unknown amount annually saved in less expensive maintenance.

VII. RECOMMENDATIONS.

The following recommendations are respectfully submitted:

(a) That the rectified channel be constructed as described and outlined in this report and the attached exhibits.

(b) That a flood detention dam, with a reservoir of not less than one hundred thousand acre feet (123.350.000 cubic meters) capacity be built at Caballo, New Mexico.

(c) That the areas to be detached from each country be brought into balance by such shifting of the river location as the Commission may decide.

(d) That the areas to be detached and those required for right-of-way be acquired by each nation so that all private rights to these lands be extinguished.

control de la pendiente y de los puentes importaría la suma adicional de 350,000 dólares. Por concepto de desmontes se aumentarían 35.000 dólares. El total de las cantidades anteriores es de 1.232.000 dólares, y si a esta cantidad se agrega el 20% por concepto de dirección, administración e imprevistos, el costo total adicional sería de 1.480.000 dólares.

(e) Así pues, se ve que el costo de la Presa de Caballo, que es de 1.250,000 dólares, resulta ampliamente compensado por las economías que pueden hacerse en las obras entre el Monumento No. 1 de la línea terrestre y la entrada del Cañón de Quitman, lográndose un ahorro de 250.000 dólares. Además de este ahorro, se disminuye en 800 hectáras (2000 acres) la extensión de terreno que, por formar parte del cauce, resultaría irremisiblemente perdida para el cultivo y a la vez se ahorra por concepto de gastos de conservación una cantidad anual cuyo monto no puede precisarse.

VII. RECOMENDACIONES.

Con todo respeto se hacen las siguientes recomendaciones:

(a) Que se construya el cauce rectificado de acuerdo con los lineamientos establecidos en este informe y en sus anexos.

(b) Que se construya una presa de retención con un vaso de capacidad no menor de 123.350,000 Mts. cúbicos (100.000 acres pies) en Caballo, Nuevo México, E. U. A.

(c) Que se igualen las áreas por segregar de cada país modificando el trazo del cauce proyectado, en la forma que la Comisión estime conveniente.

(d) Que cada país adquiera la parte que le corresponda de los terrenos—por segregar y de los necesarios para derecho de vía, a fin de extinguir los derechos de propiedad particular sobre dichos terrenos.

(e) That the balanced detached tracts and the acquired rights-of-way be exchanged between the two nations so that each nation will have jurisdiction to the center of the rectified channel where it forms the boundary line.

(f) That the International Boundary Commission have full control over the work during its construction, and over its maintenance when completed.

VIII. EXHIBITS.

Five exhibits are attached, as follows:

EXHIBIT No. 1.–River Gradients.

This shows graphically the present river gradients between Elephant Butte and Quitman Canyon, and the proposed new gradient which the river shortening will bring about.

EXHIBIT No. 2.–Location Map.

This is a map of the El Paso-Juarez Valley on which is shown the located line and the segregated areas in color and in numerical table. Two routes are shown at the San Elizario Island, one following generally the present river, and the other following generally the present boundary.

EXHIBIT No. 3.–Typical Cross-Sections.

This exhibit graphically illustrates the cross-sections proposed for use, and gives the theoretical hydraulic functions.

EXHIBIT No. 4.–Drainage Areas.

This exhibit indicates in colors and in figures the drainage area controlled by Elephant Butte Dam, and that to be controlled by the Caballo Dam.

EXHIBIT No. 5.–Estimate of Cost.

Minute No. 129 of International Boundary Commission—Contd.

(e) Que ambos países cambien entre sí las áreas iguales de terrenos segregados, así como la parte respectiva de los terrenos adquiridos para derecho de vía, a fin de que cada país tenga, en el futuro, jurisdicción hasta el centro del cauce rectificado en donde éste constituya el Límite Internacional.

(f) Que la Comisión Internacional de Límites tenga a su cargo los trabajos de construcción de las obras y la conservación de ellas una vez terminadas.

Decreasing Rates of Duty on Agricultural Hand Tools and Parts Thereof

April 3, 1933.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

Tariff on agricultural hand tools and parts thereof.
Preamble.
Statutory authorization.
Vol. 46, p. 701.

Whereas under and by virtue of section 336 of Title III, Part II, of the act of Congress approved June 17, 1930 (46 Stat. 590, 701), entitled "AN ACT To provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, to protect American labor, and for other purposes," the United States Tariff Commission has investigated the differences in costs of production of, and all other facts and conditions enumerated in said section with respect to, shovels, spades, scoops, forks, hoes, rakes, scythes, sickles, grass hooks, corn knives, and drainage tools, all the foregoing if agricultural hand tools, and parts thereof, composed wholly or in chief value of metal, whether partly or wholly manufactured, being wholly or in part the growth or product of the United States and of and with respect to like or similar articles wholly or in part the growth or product of the principal competing country;

Whereas in the course of said investigation a hearing was held, of which reasonable public notice was given and at which parties interested were given reasonable opportunity to be present, to produce evidence, and to be heard;

Whereas the commission has reported to the President the results of said investigation and its findings with respect to such differences in costs of production;

Whereas the commission has found it shown by said investigation that the principal competing country is Germany, and that the duties expressly fixed by statute do not equalize the differences in the costs of production of the domestic articles and the like or similar foreign articles when produced in said principal competing country, and has specified in its report the decreases in the rates of duty expressly fixed by statute found by the commission to be shown by said investigation to be necessary to equalize such differences; and

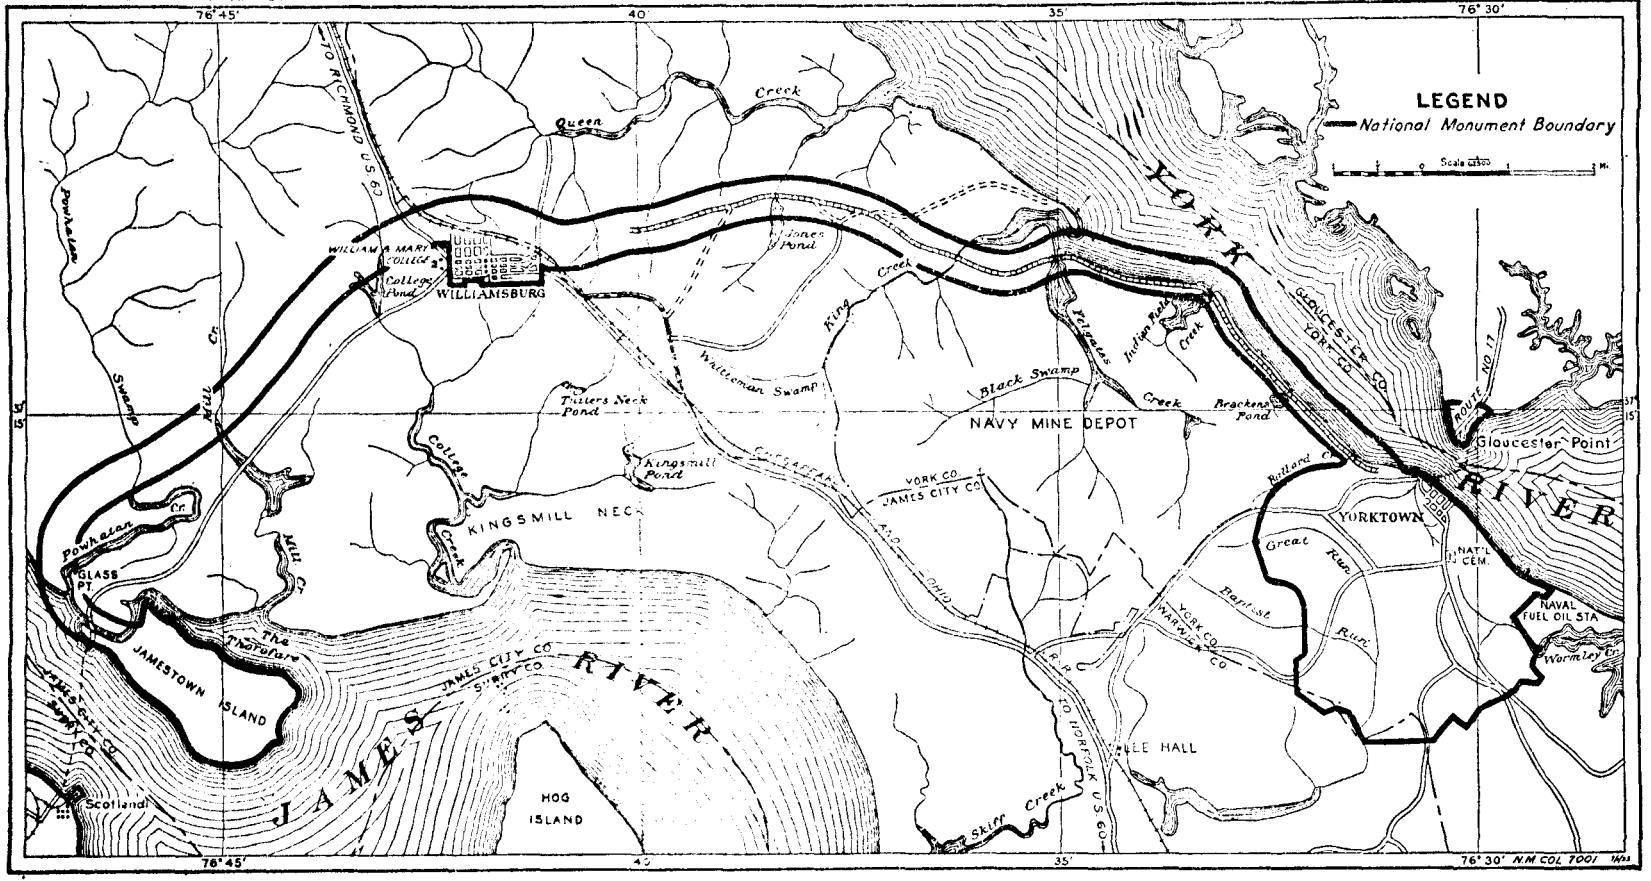
NATIONAL FIRE PREVENTION WEEK—1933

August 28, 1933.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

National Fire Prevention Week, 1933. Preamble.



It has been a commendable custom for the President of the United States to request the annual observance of Fire Prevention Week throughout the country. It is a week set aside for the purpose of informing the public of the dangers of fire to life and property. Fires which are largely preventable take a cruel toll of many lives and destroy property exceeding $400,000,000 in value each year. Of late, progress has been made in reducing the Nation's fire loss, and this fact should encourage continuous vigilance and alertness so necessary to decrease the hazards of fire.

DEPARTMENT OF THE INTERIOR.
HAROLD L. ICKES, SECRETARY

VIRGINIA

JAMES CITY, WARWICK, YORK AND GLOUCESTER COUNTIES.

NATIONAL PARK SERVICE.
ARNO B. CAMMERER, DIRECTOR

COLONIAL NATIONAL MONUMENT

NOW, THEREFORE, I, FRANKLIN D. ROOSEVELT, President of the United States of America, do hereby proclaim the week beginning October 8, 1933, to be observed as Fire Prevention Week. To prevent our enormous waste by fire, the cooperation of all citizens is requested, and the organizations, groups, and individuals interested in fire prevention are asked to take the leadership in instructing the public in the simple precautionary measures advocated as fire-prevention safeguards.

Week beginning October 8, 1933, designated as.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States to be affixed.

THANKSGIVING DAY—1933

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

November 21, 1933.

A PROCLAMATION

Thursday, November 30, 1933, set aside as Thanksgiving Day.

I, Franklin D. Roosevelt, President of the United States of America, do set aside and appoint Thursday, the thirtieth day of November 1933, to be a Day of Thanksgiving for all our people.

May we on that day in our churches and in our homes give humble thanks for the blessings bestowed upon us during the year past by Almighty God.

Recommendations.

May we recall the courage of those who settled a wilderness, the vision of those who founded the nation, the steadfastness of those who in every succeeding generation have fought to keep pure the ideal of equality of opportunity and hold clear the goal of mutual help in time of prosperity as in time of adversity.

May we ask guidance in more surely learning the ancient truth that greed and selfishness and striving for undue riches can never bring lasting happiness or good to the individual or to his neighbors.

May we be grateful for the passing of dark days; for the new spirit of dependence one on another; for the closer unity of all parts of our wide land; for the greater friendship between employers and those who toil; for a clearer knowledge by all nations that we seek no conquests and ask only honorable engagements by all peoples to respect the lands and rights of their neighbors; for the brighter day to which we can win through by seeking the help of God in a more unselfish striving for the common bettering of mankind.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States to be affixed.

DONE at the City of Washington this twenty-first day of November, in the year of our Lord Nineteen hundred and thirty-three, and of the Independence of the United States of America the One hundred and fifty-eighth.

DATE OF REPEAL OF THE EIGHTEENTH AMENDMENT

December 5, 1933.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

Eighteenth Amendment to the Constitution, repeal. Preamble. Statutory citation. Vol. 47, p. 1625.

WHEREAS the Congress of the United States in second session of the Seventy-second Congress, begun at Washington on the fifth day of December in the year one thousand nine hundred and thirty-two, adopted a resolution in the words and figures following, to wit:

"JOINT RESOLUTION

Proposing an amendment to the Constitution of the United States.

"*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by conventions in three-fourths of the several States:

"'Article—

"'Section 1. The eighteenth article of amendment to the Constitution of the United States is hereby repealed.

"'Sec. 2. The transportation or importation into any State, Territory, or possession of the United States for delivery or use therein of intoxicating liquors, in violation of the laws thereof, is hereby prohibited.

"'Sec. 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by conventions in the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.'"

National Industrial Recovery Act. *Ante*, p. 208.

WHEREAS section 217 (a) of the act of Congress entitled "AN ACT To encourage national industrial recovery, to foster competition, and to provide for the construction of certain useful public works, and for other purposes", approved June 16, 1933, provides as follows:

"Sec. 217. (a) The President shall proclaim the date of—

(1) the close of the first fiscal year ending June 30 of any year after the year 1933, during which the total receipts of the United States (excluding public-debt receipts) exceed its total expenditures (excluding public-debt expenditures other than those chargeable against such receipts), or

(2) the repeal of the eighteenth amendment to the Constitution,

whichever is the earlier."

WHEREAS it appears from a certificate issued December 5, 1933, by the Acting Secretary of State that official notices have been received in the Department of State that on the fifth day of December 1933 conventions in 36 States of the United States, constituting three fourths of the whole number of the States had ratified the said repeal amendment;

December 5, 1933, proclaimed repeal date.

NOW, THEREFORE, I, FRANKLIN D. ROOSEVELT, President of the United States of America, pursuant to the provisions of section 217 (a) of the said act of June 16, 1933, do hereby proclaim that the eighteenth amendment to the Constitution of the United States was repealed on the fifth day of December 1933.

Cooperation for greater respect for law and order enjoined.

FURTHERMORE, I enjoin upon all citizens of the United States and upon others resident within the jurisdiction thereof to cooperate with the Government in its endeavor to restore greater respect for law and order, by confining such purchases of alcoholic beverages as they may make solely to those dealers or agencies which have been duly licensed by State or Federal license.

Observance of this request, which I make personally to every individual and every family in our Nation, will result in the consumption of alcoholic beverages which have passed Federal inspection, in the break-up and eventual destruction of the notoriously evil illicit liquor traffic, and in the payment of reasonable taxes for the support of Government and thereby in the superseding of other forms of taxation.

I call specific attention to the authority given by the twenty-first amendment to the Government to prohibit transportation or importation of intoxicating liquors into any State in violation of the laws of such State.

I ask the whole-hearted cooperation of all our citizens to the end that this return of individual freedom shall not be accompanied by the repugnant conditions that obtained prior to the adoption of the eighteenth amendment and those that have existed since its adoption. Failure to do this honestly and courageously will be a living reproach to us all.

I ask especially that no State shall by law or otherwise authorize the return of the saloon either in its old form or in some modern guise.

The policy of the Government will be to see to it that the social and political evils that have existed in the pre-prohibition era shall not be revived nor permitted again to exist. We must remove forever from our midst the menace of the bootlegger and such others as would profit at the expense of good government, law, and order.

I trust in the good sense of the American people that they will not bring upon themselves the curse of excessive use of intoxicating liquors, to the detriment of health, morals, and social integrity.

The objective we seek through a national policy is the education of every citizen towards a greater temperance throughout the Nation.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States to be affixed.

DONE at the City of Washington this fifth day of December, in the year of our Lord nineteen hundred and thirty-three, and of [SEAL] the Independence of the United States of America the one hundred and fifty-eighth.

WHEREAS under and by virtue of section 336 of title III, part II, of the act of Congress approved June 17, 1930 (46 Stat. 590, 701), entitled "AN ACT To provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, to protect American labor, and for other purposes", the United States Tariff Commission has investigated the differences in costs of production of, and all other facts and conditions enumerated in said section with respect to, fish, prepared or preserved in any manner, when packed in oil or in oil and other substances, being wholly or in part the growth or product of the United States and of and with respect to like or similar articles wholly or in part the growth or product of the principal competing countries;

WHEREAS the Commission has reported to the President the results of said investigation and its findings with respect to such differences in costs of production;

WHEREAS the Commission has found it shown by said investigation that the principal competing country for tuna fish, prepared or preserved in any manner, when packed in oil or in oil and other substances, is Japan, and that the principal competing country for fish other than tuna, prepared or preserved in any manner, when packed in oil or in oil and other substances, is Norway, and that the duties expressly fixed by statute do not equalize the differences in the costs of production of the domestic articles and the like or similar foreign articles when produced in said principal competing countries, and has specified in its report the increases in the rate of duty expressly fixed by statute found by the Commission to be shown by said investigation to be necessary to equalize such differences; and

[COINAGE OF SILVER]

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

December 21, 1933.

A PROCLAMATION

Coinage of silver. Preamble. Statutory authorization. *Ante*, p. 52.

WHEREAS, by paragraph (2) of section 43, title III, of the Act of Congress, approved May 12, 1933 (Public No. 10), the President is authorized "By proclamation to fix the weight of the gold dollar in grains nine-tenths fine and also to fix the weight of the silver dollar in grains nine-tenths fine at a definite fixed ratio in relation to the gold dollar at such amounts as he finds necessary from his investigation to stabilize domestic prices or to protect the foreign commerce against the adverse effect of depreciated foreign currencies, and to provide for the unlimited coinage of such gold and silver at the ratio so fixed, * * *"; and

Stabilizing domestic prices; protection against depreciated foreign currencies, etc.

WHEREAS, from investigations made by me, I find it necessary, in aid of the stabilization of domestic prices and in accordance with the policy and program authorized by Congress, which are now being administered, and to protect our foreign commerce against the adverse effect of depreciated foreign currencies, that the price of silver be enhanced and stabilized; and

Resolution of World Economic and Monetary Conference.

WHEREAS, a resolution presented by the Delegation of the United States of America was unanimously adopted at the World Economic and Monetary Conference in London on July 20, 1933, by the representatives of sixty-six Governments, which in substance provided that Governments will abandon the policy and practice of melting up or debasing silver coins; that low valued silver currency be replaced with silver coins and that no legislation should be enacted that will depreciate the value of silver; and

Separate agreements with designated silver-using countries. Limitations imposed.

WHEREAS, a separate and supplemental agreement was entered into, at the instance of the representatives of the United States, between China, India, and Spain, the holders and users of large quantities of silver, on the one hand, and Australia, Canada, Mexico, Peru, and the United States on the other hand, as the chief producers of silver, wherein China agreed not to dispose of any silver derived from the melting up or debasement of silver coins,and India agreed not to dispose of over 35,000,000 ounces of silver per annum during a period of four years commencing January 1, 1934, and Spain agreed not to dispose of over 5,000,000 ounces of silver annually during said

period, and both of said Governments agreed that at the end of said period of four years they would then subject themselves to the general resolution adopted at the London Conference, and in consideration of such limitation it was agreed that the Governments of the five producing countries would each absorb from the mines in their respective countries a certain amount of silver, the total amount to be absorbed by said producing countries being 35,000,000 ounces per annum during the four years commencing the 1st day of January, 1934; that such silver so absorbed would be retained in each of said respective countries for said period of four years, to be used for coinage purposes or as reserves for currency, or to otherwise be retained and kept off the world market during such period of time, it being understood that of the 35,000,000 ounces the United States was to absorb annually at least 24,421,410 ounces of the silver produced in the United States during such period of time.

Necessity declared. Execution of agreements.

NOW, THEREFORE, finding it proper to cooperate with other Governments and necessary to assist in increasing and stabilizing domestic prices, to augment the purchasing power of peoples in silver-using countries, to protect our foreign commerce against the adverse effect of depreciated foreign currencies, and to carry out the understanding between the sixty-six Governments that adopted the resolution hereinbefore referred to; by virtue of the power in me vested by the Act of Congress above cited, the other legislation designated for national recovery, and by virtue of all other authority in me vested;

Directing opening of mints to the coinage of newly mined domestic silver.

I, FRANKLIN D. ROOSEVELT, President of the United States of America, do proclaim and direct that each United States coinage mint shall receive for coinage into standard silver dollars any silver which such mint, subject to regulations prescribed hereunder by the Secretary of the Treasury, is satisfied has been mined, subsequently to the date of this proclamation, from natural deposits in the United States or any place subject to the jurisdiction thereof. The Director of the Mint, with the voluntary consent of the owner, shall deduct and retain of such silver so received fifty percent as seigniorage and for services performed by the Government of the United States relative to the coinage and delivery of silver dollars. The balance of such silver so received, that is, fifty percent thereof, shall be coined into standard silver dollars and the same, or an equal number of other standard silver dollars, shall be delivered to the owner or depositor of such silver. The fifty percent of such silver so deducted shall be retained as bullion by the Treasury and shall not be disposed of prior to the thirty-first day of December, 1937, except for coining into United States coins.

Seigniorage, etc., charges.

Fifty percent to be coined into standard silver dollars.

Remainder to be retained as bullion; exception.

Regulations to be prescribed. Vol. 40, p. 535.

The Secretary of the Treasury is authorized to prescribe regulations to carry out the purposes of this proclamation. Such regulations shall contain provisions substantially similar to the provisions contained in the regulations made pursuant to the Act of Congress, approved April 23, 1918, (40 Statutes at Large, page 535), known as the Pittman Act, with such changes as he shall determine prescribing how silver mined, subsequently to the date of this proclamation from natural deposits in the United States or any place subject to the jurisdiction thereof, shall be identified.

Duration.

This proclamation shall remain in force and effect until the thirty-first day of December, 1937, unless repealed or modified by Act of Congress or by subsequent proclamation.

Ratio to be maintained. U.S.C., p. 995.

The present ratio in weight and fineness of the silver dollar to the gold dollar shall, for the purposes of this proclamation, be maintained until changed by further order or proclamation.

Right reserved.

Notice is hereby given that I reserve the right by virtue of the authority vested in me to revoke or modify this proclamation as the interest of the United States may seem to require.

IN WITNESS WHEREOF I have hereunto set my hand and caused the seal of the United States to be affixed.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

Gold Reserve. Preamble. Vol. 31, p. 45.

WHEREAS, by virtue of Section 1 of the Act of Congress approved March 14, 1900 (31 Stat. L. 45), the present weight of the gold dollar is fixed at twenty five and eight tenths grains of gold nine tenths fine; and

Ante, p. 51. Statutory authority of President.

WHEREAS, by Section 43, Title III of the Act approved May 12, 1933 (Public, No. 10, 73d Congress), as amended by Section 12 of the Gold Reserve Act of 1934, it is provided in part as follows:

"Whenever the President finds, upon investigation, that (1) the foreign commerce of the United States is adversely affected by reason of the depreciation in the value of the currency of any other government or governments in relation to the present standard value of gold, or (2) action under this section is necessary in order to regulate and maintain the parity of currency issues of the United States, or (3) an economic emergency requires an expansion of credit, or (4) an expansion of credit is necessary to secure by international agreement a stabilization at proper levels of the currencies of various governments, the President is authorized, in his discretion—

"(a) To direct the Secretary of the Treasury to enter into agreements with the several Federal Reserve banks and with the Federal Reserve Board whereby the Federal Reserve Board will, and it is hereby authorized to, notwithstanding any provisions of law or rules and regulations to the contrary, permit such reserve banks to agree that they will, (1) conduct, pursuant to existing law, throughout specified periods, open market operations in obligations of the United States Government or corporations in which the United States is the majority stockholder, and (2) purchase directly and hold in portfolio for an agreed period or periods of time Treasury bills or other obligations of the United States Government in an aggregate sum of $3,000,000,000 in addition to those they may then hold, unless prior to the termination of such period or periods the Secretary shall consent to their sale. No suspension of reserve requirements of the Federal Reserve banks, under the terms of section 11 (c) of the Federal Reserve Act, necessitated by reason of operations under this section, shall require the imposition of the graduated tax upon any deficiency in reserves as provided in said section 11 (c). Nor shall it require any automatic increase in the rates of interest or discount charged by any Federal Reserve bank, as otherwise specified in that section. The Federal Reserve Board, with the approval of the Secretary of the Treasury, may require the Federal Reserve banks to take such action as may be necessary, in the judgment of the Board and of the Secretary of the Treasury, to prevent undue credit expansion.

"(b) If the Secretary, when directed by the President, is unable to secure the assent of the several Federal Reserve banks and the Federal Reserve Board to the agreements authorized in this section, or if operations under the above provisions prove to be inadequate to meet the purposes of this section, or if for any other reason additional measures are required in the judgment of the President to meet such purposes, then the President is authorized—

* * *

"(2) By proclamation to fix the weight of the gold dollar in grains nine tenths fine and also to fix the weight of the silver dollar in grains nine tenths fine at a definite fixed ratio in relation to the gold dollar at such amounts as he finds necessary from his investigation to stabilize domestic prices or to protect the foreign commerce against the adverse effect of depreciated foreign currencies, and to provide for the unlimited coinage of such gold and silver at the ratio so fixed, or in case the Government of the United States enters into an

agreement with any government or governments under the terms of which the ratio between the value of gold and other currency issued by the United States and by any such government or governments is established, the President may fix the weight of the gold dollar in accordance with the ratio so agreed upon, and such gold dollar, the weight of which is so fixed, shall be the standard unit of value, and all forms of money issued or coined by the United States shall be maintained at a parity with this standard and it shall be the duty of the Secretary of the Treasury to maintain such parity, but in no event shall the weight of the gold dollar be fixed so as to reduce its present weight by more than 50 per centum. Nor shall the weight of the gold dollar be fixed in any event at more than 60 per centum of its present weight. The powers of the President specified in this paragraph shall be deemed to be separate, distinct, and continuing powers, and may be exercised by him, from time to time, severally or together, whenever and as the expressed objects of this section in his judgment may require; except that such powers shall expire two years after the date of enactment of the Gold Reserve Act of 1934 unless the President shall sooner declare the existing emergency ended, but the President may extend such period for not more than one additional year after such date by proclamation recognizing the continuance of such emergency"; and

Duration of powers conferred.

WHEREAS, I find, upon investigation, that the foreign commerce of the United States is adversely affected by reason of the depreciation in the value of the currencies of other governments in relation to the present standard value of gold, and that an economic emergency requires an expansion of credit; and

WHEREAS, in my judgment, measures additional to those provided by subsection (a) of said Section 43 are required to meet the purposes of such Section; and

WHEREAS, I find, from my investigation, that, in order to stabilize domestic prices and to protect the foreign commerce against the adverse effect of depreciated foreign currencies, it is necessary to fix the weight of the gold dollar at 15 5/21 grains nine tenths fine,

NOW, THEREFORE, be it known that I, FRANKLIN D. The weight of the silver dollar is not altered or affected in any manner by reason of this proclamation.

Weight of gold dollar reduced.
Ante, p. 52.

Weight of silver dollar not affected.

This proclamation shall remain in force and effect until and unless repealed or modified by act of Congress or by subsequent proclamation; and notice is hereby given that I reserve the right by virtue of the authority vested in me to alter or modify this proclamation as the interest of the United States may seem to require.

WHEREAS the Commission has reported to the President the results of said investigation and its findings with respect to such differences in costs of production;

WHEREAS the Commission has found it shown by said investigation that the principal competing country is Germany, and that the duties expressly fixed by statute do not equalize the difference in the costs of production of the domestic articles and the like or similar foreign articles when produced in said principal competing country, and has specified in its report the decreases in the rates of duty expressly fixed by statute found by the Commission to be shown by said investigation to be necessary to equalize such difference; and

The American Minister (Shoemaker) to the Bulgarian Minister for Foreign Affairs (Mooshanoff)

LEGATION OF THE UNITED STATES OF AMERICA,

The United States will accord to goods, the growth, produce or manufacture of Bulgaria and Bulgaria will accord to goods, the growth, produce or manufacture of the United States in all respects and unconditionally the most favored nation treatment. The said treatment shall apply to all goods from whatever place arriving including goods destined for consumption or re-exportation or in transit.

The stipulations of this agreement do not extend to the treatment which is accorded by the United States to the commerce of Cuba under the provisions of the commercial convention concluded between the United States and Cuba on December 11, 1902, or the provisions of any other commercial convention which hereafter may be concluded between the United States and Cuba. Such stipulations moreover do not extend to the treatment which is accorded to the commerce between the United States and the Panama Canal Zone or any dependency of the United States or to the commerce of the dependencies of the United States with one another under existing or future laws.

Nothing in this agreement shall be construed as a limitation of the right of either high contracting party to impose on such terms as it may see fit prohibitions or restrictions of a sanitary character designed to protect human, animal or plant life or regulations for the enforcement of police or revenue laws.

The present agreement becomes operative on this eighteenth day of August, 1932, and shall continue in force until superseded by a definitive treaty of commerce and navigation, or until denounced by one of the two High Contracting Parties by advance notice of three months. [No. 41]

Arrangement between the United States of America and the Netherlands for the reciprocal recognition of load-line certificates. Effected by exchange of notes, signed August 26, 1931, November 16, 1931, March 18, 1932, April 22, 1932, June 29, 1932, and September 30, 1932.

August 26, 1931.

The Acting Secretary of State (Castle) to the Netherland Chargé d'Affaires ad interim (Van Hoorn)

DEPARTMENT OF STATE,
Washington, August 26, 1931.

SIR:

Arrangement with the Netherlands for the reciprocal recognition of load line certificates.

Further reference is made to the Legation's note No. 113, dated January 20, 1931,[1] enclosing copies of the Netherland Shipping Act and Royal Decree and Order in Council relating to load lines for the consideration of this Government in relation to its proposal to the Netherland Government to conclude a reciprocal load line agreement with this Government pending the coming into force of the International Load Line Convention.

Note has been made of the Legation's statement that the laws, rules and regulations pertaining to load lines for vessels now enforced by the Netherland Government are identical with those enforced by the Government of Great Britain, with the sole exception of the rules and regulations pertaining to the carriage of deck cargoes of wood goods.

The competent authorities of this Government consider that the 1906 rules of the British Board of Trade, concerning load lines, are as effective as the United States Load Line Regulations for the determination of load lines on ordinary merchant vessels. The rules of the Netherland Government for determining the load lines of vessels with wood cargoes have been examined by these authorities and have likewise been found to be as effective as the rules contained in the United States Load Line Regulations applicable to vessels carrying wood cargo on deck.

Pending the coming into effect of the International Load Line Convention in the United States and the Netherlands, the competent authorities of the Government of the United States are prepared to recognize the load line marks and the certificate of such marking of merchant vessels of the competent authorities of the Netherland Government as equivalent to their own load line marks and certificates of marking: provided, that the load line marks are in accordance with the load line certificates; that the hull and superstructures of

the vessel certificated have not been so materially altered since the issuance of the certificate, as to affect calculations on which the load line was based, and that alterations have not been made so that the—

(1) Protection of openings,
(2) Guard Rails,
(3) Freeing Ports,
(4) Means of Access to Crews Quarters,

have made the vessel manifestly unfit to proceed to sea without danger to human life.

It will be understood that on the receipt of a note from you to the effect that the competent authorities of the Netherland Government will give full recognition to the load line marks made and the certificates issued by the competent authorities of this Government and expressing the Netherland Government's concurrence in the foregoing understanding, the reciprocal agreement will become effective.

Accept, Sir, the renewed assurances of my high consideration.

Acting Secretary of State.

SIR:

Concurrence by the Netherlands. I have the honor to refer to the Department's note of August 26, 1931, No. 856.8561/4, concerning the conclusion of a reciprocal load line agreement between the United States of America and the Netherlands pending the coming into force of the International Load Line Convention.

Pursuant to instructions from the Minister of Foreign Affairs at The Hague, I beg leave to transmit herewith four copies of the Royal Decree of October 8, 1931,[2] published in the Collection of Official Documents ("Staatsblad") No. 414, by which the laws, rules and regulations pertaining to load lines for vessels now enforced by the United States Government are recognized by the Netherlands Government.

[2] See appendix, p. 1763.

I am further requested to inform Your Excellency that the Netherlands Government has designated the following bureaus as private investigation bureaus recognized in accordance with the "Schepenwet" (Netherlands Merchant Shipping Act of July 1, 1909):

1. Lloyd's Register of British and Foreign Shipping;
2. British Corporation for the survey and registry of shipping;
3. Bureau Veritas;
4. Germanischer Lloyd;
5. Det Norske Veritas.

I avail myself of this opportunity to renew to you, Sir, the assurance of my highest consideration.

No. 935. LÉGATION DES PAYS-BAS.
Washington, D.C., 18 March 1932.

SIR:

Pursuant to instructions received from my Government, I have the honor to enclose herewith copy of the Royal Decree of January 29, 1932,[3] (*Official Gazette* No. 25) regarding load line regulations in the Netherlands, purporting modification of the Royal Decree of September 22, 1909, which was amended last by Royal Decree of November 4, 1926 and copy of which was transmitted to Your Excellency by my note of January 20, 1931, No. 113.[4]

According to this new Decree in certain cases a somewhat more lenient rule may be adopted in the Netherlands with regard to load line marks, provided this will not endanger ship and crew and will be in conformity with the minimum requirements as stipulated in the International Load Line Convention of London of July 5, 1930.

I may remark at the same time that the Netherland Government, according to this measure, has already put into force the stipulations of the London Convention before it has been ratified.

Please accept, Sir, the renewed assurances of my highest consideration.

The Acting Secretary of State (Castle) to the Netherland Minister (Van Royen)

DEPARTMENT OF STATE
Washington, April 22, 1932.

SIR:

I have the honor to refer to your note No. 3956, dated November 16, 1931, and likewise to your note No. 935 of March 18, 1932, both of which relate to the proposed load-line agreement between the Governments of the United States and the Netherlands.

It is noted that the Government of the Netherlands has designated the following bureaus as private investigation bureaus recognized in accordance with the "Schepenwet" (Netherlands Merchant Shipping Act of July 1, 1909):

1. Lloyd's Register of British and Foreign Shipping;
2. British Corporation for the survey and registry of shipping;
3. Bureau Veritas;
4. Germanischer Lloyd;
5. Det Norske Veritas.

The United States Government is willing to recognize the load-line certificates issued by the aforementioned classification societies to merchant ships of the Netherlands when they are issued under the authority thus granted by the Netherland Government.

This Government has authorized the marking of load-lines and the issuance of certificates therefor, on American vessels, by the American Bureau of Shipping, the American Committee of Lloyd's Registry of Shipping, and the American representatives of the Bureau Veritas.

The Government of the United States is also willing to recognize the certificates issued by the Netherland Government pursuant to the Royal Decree of January 29, 1932,[5] (*Official Gazette* No. 25) which amends certain regulations under the Shipping Law of the Netherlands so as to allow the assignment of smaller freeboards than hitherto authorized provided it can be done without danger to ship and crew, and that the freeboards so assigned are in accordance with the provisions contained in the International Load Line Convention of July 5, 1930.

Note has been taken of Royal Decree No. 414 of October 8, 1931,[6] by which the provisions in force in the United States in regard to the minimum water-line as established under the law of March 2, 1929, will be recognized by the Netherland Government. It is the view of this Government, therefore, that the agreement for the recog-

nition by each Government of the load-lines marked and of the certificates issued under the authority of the other Government, may now be regarded as complete.

Accept, Sir, the renewed assurances of my highest consideration.

SIR:

Referring to my note of April 27, 1932,[1] No. 1393, regarding the loadline agreement between the Governments of the Netherlands and the United States and to the third paragraph of Your Excellency's letter of April 22, 1932 on the same subject, I have the honor, pursuant to instructions received from The Hague, to inform you, that, according to article 34 of the Royal Decree of 1929, referred to in articles 5, 9 and 17 of the "Schepenwet" (Netherland Merchant Shipping Act) of July 1, 1909 published in the "Staatsblad" (*Official Gazette*) No. 219 of said year,—of which two documents I presented you with a copy by my letter of January 20, 1931,[1] No. 113,—the Netherland load-line certificates are exclusively issued by the "Commissie tot Vaststelling van de minimum-Uitwatering" (Commission for the Determination of loadlines) and never by the classification societies even when recognized in accordance with the "Schepenwet".

These classification bureaux, when recognized by the Netherland Government, act on the subject of the marking of loadlines and the issuance of certificates, only in advisory capacity; however, the advice of the majority of these bureaux is generally followed.

I avail myself of this opportunity to renew to you Sir, the assurances of my highest consideration.

MR. MINISTER,

Arrangement with Belgium for the reciprocal recognition of certificates of airworthiness for imported aircraft.

I have the honor to communicate to Your Excellency the text of the arrangement between the United States of America and Belgium, providing for the acceptance by the one country of certificates of airworthiness of aircraft imported from the other country as merchandise, as understood by me to have been agreed to in the negotiations which have just been concluded between our two Governments as follows:

AN ARRANGEMENT BETWEEN BELGIUM AND THE UNITED STATES OF AMERICA CONCERNING THE ACCEPTANCE BY ONE OF THE PARTIES OF CERTIFICATES OF AIRWORTHINESS FOR AIRCRAFT IMPORTED AS MERCHANDISE FROM THE TERRITORY OF THE OTHER PARTY.

1. The present arrangement applies to civil aircraft constructed in continental United States of America, exclusive of Alaska, and exported to Belgium; and to civil aircraft constructed in Belgium and exported to continental United States of America, exclusive of Alaska.

2. On condition that the agreement be reciprocal, certificates of airworthiness issued by the competent authorities of the Government of the United States in respect of aircraft subsequently registered in Belgium, shall have the same validity as if these certificates had been issued in accordance with the regulations in force on the subject in Belgium. However, the validity of a certificate issued in the United States shall in every case be subject to the issuance by the authorities of the Government of the United States of a special airworthiness certificate for exportation.

3. This arrangement shall apply to civil aircraft of all categories, including those used for public transportation or for private purposes.

4. Each of the Contracting Parties may terminate the present arrangement by giving to the other sixty days notice.

This arrangement will come into force thirty days after the date of this note.

1) le présent arrangement s'applique aux aéronefs civils construits dans la partie continentale des Etats-Unis d'Amérique, à l'exclusion d'Alaska, et exportés en Belgique, et aux aéronefs civils construits en Belgique et exportés dans la partie continentale des Etats-Unis d'Amérique, à l'exclusion de l'Alaska.

2) Sous condition de réciprocité, les certificats de navigabilité aérienne délivrés par les autorités compétentes du Gouvernement des Etats-Unis pour des aéronefs immatriculés ensuite en Belgique, auront la même valeur que si ces certificats avaient été délivrés conformément aux règlements sur la matière en vigueur en Belgique. EXCELLENCY:

Agreement with France relating to rights of American citizens in connection with the French rent laws. Vol. 10. p. 996.

I have the honor to communicate to Your Excellency my Government's interpretation of Article 7 of the Consular Convention between the United States of America and France concluded February 23, 1853, in relation to the rights of American citizens in France in connection with the French rent laws. It is my understanding that the following interpretation which has prevailed in the past is concurred in by your Government for the future application of the convention.

The effect of the provisions of Article 7 is to establish the right of citizens of the United States in France to enjoy the same treatment as French citizens in matters relating to the ownership, possession and disposal of property. Accordingly, citizens of the United States are entitled, to enjoy in France the benefit of all the provisions, whether applicable to owners or tenants, contained in the French law of April 1, 1926, as amended by the law of June 29, 1929, governing the relations between lessors and lessees of premises used for residential purposes, and in the law of June 30, 1926, as amended by the law of April 22, 1927, governing the relations between tenants and landlords of premises used for commercial or industrial purposes, notwithstanding Article 11 of the Civil Code and the exceptions or restrictions applicable to foreigners under the aforesaid laws.

I may add that, under the laws of the states of the United States and the District of Columbia, French citizens in the United States enjoy the same treatment as American citizens with regard to the leasing and renting of real property.

I shall be glad to have your confirmation of the agreement thus reached.

I avail myself of this occasion to renew to Your Excellency the assurance of my highest consideration,

MONSIEUR L'AMBASSADEUR,

Acceptance by France.

Par lettre du 23 du mois dernier vous m'avez fait connaître l'interprétation que votre Gouvernement donne de l'article 7 de la Convention consulaire conclue le 23 février 1853 entre la France et les Etats-Unis d'Amérique, au sujet des droits des citoyens américains en France, relativement à la loi française sur les loyers.

J'ai l'honneur d'informer Votre Excellence que le Gouvernement français accepte, pour l'application future de la Convention, l'interprétation suivante déjà valable dans le passé.

Les dispositions de l'article 7 ont pour effet d'assurer aux citoyens des Etats-Unis résidant en France le droit de jouir du même traitement que les citoyens français en matière de propriété, de possession et de disposition de biens immeubles. En conséquence, les citoyens des Etats-Unis jouiront en France du bénéfice de toutes les dispositions, applicables soit aux propriétaires soit aux locataires, de la loi française du 1er avril 1926, modifiée par celle du 29 juin 1929, régissant les relations entre bailleurs et preneurs de locaux à usage d'habitation, et de la loi du 30 juin 1926, modifiée par celle du 22 avril 1927, régissant les relations entre locataires et propriétaires de locaux à usage commercial ou industriel, nonobstant l'article 11 du Code Civil et les exceptions ou restrictions applicables aux étrangers en vertu des lois précitées.

Je prends acte de ce que, suivant les lois des différents Etats de l'Union et du District de Columbia, les citoyens français résidant aux Etats-Unis jouissent du même traitement que les citoyens américains lorsqu'il s'agit de donner ou de prendre à bail des propriétés immobilières./.

Veuillez agréer, Monsieur l'Ambassadeur, les assurances de ma très haute considération.

MR. AMBASSADOR,

By a letter of the 23d of last month you acquainted me with your Government's interpretation of article 7 of the consular convention concluded on February 23, 1853, between France and the United States of America, dealing with the rights of American citizens in France in relation to the French rent law.

I have the honor to inform Your Excellency that the French Government accepts, for the future application of the convention, the following interpretation, already valid in the past.

The effect of the provisions of article 7 is to secure for citizens of the United States residing in France the right to enjoy the same treatment as French citizens in matters relating to the ownership, possession, and disposal of real property. Consequently, citizens of the United States will enjoy in France the benefit of all the provisions, whether applicable to owners or tenants, of the French law of April 1, 1926, amended by the law of June 29, 1929, governing the relations between lessors and lessees of premises used for residential purposes, and the law of June 30, 1926, amended by the law of April 22, 1927, governing the relations between tenants and landlords of premises used for commercial and industrial purposes, notwithstanding article 11 of the Civil Code and the exceptions or restrictions applicable to foreigners under the aforesaid laws.

Pour remplir les obligations et les garanties stipulées en vue d'obtenir l'emprunt émis conformément au Protocole du 3 octobre 1919, le Représentant Fiscal et le Représentant Fiscal-adjoint exerceront les attributions ci-après déterminées.

ARTICLE VIII

Les droits de douane constituant le gage principal des porteurs des obligations de l'emprunt de 1922, le Représentant Fiscal aura dans ses attributions, jusqu'au remboursement ou rachat anticipé du dit emprunt, la direction du Service douanier et l'application des lois y relatives. Il inspectera, en outre, toutes les activités de l'Administration générale des Contributions, et fera les recommandations utiles pour la bonne marche de cette administration; il sera chargé du service des Paiements existant, sous réserve des dispositions de l'article XII ci-après; il tiendra pour toutes les recettes et dépenses, des comptes adéquats, lesquels seront ouverts à l'examen et à la

The President of Haiti, upon the presentation which will be made to him by the Secretary of State for Finance, will commission as of January 1, 1934, the employees occupying positions of authority and trust under the Fiscal Representative and recommended by the latter. Thereafter, any position which may become vacant among the commissioned employees shall be filled by examination, the form and procedure of which shall be determined by an accord between the Secretary of State for Finance and the Fiscal Representative. The successful competitor in such examination shall be recommended for the vacancy and will be commissioned by the President of Haiti. Such commissioned employees may be suspended without pay by the Fiscal Representative, on charges filed with the Secretary of State for Finance and such employee or assistant shall not be reinstated unless the charges shall have been disproved to the satisfaction of the Secretary of State for Finance, and of the Fiscal Representative. En vue de bien remplir les obligations de sa charge, le Représentant Fiscal pourra avoir tous employés et assistants qui pourront paraître nécessaires. Le nombre des américains ainsi employés ne devra pas excéder dix-huit. Le Président d'Haiti, sur la présentation qui lui en sera faite par le Secrétaire d'Etat des Finances, commissionnera à la date du 1er janvier 1934, les employés occupant les postes d'autorité et de confiance dans les services du Représentant Fiscal et recommandés par ce dernier. Dans la suite, tout poste qui pourra devenir vacant parmi les employés commissionnés, sera comblé par la voie d'un concours dont le mode et la procédure seront arrêtés par le Secrétaire d'Etat des Finances d'accord avec le Représentant Fiscal. Le concurrent qui aura triomphé sera recommandé pour le poste vacant et sera commissionné par le Président d'Haiti. Un employé commissionné pourra être suspendu avec perte de salaire, par le Représentant Fiscal, sur des griefs présentés au Secrétaire d'Etat des Finances; un tel employé ne sera pas réintégré, si les charges contre lui ne sont pas réfutées à la satisfaction du Secrétaire d'Etat des Finances et du Représentant Fiscal. Pendant l'enquête sur les griefs avancés, le Représentant Fiscal, aprés rapport au Secrétaire d'Etat des Finances, pourra combler la va-

vacancy provisionally, if necessary, until the charges have been disproved or a new commission issued.

ARTICLE IX

The salaries of the Fiscal Representative and of the Deputy Fiscal Representative shall be made the subject of an accord between the two Governments. These salaries, together with the expenses of the activities of the Fiscal Representative, but excluding the expenses of the Internal Revenue Inspection Service, may not exceed five per centum of customs receipts except by agreement between the two Governments.

ARTICLE X

The Internal Revenue Service, the personnel of which shall be exclusively Haitian, shall be placed in charge of a Haitian Director under the Secretary of State for Finance.

Nevertheless, if the Fiscal Representative should notify the Secretary of State for Finance and the Director General of Internal Revenue in writing that there is reason to suppose any officer or employee of the Internal Revenue Service is inefficient, or that his action is not correct, such officer or employee shall be suspended, and not reinstated unless the charges shall have been disproved to the satisfaction of the Secretary of State for Finance.

The expenses of the Internal Revenue Service shall be paid from the funds set aside for this purpose by the National Bank

cance provisoirement, si c'est nécessaire, jusqu'à ce que les charges aient été réfutées ou qu'une nouvelle commission ait été émise.

ARTICLE IX

Les salaires du Représentant Fiscal et du Représentant Fiscal-adjoint feront l'objet d'un accord entre les deux Gouvernements. Ces deux salaires, ainsi que l'ensemble des dépenses des services placés sous les ordres du Représentant Fiscal, non compris les dépenses du Service d'inspection des Recettes internes, ne doivent pas excéder cinq p. 100 des recettes douanières, sauf entente entre les deux Gouvernements.

ARTICLE X

Un Directeur haitien sera chargé de l'Administration générale des Contributions, sous le contrôle du Secrétaire d'Etat des Finances, et avec un personnel exclusivement haitien.

Néanmoins, si le Représentant Fiscal faisait rapport par écrit au Directeur général des Contributions et au Secrétaire d'Etat des Finances qu'il y avait motif à supposer qu'un fonctionnaire ou employé quelconque de l'administration des Contributions fut inférieur à sa tâche, ou que ses actes ne fussent pas corrects, ce fonctionnaire ou employé sera suspendu de ses fonctions, et il ne sera pas réintégré tout le temps que les charges portées n'auront pas été réfutées à la satisfaction du Secrétaire d'Etat des Finances.

Les dépenses de l'Administration générale des Contributions seront effectuées sur les fonds mis de côté à cette fin, par la

of the Republic of Haiti in accordance with schedules of payments agreed upon between the Secretary of State for Finance and the Fiscal Representative. These expenses shall not exceed ten per centum of internal revenue receipts, and the expenses of the Internal Revenue Inspection Service shall not exceed five per centum of internal revenue receipts. Any sums not required by the Internal Revenue Inspection Service within this allowance shall be made available to the Internal Revenue Service.

ARTICLE XI

On and after January 1, 1934, all monies received by or for the Haitian Government shall be deposited in the National Bank of the Republic of Haiti to the credit of the Haitian Government with the exception of the five per centum of customs revenues foreseen in Article IX above and the amounts needed for payments connected with execution of the loan contracts, which amounts shall be credited to the Fiscal Representative. The National Bank of the Republic of Haiti also shall set aside preferentially each month to the credit of the Fiscal Representative the amounts provided in Article X above for the expenses of the Internal Revenue Service and of the Internal Revenue Inspection Service.

In order to assure the maintenance of public order, the monthly allocation for the Garde d'Haiti will be set aside preferentially by the National Bank of the Republic of Haiti for the exclusive use of the Garde from the funds thereafter remaining.

Banque Nationale de la République d'Haiti, et suivant des états de paiement convenus entre le Secrétaire d'Etat des Finances et le Représentant Fiscal. Ces dépenses ne devront pas excéder dix p. 100 des recettes internes; et les dépenses du Service d'inspection des Recettes internes ne devront pas excéder cinq p. 100 des dites recettes. Toute somme non requise pour le Service d'inspection des Recettes internes, dans les limites de l'allocation pour ce Service, sera mise à la disposition de l'Administration générale des Contributions.

ARTICLE XI

A partir du 1er janvier 1934, tous les fonds recouvrés pour le Gouvernement haitien seront déposés, au nom du Gouvernement haitien, à la Banque Nationale de la République d'Haiti, à l'exception des cinq p. 100 des recettes douanières prévus à l'article IX ci-dessus et des fonds exigibles pour les paiements afférents au service des contrats d'emprunt, lesquelles valeurs seront portées au crédit du Représentant Fiscal. La Banque Nationale de la République d'Haiti prélèvera et mettra de coté aussi, chaque mois, et portera au crédit du Représentant Fiscal, les valeurs prévues à l'Article X ci-dessus pour les dépenses de l'Adminstration générale des Contributions et du Service d'inspection des Recettes internes.

Ante, p. 1780.

En vue d'assurer le maintien de l'ordre public, l'allocation mensuelle de la Garde d'Haiti sera ensuite prélevée et mise de côté par la Banque Nationale de la République d'Haiti et affectée exclusivement à l'usage de la Garde d'Haiti.

ARTICLE XII

All payments of Government funds shall continue to be made by checks prepared by the Service of Payments. The existing arrangement, as agreed upon between the two Governments on August 5, 1931, shall continue to govern this service except that all checks henceforth will be signed by the Secretary of State for Finance, or his delegate, reserve being made in the case of those checks drawn against the funds deposited at the National Bank of the Republic of Haiti to the credit of the Fiscal Representative, which checks shall be signed only by the latter, or his delegate.

ARTICLE XIII

Each year, by January 31st at the latest, the Fiscal Representative shall present a detailed estimate of receipts for the following fiscal year. Except by special agreement, the budget of the Republic shall not exceed the amount of probable ways and means which the Secretary of State for Finance and the Fiscal Representative shall have agreed upon.

ARTICLE XIV

The Haitian Government may authorize any appropriations whatsoever if unobligated funds are available, or derivable at an early date from the ordinary revenues, to cover such appropriations after setting up such reserves as may appear to the Secretary of State for Finance and the Fiscal Representative to be necessary.

ARTICLE XII

Tous les paiements sur les fonds du Gouvernement continueront à être effectués par chèques préparés par le Service des Paiements. L'arrangement existant, suivant l'Accord du 5 août 1931, entre les deux Gouvernements, continuera à régir ce service, sauf que tous les chèques seront dorénavant signés par le Secrétaire d'Etat des Finances ou son délégué, réserve faite des chèques tirés sur les fonds déposés à la Banque Nationale de la République d'Haiti au crédit du Représentant Fiscal, lesquels seront signés par ce dernier seulement, ou son délégué.

ARTICLE XIII

Chaque année au 31 janvier au plus tard, le Représentant Fiscal présentera une estimation détaillée des recettes pour l'année budgétaire suivante. Le budget de la République, à moins d'une entente spéciale, ne devra pas dépasser le montant des voies et moyens probable qui aura été arrêté par le Secretaire d'Etat des Finances et le Représentant Fiscal.

ARTICLE XIV

Le Gouvernement haitien est libre d'autoriser tout crédit quel qu'il soit, si des fonds non affectés sont disponibles ou peuvent, à une date rapprochée, être tirés des recettes ordinaires, pour servir de voies et moyens à ce crédit, après la constitution des réserves qui pourront paraitre nécessaires au Secrétaire d'Etat des Finances et au Représentant Fiscal.

ARTICLE XV

In case of a probable budgetary deficit, expenditures must be brought to the level of ways and means, either by reducing expenditures or by the creation of new receipts. In every case, it will not be possible without the accord of the Fiscal Representative to cover a deficit by calling upon the reserve funds of the Government.

ARTICLE XVI

There shall be included annually in the budget of the Republic the amounts necessary for the regular service of the funded debt and other contractual obligations, as well as two lump sums representing five per centum of customs and five per centum of internal revenues, respectively, for the payment of the expenses of the Fiscal Representative, and those of the Internal Revenue Inspection Service, and finally a lump sum representing ten per centum of internal revenue receipts for the payment of the expenses of the Internal Revenue Service. The balance may be apportioned by the Haitian Government between the budgets of the various departments as it may see fit. If the revenues received in any month shall be insufficient to meet the full debt service and expenses of collection, the Government will make available the amount required to make up the difference.

ARTICLE XVII

Without the accord of the Fiscal Representative no new financial obligation will be assumed

ARTICLE XV

En cas de déficit probable au budget, les dépenses devront être ramenées au niveau des voies et moyens, soit par compression des dépenses, soit par création de nouvelles recettes. Toutefois, il ne sera pas possible de couvrir un déficit budgétaire en faisant appel aux fonds de réserve du Gouvernement, sans l'accord du Représentant Fiscal.

ARTICLE XVI

Il sera inscrit chaque année au Budget de la République les valeurs nécessaires pour le service régulier des obligations de la dette publique et autres obligations contractuelles, ainsi que les deux valeurs globales représentant respectivement les cinq p. 100 des recettes douanières et des recettes internes pour le paiement des dépenses du Représentant Fiscal, et du Service d'inspection des Recettes internes, et aussi une valeur globale représentant dix p. 100 des recettes internes pour le paiement des dépenses de l'Administration générale des Contributions. Le solde restant pourra être réparti par le Gouvernement haitien entre les budgets des divers départements ministériels comme bon lui semblera. Si les revenus recouvrés au cours d'un mois quelconque sont insuffisants pour couvrir le service intégral de la dette et les dépenses de perception, le Gouvernement rendra disponible la valeur requise pour couvrir le déficit.

ARTICLE XVII

Le Gouvernement haitien n'assumera aucune nouvelle obligation financière, à moins que les

unless the ordinary revenues of the Republic, after defraying the expenses of the Government, shall be adequate to assure the final discharge of such obligation.

ARTICLE XVIII

The Government will not dispose of its investments except with the accord of the Fiscal Representative.

ARTICLE XIX

The present finance law shall be the organic act of the Republic so far as concerns the administration of government finances.

ARTICLE XX

The Government of Haiti agrees not to reduce the tariff nor to modify the taxes and internal revenues in such a manner as to reduce the total amount thereof without the accord of the Fiscal Representative.

ARTICLE XXI

The Custom Houses of the Republic will have an exclusively Haitian personnel and the title of Director shall be reestablished in lieu of that of Collector. However, inspectors of the Customs Service may be assigned, either temporarily or permanently, to oversee the operation and the strict application of the customs laws.

ARTICLE XXII

In case of payment under protest of customs duties or internal revenue taxes, and where restitu-

revenus ordinaires de la République, après que les dépenses courantes du Gouvernement auront été défrayées, ne soient suffisants pour assurer l'acquittement de l'obligation et cela d'accord avec le Représentant Fiscal.

ARTICLE XVIII

Le Gouvernement haitien ne disposera pas de ses placements, si ce n'est d'accord avec le Représentant Fiscal.

ARTICLE XIX

La loi de Finances actuelle deviendra une loi organique de la République en ce qui concerne l'administration des Finances du Gouvernement.

ARTICLE XX

Le Gouvernement Haitien convient de ne pas réduire le tarif, ni modifier les taxes internes, de manière à en réduire le rendement total, sans l'accord du Représentant Fiscal.

ARTICLE XXI

Les Douanes de la République auront un personnel exclusivement haitien et le titre de Directeur sera rétabli en lieu et place de celui de Collecteur. Cependant des inspecteurs du Service du Représentant Fiscal, pourront y être délégués, soit temporairement, soit à poste fixe, pour en surveiller les opérations et la stricte application des lois douanières.

ARTICLE XXII

En cas de paiement sous protêt de droits de douane ou de taxes internes, et au cas où une resti-

tion of such payment is requested, a written claim shall be presented to the competent service within a time limit of thirty working days beginning with the date on which the duties or taxes were paid. If the decision is not accepted, the matter shall be presented to a commission composed of a representative of the Secretary of State for Finance and a representative of the Fiscal Representative.

If there should still be failure to reach an agreement, the claim for restitution shall be decided by legal proceedings, but the State may not be liable for any compensatory or punitive damages.

tution du montant payé est demandée, une réclamation écrite sera faite au service compétent dans le délai de trente jours ouvrables commençant à la date à laquelle les droits ou les taxes auront été payés. Si la décision n'est pas acceptée, l'affaire sera présentée à une commission formée d'un délégué du Secrétaire d'Etat des Finances et d'un délégué du Représentant Fiscal.

Si le désaccord persiste, la demande de restitution sera décidée par la voie judiciaire, sans que l'Etat puisse être condamné à des dommages-intérêts ou astreintes.

ARTICLE XXIII

In view of the fact that under normal conditions the operation of the sinking fund will result in retirement of the outstanding series of the loan authorized by the law of June 26, 1922, approximately by the year 1944, and inasmuch as any further issue of the loan would necessarily extend the operation of this agreement, to a period beyond that year, which extension is contrary to their desire, it is hereby agreed by both Governments that the loan shall be considered closed and that no additional series shall be issued thereunder.

ARTICLE XXIII

Vu que, dans les conditions normales, le paiement régulier des fonds d'amortissement aura pour résultat le retrait, vers l'année 1944, des séries en circulation de l'emprunt autorisé par la loi du 26 juin 1922, et vu que l'émission d'une autre série de l'emprunt prolongerait nécessairement, au-delà de cette date, la durée du présent accord, ce qui serait contraire au désir des deux Gouvernements, les deux Gouvernements conviennent que l'emprunt est considéré comme fermé et qu'aucune série additionnelle ne sera émise.

ARTICLE XXIV

In case there should appear to be occasion for judicial proceedings against the Fiscal Representative or his American assistants, the two Governments, in order to avoid possible misunderstand-

ARTICLE XXIV

Dans le cas où l'occasion se présenterait d'exercer une action judiciaire contre le Représentant Fiscal, ou ses assistants américains, les deux Gouvernements, dans le but d'éviter toute possi-

ing, agree to examine each case impartially and to agree upon the legal action which might be appropriate.

ARTICLE XXV

The Haitian Government, upon the signature of the present agreement, will issue irrevocable instructions to the National Bank of the Republic of Haiti in order that there may be full and complete execution of the clauses herein respecting the deposit and disbursement of the funds of the Government.

ARTICLE XXVI

The Haitian Government reserves the right to retire the bonds issued in accord with the Protocol of October 3, 1919, in advance of their due date; and the Government of the United States will not invoke the provisions of Article VI of the Protocol as an obstacle to such retirement before the expiration of the period of fifteen years fixed therein, provided that the Haitian Government is able to make an arrangement for this purpose satisfactory to the holders of the outstanding bonds.

In this case the provisions of this accord shall automatically become null and void and of no effect upon the completion of the funding operation. The Haitian Government in order to hasten the retirement of the loan of 1922 may continue as rapidly as its resources will permit, to buy on the open market bonds of the several series of the said loan.

bilité de malentendu, conviennent d'examiner impartialement un tel cas, et de se mettre d'accord sur l'action légale appropriée.

ARTICLE XXV

Le Gouvernement haitien, dès la signature du présent Protocole, enverra des instructions irrévocables à la Banque Nationale de la République d'Haiti, afin qu'il y ait exécution pleine et entière des clauses des présentes, relatives au dépôt et à la sortie des fonds du Gouvernement.

ARTICLE XXVI

Le Gouvernement haitien se réserve le droit de racheter par anticipation les obligations émises en accord avec le Protocole du 3 octobre 1919, dont le Gouvernement des Etats-Unis n'invoquera pas l'article VI comme un obstacle à ce rachat avant l'expiration de la période de quinze ans fixée par ce Protocole, pourvu que le Gouvernement haitien puisse à cet effet faire des arrangements satisfaisants avec les porteurs des obligations en circulation.

En ce cas, les stipulations du présent Accord deviendront automatiquement nulles et non avenues à la réalisation de l'opération de rachat. Le Gouvernement Haitien, en vue de rapprocher l'échéance de l'emprunt de 1922, pourra continuer, au fur et à mesure que ses ressources le lui permettront, à acheter en marché ouvert les titres des diverses séries du dit emprunt.

ARTICLE XXVII

Any controversy which may arise between the two Governments on the subject of the clauses of the present accord shall be submitted to arbitration in case it cannot be settled through diplomatic channels, in accordance with the Arbitration Treaty of January 7, 1909 between the two countries.

Signed at Port-au-Prince in duplicate in the English and French languages, this seventh day of August, 1933.

ARTICLE XXVII

Toutes les controverses qui pourraient s'élever entre les deux Gouvernements au sujet des clauses du présent accord, seront soumises à l'arbitrage, au cas où elles ne pourraient pas être réglées par la voie diplomatique conformément au Traité d'arbitrage du 7 janvier 1909 entre les deux pays.

The Secretary of State (Hull) to the Swedish Chargé d'Affaires ad interim (Beck-Friis)

DEPARTMENT OF STATE,
Washington, September 8, 1933.

SIR:

Reciprocal arrangement with Sweden for air navigation.

Reference is made to the negotiations which have taken place between the Government of the United States of America and the Government of Sweden for the conclusion of a reciprocal air navigation arrangement between the United States of America and Sweden, governing the operation of civil aircraft of the one country in the other country.

It is my understanding that it has been agreed in the course of the negotiations, now terminated, that this arrangement shall be as follows:

Arrangement between the United States of America and Sweden concerning the operation of civil aircraft of the one country in the territory of the other country.

ARTICLE 1

Terms.

Pending the conclusion of a convention between the United States of America and Sweden on the subject of air navigation, the operation of civil aircraft of the one country in the other country shall be governed by the following provisions.

ARTICLE 2

Area affected.

The present arrangement shall apply to continental United States of America, exclusive of Alaska, and to Sweden, including the adjacent territorial waters of the two countries.

ARTICLE 3

Aircraft construed.

The term aircraft with reference to one or the other party to this arrangement shall be understood to mean civil aircraft, including state aircraft used exclusively for commercial purposes, duly registered in the territory of such party.

ARTICLE 4

Liberty of passage.

Each of the parties undertakes to grant liberty of passage above its territory in time of peace to the aircraft of the other party, provided that the conditions set forth in the present arrangement are observed.

Regular air routes.

It is, however, agreed that the establishment and operation of regular air routes by an air transport company of one of the parties within the territory of the other party or across the said territory,

with or without intermediary landing, shall be subject to the prior consent of the other party given on the principle of reciprocity and at the request of the party whose nationality the air transport company possesses.

Each party to this arrangement agrees that its consent for operations over its territory by air transport companies of the other party may not be refused on unreasonable or arbitrary grounds. The consent may be made subject to special regulations relating to aerial safety and public order.

The parties to this arrangement agree that the period in which pilots may, while holding valid pilot licenses issued or rendered valid by either country, operate registered aircraft of that country in the other country for non-industrial or non-commercial purposes shall be limited to a period not exceeding six months from the time of entry for the purpose of operating aircraft, unless prior to the expiration of this period the pilots obtain from the Government of the country in which they are operating, pilot licenses authorizing them to operate aircraft for non-industrial or non-commercial purposes.

ARTICLE 5

Jurisdiction over aircraft, etc.

The aircraft of each of the parties to this arrangement, their crews and passengers, shall, while within the territory of the other party, be subject to the general legislation in force in that territory as well as the regulations in force therein relating to air traffic in general, to the transport of passengers and goods and to public safety and order in so far as these regulations apply to all foreign aircraft, their crews and passengers.

Each of the parties to this arrangement shall permit the import or export of all merchandise which may be legally imported or exported and also the carriage of passengers, subject to any customs, immigration and quarantine restrictions, into or from their respective territories in the aircraft of the other party, and such aircraft, their passengers and cargoes, shall enjoy the same privileges as and shall not be subjected to any other or higher duties or charges than those which the aircraft of the country, imposing such duties or charges, engaged in international commerce, and their cargoes and passengers, or the aircraft of any foreign country likewise engaged, and their cargoes and passengers, enjoy or are subjected to.

Each of the parties to this arrangement may reserve to its own aircraft air commerce between any two points neither of which is in a foreign country. Nevertheless the aircraft of either party may proceed from any aerodrome in the territory of the other party which they are entitled to use to any other such aerodrome either for the purpose of landing the whole or part of their cargoes or passengers or of taking on board the whole or part of their cargoes or passengers, provided that such cargoes are covered by through bills of lading, and such passengers hold through tickets, issued respectively for a journey whose starting place and destination both are not points between which air commerce has been duly so reserved, and such aircraft, while proceeding as aforesaid, from one aerodrome to another, shall, notwithstanding that such aerodromes are points between which air commerce has been duly reserved, enjoy all the privileges of this arrangement.

ARTICLE 6

Reservation of right to forbid flights over designated areas.

Each of the parties to this arrangement reserves the right to forbid flights over certain areas of its territory which are or may hereafter be designated as prohibited areas.

Each of the parties reserves the right under exceptional circumstances in time of peace and with immediate effect temporarily to limit or prohibit air traffic above its territory on condition that in this respect no distinction is made between the aircraft of the other party and the aircraft of any foreign country.

ARTICLE 7

Aircraft over prohibited area.

Any aircraft which finds itself over a prohibited area shall, as soon as it is aware of the fact, give the signal of distress prescribed in the Rules of the Air in force in the territory flown over and shall land as soon as possible at an aerodrome situated in such territory outside of but as near as possible to such prohibited area.

ARTICLE 8

Identification.

All aircraft shall carry clear and visible nationality and registration marks whereby they may be recognized during flight. In addition, they must bear the name and address of the owner.

All aircraft shall be provided with certificates of registration and of airworthiness and with all the other documents prescribed for air traffic in the territory in which they are registered.

The members of the crew who perform, in an aircraft, duties for which a special permit is required in the territory in which such aircraft is registered, shall be provided with all documents and in particular with the certificates and licenses prescribed by the regulations in force in such territory.

The other members of the crew shall carry documents showing their duties in the aircraft, their profession, identity and nationality.

The certificates of airworthiness, certificates of competency and licenses issued or rendered valid by one of the parties to this arrangement in respect of an aircraft registered in its territory or of the crew of such aircraft shall have the same validity in the territory of the other party as the corresponding documents issued or rendered valid by the latter.

Each of the parties reserves the right for the purpose of flight within its own territory to refuse to recognize certificates of competency and licenses issued to nationals of that party by the other party.

ARTICLE 9

Radio regulations.

Aircraft of either of the parties to this arrangement may carry wireless apparatus in the territory of the other party only if a license to install and work such apparatus shall have been issued by the competent authorities of the party in whose territory the aircraft is registered. The use of such apparatus shall be in accordance with the regulations on the subject issued by the competent authorities of the territory within whose air space the aircraft is navigating.

Such apparatus shall be used only by such members of the crew as are provided with a special license for the purpose issued by the Government of the territory in which the aircraft is registered.

The parties to this arrangement reserve respectively the right, for reasons of safety, to issue regulations relative to the obligatory equipment of aircraft with wireless apparatus.

ARTICLE 10

Transportation of munitions prohibited.

No arms of war, explosives of war, or munitions of war shall be carried by aircraft of either party above the territory of the other party or by the crew or passengers, except by permission of the competent authorities of the territory within whose air space the aircraft is navigating.

ARTICLE 11

Upon the departure or landing of any aircraft each party may within its own territory and through its competent authorities search the aircraft of the other party and examine the certificates and other documents prescribed. Inspection.

ARTICLE 12

Aerodromes open to public air traffic in the territory of one of the parties to this arrangement shall in so far as they are under the control of the party in whose territory they are situated be open to all aircraft of the other party, which shall also be entitled to the assistance of the meteorological services, the wireless services, the lighting services and the day and night signalling services, in so far as the several classes of services are under the control of the party in whose territory they respectively are rendered. Any scale of charges made, namely, landing, accomodation or other charge, with respect to the aircraft of each party in the territory of the other party, shall in so far as such charges are under the control of the party in whose territory they are made be the same for the aircraft of both parties. Aerodromes.

ARTICLE 13

All aircraft entering or leaving the territory of either of the parties to this arrangement shall land at or depart from an aerodrome open to public air traffic and classed as a customs aerodrome at which facilities exist for enforcement of immigration regulations and clearance of aircraft, and no intermediary landing shall be effected between the frontier and the aerodrome. In special cases the competent authorities may allow aircraft to land at or depart from other aerodromes, at which customs, immigration and clearance facilities have been arranged. The prohibition of any intermediary landing applies also in such cases. Landings.

In the event of a forced landing outside the aerodromes, referred to in the first paragraph of this article, the pilot of the aircraft, its crew and the passengers shall conform to the customs and immigration regulations in force in the territory in which the landing has been made.

Aircraft of each party to this arrangement are accorded the right to enter the territory of the other party subject to compliance with quarantine regulations in force therein.

The parties to this arrangement shall exchange lists of the aerodromes in their territories designated by them as ports of entry and departure.

ARTICLE 14

Each of the parties to this arrangement reserves the right to require that all aircraft crossing the frontiers of its territory shall do so either between certain points, or close by an aviation customs office in that territory, at such altitude that signals can be received, even though there should be no landing of the aircraft. The contracting parties shall inform each other of the points where the respective frontiers thus may be crossed. Flight restrictions.

It is understood that neither of the courses mentioned in the preceding paragraph exempts aircraft crossing the frontiers of either party from the obligation of landing at a regular airport of entry, as stipulated in Article 13.

ARTICLE 15

As ballast, only fine sand or water may be dropped from an aircraft. Ballast.

ARTICLE 16

Permits to unload.

No article or substance, other than ballast, may be unloaded or otherwise discharged in the course of flight unless special permission for such purpose shall have been given by the authorities of the territory in which such unloading or discharge takes place.

ARTICLE 17

Nationality of aircraft.

Whenever questions of nationality arise in carrying out the present arrangement, it is agreed that every aircraft shall be deemed to possess the nationality of the party in whose territory it is duly registered.

ARTICLE 18

Intercommunication of regulations.

The parties to this arrangement shall communicate to each other the regulations relative to air traffic in force in their respective territories.

ARTICLE 19

Duration.

The present arrangement shall be subject to termination by either party upon sixty days' notice given to the other party or by the enactment by either party of legislation inconsistent therewith.

I shall be glad to have you inform me whether the text of the arrangement herein set forth is as agreed to by your Government. If so, it is suggested that it should be understood that the arrangement will become effective on October 9, 1933.

Accept, Sir, the renewed assurances of my high consideration.

CORDELL HULL

BARON JOHAN BECK-FRIIS,
Chargé d'Affaires ad interim of Sweden.

The Swedish Chargé d'Affaires ad interim (Beck-Friis) to the Secretary of State (Hull)

LEGATION OF SWEDEN,
Washington, D.C., September 8, 1933.

SIR:

Reference is made to the negotiations which have taken place between the Government of Sweden and the Government of the United States of America for the conclusion of a reciprocal air navigation arrangement between Sweden and the United States of America, governing the operation of civil aircraft of the one country in the other country.

It is my understanding that it has been agreed in the course of the negotiations, now terminated, that this arrangement shall be as follows:

"Avtal mellan Sverige och Amerikas Förenta Stater angående framförande av i det ena landet hemmahörande civila luftfartyg inom det andra landets område.

Medlemmar av besättningen, som ombord å luftfartyg fullgöra åligganden, för vilka särskilt tillstånd fordras inom det område, varest sådant luftfartyg är registrerat, skola vara försedda med alla de handlingar och särskilt med de certifikat och tillståndsbevis, som föreskrivas genom bestämmelser, som äro gällande inom ifrågavarande område.

Övriga medlemmar av besättningen skola innehava handlingar, utvisande deras åligganden ombord å luftfartyget samt deras yrke, identitet och nationalitet.

Luftvärdighetsbevis, behörighetscertifikat och tillståndsbevis, som utfärdats eller förklarats giltiga av en av de kontraherande parterna beträffande luftfartyg, registrerat inom dess område, eller beträffande besättningen å sådant luftfartyg, skola hava samma giltighet inom den andra partens område som motsvarande handlingar, vilka utfärdats eller förklarats giltiga av den sistnämnda parten.

Envar av de fördragsslutande parterna förbehåller sig rätt att, i fråga om luftfart inom dess eget område, vägra att erkänna behörighetscertifikat och tillståndsbevis, som utfärdats för en av dess egna medborgare av den andra parten.

ARTIKEL 9.

Luftfartyg tillhörande en av de fördragsslutande parterna äger medföra radioapparat inom den andra partens område endast om tillstånd till installerande och begagnande av dylik apparat meddelats av vederbörande myndighet i den stat, inom vars område luftfartyget är registrerat. Begagnande av sådana apparater skall ske i överensstämmelse med de bestämmelser i ämnet, som utfärdats av vederbörande myndigheter i det land, inom vars luftområde luftfartyget framföres.

Dylik apparat må endast brukas av sådana medlemmar av besättningen, som äro i besittning av särskilt för sådant ändamål av regeringen i det område, inom vilket luftfartyget är registrerat, utfärdat certifikat.

De fördragsslutande parterna förbehålla sig rätt att, av säkerhetsskäl, var för sig utfärda bestämmelser beträffande skyldighet att förse luftfartyg med radioapparater.

ARTIKEL 10.

Krigsvapen, explosiva varor eller krigsammunition få icke befordras å luftfartyg, tillhörigt endera parten, över den andra partens område eller av besättning eller passagerare, såvida icke tillstånd erhållits av vederbörande myndighet i det land, inom vars luftområde luftfartyget framföres.

ARTIKEL 11.

Vid ett luftfartygs avgång eller landning må vardera parten inom sitt eget område och genom dess vederbörande myndigheter visitera den andra partens luftfartyg samt granska certifikat och andra föreskrivna handlingar.

ARTIKEL 12.

Flygplats upplåten för allmän lufttrafik inom en av de fördragsslutande parternas område skall, i den mån den står under kontroll av den part, inom vilkens område den är belägen, vara öppen för alla den andra partens luftfartyg, vilka också skola vara berättigade att erhålla väderlekstjänst, radiotjänst, belysningstjänst samt signaltjänst såväl dag som natt, i den mån de olika slagen av tjänster äro

Envar av de fördragsslutande staterna skall tillåta att med den andra partens luftfartyg till och från parternas respektive områden dels importeras och exporteras alla varor, som lagligen må importeras och exporteras, dels befordras passagerare, allt dock i den mån tull-, immigrations- och karantänsbestämmelser så medgiva. Sådana luftfartyg, deras passagerare och last skola komma i åtnjutande av samma förmåner som och skola icke påläggas andra eller högre avgifter eller pålagor än dem, som gälla för i internationell lufttrafik använda luftfartyg tillhörande det land, som pålägger nämnda avgifter och pålagor, eller dessa luftfartygs laster och passagerare eller på liknande sätt använda luftfartyg, tillhöriga någon främmande nation och dessa luftfartygs laster och passagerare.

Envar av de fördragsslutande parterna har rätt att förbehålla sina egna luftfartyg handelsluftfart mellan två punkter, av vilka ingendera är belägen i ett främmande land. Dock må luftfartyg, tillhörande en av parterna, framföras från en inom den andra partens område belägen flygplats, som den är berättigad att begagna, till en annan sådan flygplats vare sig i avsikt att urlasta hela eller en del av lasten eller att avlämna en eller flera passagerare eller att taga ombord hela eller en del av lasten eller en eller flera passagerare. Förutsättning för nämnda medgivande är emellertid, att sådan last är upptagen å genomgående fraktsedel och att sådana passagerare innehava genomgående biljetter, utställda för en resa, vars såväl avgångs- som adresstation icke äro belägna å ställen, mellan vilka luftfart i behörig ordning förbehållits det egna landets luftfartyg. Luftfartyg, vilket, såsom förut sagts, framföres från en flygplats till en annan, skall åtnjuta alla de förmåner, som stadgas i detta avtal, oaktat flygplatserna äro belägna å orter, mellan vilka luftfart i behörig ordning förbehållits det egna landets luftfartyg.

ARTIKEL 6.

Envar av de fördragsslutande parterna förbehåller sig rätt att förbjuda luftfart över vissa områden av dess territorium, vilka äro eller hädanefter må bliva betecknade som förbjudna områden.

Envar av de fördragsslutande parterna förbehåller sig rätt att, till följd av undantagsvis föreliggande omständigheter, i fredstid, med omedelbar verkan temporärt inskränka eller förbjuda luftfart över dess territorium under villkor att i förevarande hänseende ingen skillnad göres mellan luftfartyg tillhörande den andra parten och luftfartyg tillhörande annan främmande stat.

ARTIKEL 7.

Varje luftfartyg, som finner sig hava inkommit över ett förbjudet område, skall, så snart det blir varse detta, giva den nödsignal, som är föreskriven i de luftfartsbestämmelser, som äro gällande inom det territorium, som överflyges, och skall landa så snart som möjligt å en flygplats belägen inom detta territorium utanför, men så nära som möjligt, det förbjudna området.

ARTIKEL 8.

Alla luftfartyg skola föra tydliga och synliga nationalitets- och registreringsmärken, genom vilka de skola kunna igenkännas under luftfärden. Dessutom skola å desamma ägarens namn och adress vara anbragta.

Å alla luftfartyg skola medföras registrerings- och luftvärdighetsbevis samt alla de övriga handlingar, som äro föreskrivna för lufttrafik inom det område, varest luftfartygen äro registrerade.

ARTIKEL 17.

Då fråga angående nationalitet uppkommer vid tillämpningen av detta avtal, är det överenskommet, att varje luftfartyg skall anses hava det lands nationalitet, inom vars område det är i vederbörlig ordning registrerat.

ARTIKEL 18.

De fördragsslutande parterna skola ömsesidigt meddela varandra de bestämmelser beträffande lufttrafik, som äro gällande inom deras respektive områden.

ARTIKEL 19.

Detta avtal kan frånträdas av endera parten genom uppsägning sextio dagar i förväg hos den andra parten eller genom att endera parten antager en författning, som strider mot avtalet."

I shall be glad to have Your Excellency inform me whether the text of the arrangement herein set forth is as agreed to by your Government. If so, it is suggested that it should be understood that the arrangement will become effective on October 9, 1933.

With renewed assurances of my highest consideration, I have the honour to remain, Sir,

Your most obedient servant,

JOHAN BECK-FRIIS

THE HONOURABLE
CORDELL HULL,
Secretary of State,
etc. etc. etc.

The Swedish Chargé d'Affaires ad interim (Beck-Friis) to the Secretary of State (Hull)

LEGATION OF SWEDEN,
Washington, D.C., September 9, 1933.

SIR:

Acceptance by Sweden.

I have the honour to acknowledge receipt of Your Excellency's communication of September 8, 1933, and to state that the text given therein of the arrangement between Sweden and the United States of America, governing the operation of civil aircraft of the one country in the other country, meets with the approval of the Swedish Government. There is agreement to the effect that the arrangement shall become effective on October 9, 1933.

With renewed assurances of my highest consideration, I have the honour to remain, Sir,

Your most obedient servant,

JOHAN BECK-FRIIS

THE HONOURABLE
CORDELL HULL,
Secretary of State,
etc. etc. etc.

under kontroll av den part, inom vilkens område de tillhandahållas. Varje taxa å avgifter för landning, hangarplats eller annat bistånd, som tillhandahålles den ena partens luftfartyg inom den andra partens område, skall, i den mån sådana avgifter äro under kontroll av den part, inom vilkens område de tillhandahållas, vara lika för båda parternas luftfartyg.

ARTIKEL 13.

Luftfartyg, som ankommer till eller avgår från en av de fördragsslutande parternas område, skall landa å eller starta från en flygplats, upplåten för allmän lufttrafik och betecknad som tullflygplats och varest möjlighet finnes för fullgörande av bestämmelser för immigration och klarering av luftfartyg, och ingen mellanlandning må äga rum mellan gränsen och denna flygplats. I särskilda fall må vederbörande myndighet tillåta luftfartyg att landa å eller starta från annan flygplats, varest möjlighet till tullbehandling, immigration och klarering ordnats. Förbudet mot mellanlandning avser även sådana fall.

Har nödlandning ägt rum utanför flygplats, som omförmäles i första stycket av denna artikel, skola luftfartygets förare, dess besättning och passagerare ställa sig till efterrättelse de tull- och immigrationsbestämmelser, som gälla inom det område, varest landningen ägt rum.

Luftfartyg hemmahörande i en av de fördragsslutande staterna, skola hava rätt att inkomma å den andra partens område, under förutsättning att de ställa sig till efterrättelse därstädes gällande karantänsföreskrifter.

De fördragsslutande parterna skola till varandra överlämna förteckningar å de inom deras områden belägna flygplatser, vilka av dem utsetts till ankomst- och avgångsorter.

ARTIKEL 14.

Envar av de fördragsslutande parterna förbehåller sig rätt att fordra, att alla luftfartyg, som överskrida gränserna för dess område, skola göra det antingen mellan vissa punkter eller i närheten av en tullflygplats inom dess område, på sådan höjd att signalering kan uppfattas, även om luftfartyget icke där landar. De kontraherande parterna skola underrätta varandra om de punkter, varest, i enlighet med vad sålunda bestämts, deras respektive gränser må passeras.

Det förutsättes, att ingen av de föreskrifter rörande inflygningsleder, vilka omförmälas i föregående stycke, befriar luftfartyg, som passerar endera partens gränser, från skyldighet att landa å flygplats, som, enligt bestämmelserna i artikel 13, är fastställd såsom inflygningsort.

ARTIKEL 15.

Från luftfartyg i luften må ej utkastas annan ballast än fin sand eller vatten.

ARTIKEL 16.

Under luftfärd må intet föremål eller ämne annat än ballast lossas eller på annat sätt avlastas, utan att särskilt tillstånd härtill givits av myndighet inom det område, varest sådan lossning eller avlastning skall äga rum.

The parties to this arrangement agree that the period in which pilots may, while holding valid pilot licenses issued or rendered valid by either country, operate registered aircraft of that country in the other country for non-industrial or non-commercial purposes shall be limited to a period not exceeding six months from the time of entry for the purpose of operating aircraft, unless prior to the expiration of this period the pilots obtain from the Government of the country in which they are operating, pilot licenses authorizing them to operate aircraft for non-industrial or non-commercial purposes.

MR. HALVARD H. BACHKE,
Minister of Norway.

The Norwegian Minister (Bachke) to the Secretary of State (Hull)

ROYAL NORWEGIAN LEGATION,
Washington, D.C., October 16, 1933.

SIR:

I have the honor to acknowledge the receipt of the note of October 16, 1933 in which Your Excellency communicated to me the text of the reciprocal air navigation arrangement between Norway and the United States of America, governing the operation of civil aircraft of the one country in the other country, as understood by Your Excellency to have been agreed to during the negotiations, now terminated, between the two countries. Acceptance by Norway.

The text communicated to me by Your Excellency is reproduced below:

ARTICLE 1

Pending the conclusion of a convention between Norway and the United States of America on the subject of air navigation, the operation of civil aircraft of the one country in the other country shall be governed by the following provisions.

ARTICLE 2

The present arrangement shall apply to Norway and the United States of America and likewise territories and possessions over which they respectively exercise jurisdiction, including territorial waters, with the exception of the Philippine Islands, Hawaiian Islands and the Panama Canal Zone.

ARTICLE 3

The term aircraft with reference to one or the other Party to this arrangement shall be understood to mean civil aircraft, including state aircraft used exclusively for commercial purposes, duly registered in the territory of such Party.

ARTICLE 4

Each of the parties undertakes to grant liberty of passage above its territory in time of peace to the aircraft of the other party, provided that the conditions set forth in the present arrangement are observed.

It is, however, agreed that the establishment and operation of regular air routes by an air transport company of one of the parties within the territory of the other party or across the said territory, with or without intermediary landing, shall be subject to the prior consent of the other party given on the principle of reciprocity and at the request of the party whose nationality the air transport company possesses.

Each party to this arrangement agrees that its consent for operations over its territory by air transport companies of the other party may not be refused on unreasonable or arbitrary grounds. The consent may be made subject to special regulations relating to aerial safety and public order.

The parties to this arrangement agree that the period in which pilots may, while holding valid pilot licenses issued or rendered valid by either country, operate registered aircraft of that country in the other country for non-industrial or non-commercial purposes shall be limited to a period not exceeding six months from the time of entry for the purpose of operating aircraft, unless prior to the expiration of this period the pilots obtain from the Government of the country in which they are operating, pilot licenses authorizing them to operate aircraft for non-industrial or non-commercial purposes.

ARTICLE 5

The aircraft of each of the parties to this arrangement, their crews and passengers, shall, while within the territory of the other party, be subject to the general legislation in force in that territory as well as the regulations in force therein relating to air traffic in general, to the transport of passengers and goods and to public safety and order in so far as these regulations apply to all foreign aircraft, their crews and passengers.

Each of the parties to this arrangement shall permit the import or export of all merchandise which may be legally imported or exported and also the carriage of passengers, subject to any customs, immigration and quarantine restrictions, into or from their respective territories in the aircraft of the other party, and such aircraft, their passengers and cargoes, shall enjoy the same privileges as and shall not be subjected to any other or higher duties or charges than those which the aircraft of the country imposing such duties or charges, engaged in international commerce, and their cargoes and passengers, or the aircraft of any foreign country likewise engaged, and their cargoes and passengers, enjoy or are subjected to.

Each of the parties to this arrangement may reserve to its own aircraft air commerce as defined in the last paragraph of this article. Nevertheless the aircraft of each party may proceed from any aerodrome in the territory of the other party which they are entitled to use to any other such aerodrome either for the purpose of landing the whole or part of their cargoes or passengers or of taking on board the whole or part of their cargoes or passengers, provided that such cargoes are covered by through bills of lading, and such passengers hold through tickets, issued respectively for a journey whose starting place and destination are not both points between which air commerce has been duly so reserved, and such aircraft, while proceeding as aforesaid, from one aerodrome to another, shall, notwithstanding that both such aerodromes are points between which air commerce has been duly reserved, enjoy all the privileges of this arrangement.

The term "air commerce" as used in the preceding paragraph shall, with respect to the parties to this arrangement, be understood to mean:—(a) navigation of aircraft in territory of either party in furtherance of a business; (b) navigation of aircraft from one place in territory of either party to another place in that territory in the conduct of a business; (c) the commercial transport of persons or goods between any two points in the territory of either party.

ARTICLE 6

Each of the Parties to this arrangement reserves the right to forbid flights over certain areas of its territory which are or may hereafter be designated as prohibited areas.

Each of the Parties reserves the right under exceptional circumstances in time of peace and with immediate effect temporarily to limit or prohibit air traffic above its territory on condition that in this respect no distinction is made between the aircraft of the other Party and the aircraft of any foreign country.

ARTICLE 7

Any aircraft which finds itself over a prohibited area shall, as soon as it is aware of the fact, give the signal of distress prescribed in the Rules of the Air in force in the territory flown over and shall land as soon as possible at an aerodrome situated in such territory outside of but as near as possible to such prohibited area.

ARTICLE 8

All aircraft shall carry clear and visible nationality and registration marks whereby they may be recognized during flight. In addition, they must bear the name and address of the owner.

All aircraft shall be provided with certificates of registration and of airworthiness and with all the other documents prescribed for air traffic in the territory in which they are registered.

The members of the crew who perform, in an aircraft, duties for which a special permit is required in the territory in which such aircraft is registered, shall be provided with all documents and in particular with the certificates and licenses prescribed by the regulations in force in such territory.

The other members of the crew shall carry documents showing their duties in the aircraft, their profession, identity and nationality.

The certificates of airworthiness, certificates of competency and licenses issued or rendered valid by one of the parties to this arrangement in respect of an aircraft registered in its territory or of the crew of such aircraft shall have the same validity in the territory of the other party as the corresponding documents issued or rendered valid by the latter.

Each of the parties reserves the right for the purpose of flight within its own territory to refuse to recognize certificates of competency and licenses issued to nationals of that party by the other party.

ARTICLE 9

Aircraft of either of the parties to this arrangement may carry wireless apparatus in the territory of the other party only if a license to install and work such apparatus shall have been issued by the competent authorities of the party in whose territory the aircraft is registered. The use of such apparatus shall be in accordance with the regulations on the subject issued by the competent authorities of the territory within whose air space the aircraft is navigating.

Such apparatus shall be used only by such members of the crew as are provided with a special license for the purpose issued by the Government of the territory in which the aircraft is registered.

The parties to this arrangement reserve respectively the right, for reasons of safety, to issue regulations relative to the obligatory equipment of aircraft with wireless apparatus.

ARTICLE 10

No arms of war, explosives of war, or munitions of war shall be carried by aircraft of either party above the territory of the other party or by the crew or passengers, except by permission of the competent authorities of the territory within whose air space the aircraft is navigating.

ARTICLE 11

Upon the departure or landing of any aircraft each party may within its own territory and through its competent authorities search the aircraft of the other party and examine the certificates and other documents prescribed.

ARTICLE 12

Aerodromes open to public air traffic in the territory of one of the parties to this arrangement shall in so far as they are under the control of the party in whose territory they are situated be open to all aircraft of the other party, which shall also be entitled to the assistance of the meteorological services, the wireless services, the lighting services, and the day and night signalling services, in so far as the several classes of services are under the control of the party in whose territory they respectively are rendered. Any scale of charges made, namely, landing, accommodation or other charge, with respect to the aircraft of each party in the territory of the other party, shall in so far as such charges are under the control of the party in whose territory they are made be the same for the aircraft of both parties.

ARTICLE 13

All aircraft entering or leaving the territory of either of the parties to this arrangement shall land at or depart from an aerodrome open to public air traffic and classed as a customs aerodrome at which facilities exist for enforcement of immigration regulations and clearance of aircraft, and no intermediary landing shall be effected between the frontier and the aerodrome. In special cases the competent authorities may allow aircraft to land at or depart from other aerodromes, at which customs, immigration and clearance facilities have been arranged. The prohibition of any intermediary landing applies also in such cases.

In the event of a forced landing outside the aerodromes, referred to in the first paragraph of this article, the pilot of the aircraft, its crew

and the passengers shall conform to the customs and immigration regulations in force in the territory in which the landing has been made.

Aircraft of each party to this arrangement are accorded the right to enter the territory of the other party subject to compliance with quarantine regulations in force therein.

The parties to this arrangement shall exchange lists of the aerodromes in their territories designated by them as ports of entry and departure.

ARTICLE 14

Each of the parties to this arrangement reserves the right to require that all aircraft crossing the frontiers of its territory shall do so between certain points. Subject to the notification of any such requirements by one party to the other party, and to the right to prohibit air traffic over certain areas as stipulated in Article 6, the frontiers of the territories of the parties to this arrangement may be crossed at any point.

ARTICLE 15

As ballast, only fine sand or water may be dropped from an aircraft.

ARTICLE 16

No article or substance, other than ballast, may be unloaded or otherwise discharged in the course of flight unless special permission for such purpose shall have been given by the authorities of the territory in which such unloading or discharge takes place.

ARTICLE 17

Whenever questions of nationality arise in carrying out the present arrangement, it is agreed that every aircraft shall be deemed to possess the nationality of the party in whose territory it is duly registered.

ARTICLE 18

The parties to this arrangement shall communicate to each other the regulations relative to air traffic in force in their respective territories.

ARTICLE 19

The present arrangement shall be subject to termination by either party upon sixty days notice given to the other party or by the enactment by either party of legislation inconsistent therewith.

I am glad to assure Your Excellency that the foregoing text is what has been accepted by my Government in the course of the negotiations and is approved by it.

In accordance with the suggestion of Your Excellency it is understood that the arrangement will come into force on November 15, 1933.

The present arrangement shall be subject to termination by either Party upon sixty days' notice given to the other Party or by the enactment by either Party of legislation inconsistent therewith."

It is further agreed that the arrangement will be operative as from the date of this note.

Arrangement between the United States of America and the Irish Free State, providing relief from double income tax on shipping profits. Effected by exchange of notes, signed August 24, 1933, and January 9, 1934.

IRISH FREE STATE LEGATION,
Washington, D.C., 24th August, 1933.

SIR:

Double income tax on shipping profits.
Reciprocal exemptions, United States and Irish Free State.

I am requested by my Government to bring to the notice of the Government of the United States the provisions of Section 10 of the Finance Act, 1932 (No. 20 of 1932) which section reads as follows:

"10.—Subject to the provisions of this section, exemption shall be granted from income tax (including super-tax, or sur-tax, as the case may be) in respect of so much of the income of a citizen of the United States of America not resident in the Irish Free State or of a corporation organised in the United States of America as is derived from the operation of a ship or ships documented under the laws of the United States of America."

I have the honour to be, Sir,
Your obedient servant,

W J B MACAULAY
Chargé d'Affaires ad interim

Honourable CORDELL HULL
The Secretary of State of the United States
Washington, D.C.

The Acting Secretary of State to the Minister of the Irish Free State (MacWhite)

DEPARTMENT OF STATE,
Washington, January 9, 1934.

SIR:

Agreement by United States.

In a note dated August 24, 1933, Mr. Macaulay, as Chargé d'Affaires *ad interim*, brought to the notice of the Government of the United States the provisions of Section 10 of the Irish Free State Finance Act of 1932, which provides for the relief of American steamship owners from double income tax on shipping profits.

The text of Section 10 of the above law was brought to the attention of the Secretary of the Treasury, with the request that he inform the Department of State whether the Irish Free State satisfied the equivalent exemption requirements of Sections 212(*b*) and 231(*b*)

Vol. 47, pp. 228, 230.

of the United States Revenue Act of 1932. I have pleasure in informing you that I am now in receipt of a letter from the Acting Secretary of the Treasury dated December 14, 1933, which reads in part as follows:

"In view of the fact that the Irish Free State, under the provision of law quoted above, exempts from income tax so much of the income of a citizen of the United States not resident in the Irish Free State or of a corporation organized in the United States as is derived from the operation of a ship or ships documented under the laws of the United States, it is the opinion of this Department that the Irish Free State meets the reciprocal exemption provisions of sections 212(*b*) and 231(*b*) of the Revenue Act of 1932. The income of a non-resident alien individual and of a foreign corporation which consists exclusively of earnings derived from the operation of a ship or ships documented under the laws of the Irish Free State is, therefore, not required to be included in gross income and is exempt from income tax under the provisions of the Revenue Act of 1932. The exemption accorded herein is effective April 6, 1932, the beginning of the first income-tax taxable year to which Section 10 of the Finance Act of 1932 is applicable."

It will be observed that the Acting Secretary of the Treasury holds that in view of the fact that the Irish Free State, under the provisions of Section 10 of the Irish Free State Finance Act of 1932, exempts from income tax so much of the income of a citizen of the United States not resident in the Irish Free State or of a corporation organized in the United States as is derived from the operation of a ship or ships documented under the laws of the United States, the Irish Free State has satisfied the equivalent exemption provisions of Sections 212(*b*) and 231(*b*) of the United States Revenue Act of 1932. The exemption accorded to steamship owners of the Irish Free State under the above ruling of the Acting Secretary of the Treasury is effective as of April 6, 1932, the beginning of the first income-tax taxable year to which Section 10 of the Irish Free State Finance Act of 1932 is applicable.

Accept, Sir, the renewed assurances of my highest consideration.

For the Acting Secretary of State:

R. WALTON MOORE

Mr. MICHAEL MACWHITE,
Minister of the Irish Free State.

April 24, 1934. *Protocol between the United States of America and Mexico relative to general claims. Signed April 24, 1934; effective April 24, 1934.*

Protocol with Mexico relative to General Claims Commission.

PROTOCOL RELATIVE TO CLAIMS PRESENTED TO THE GENERAL CLAIMS COMMISSION, ESTABLISHED BY THE CONVENTION OF SEPTEMBER 8, 1923.

PROTOCOLO RELATIVO A LAS RECLAMACIONES PRESENTADAS ANTE LA COMISION GENERAL DE RECLAMACIONES CREADA POR LA CONVENCION DE 8 DE SEPTIEMBRE DE 1923.

Plenipotentiaries.

Josephus Daniels, Ambassador Extraordinary and Plenipotentiary of the United States of America to the Government of Mexico, and José Manuel Puig Casauranc, Secretary for Foreign Affairs of the United Mexican States, duly authorized, have agreed on behalf of their two Governments to conclude the following Protocol:

Whereas, It is the desire of the two Governments to settle and liquidate as promptly as possible those claims of each Government against the other which are comprehended by, and which have been filed in pursuance of, the General Claims Convention between the two Governments, concluded on September 8, 1923;

Vol. 43, p. 1730.

Whereas, It is not considered expedient to proceed, at the present time, to the formal arbitration of the said claims in the manner provided in that Convention;

Whereas, It is considered to be conducive to the best interests of the two Governments, to preserve the *status quo* of the General Claims Convention above men-

Josephus Daniels, Embajador Extraordinario y Plenipotenciario de los Estados Unidos de América ante el Gobierno de México, y José Manuel Puig Casauranc, Secretario de Relaciones Exteriores de los Estados Unidos Mexicanos, debidamente autorizados, convienen en firmar, en nombre de sus respectivos Gobiernos, el siguiente Protocolo:

Considerando que es el deseo de ambos Gobiernos arreglar y liquidar, tan pronto como sea posible, las reclamaciones de cada uno de los dos Gobiernos en contra del otro, comprendidas en la Convención General de Reclamaciones celebrada el 8 de septiembre de 1923 entre los dos Gobiernos y registradas de acuerdo con la misma;

Considerando que no se juzga viable, en los momentos actuales, proceder al arbitraje formal de dichas reclamaciones mediante el procedimiento que establece la Convención mencionada;

Considerando que se juzga conducente para los mejores intereses de ambos Gobiernos conservar el "*statu quo*" de la Convención General de Reclamaciones

tioned and the Convention extending the duration thereof, which latter was concluded on June 18, 1932, as well as the agreement relating to agrarian claims under Article I of the additional Protocol of June 18, 1932;

Whereas, It is advisable to endeavor to effect a more expeditious and more economical disposition of the claims, either by means of an *en bloc* settlement or a more simplified method of adjudication, and

Whereas, In the present state of development of the numerous claims the available information is not such as to permit the two Governments to appraise their true value with sufficient accuracy to permit of the successful negotiation of an *en bloc* settlement thereof at the present time;

Therefore, It is agreed that:

First.—The two Governments will proceed to an informal discussion of the agrarian claims now pending before the General Claims Commission, with a view to making an adjustment thereof that shall be consistent with the rights and equities of the claimants and the rights and obligations of the Mexican Government, as provided by the General Claims Protocol of June 18, 1932. Pending such discussion no agrarian claims will be presented to the Commissioners referred to in Clause Third nor, in turn, to the Umpire referred to in Clause Fifth of this Protocol; but memorials of cases not yet memorial-

arriba mencionada y de la Convención de Prórroga celebrada el 18 de junio de 1932, así como de lo convenido para las reclamaciones agrarias en el Artículo I del Protocolo adicional de 18 de junio de 1932;

Considerando que conviene intentar la resolución más rápida y más económica de las reclamaciones, ya sea por medio de un arreglo global o de un método más simplificado para fallarlas, y

Considerando que en el presente estado de tramitación de las numerosas reclamaciones, los datos de que se dispone son de tal naturaleza que no permiten a los dos Gobiernos estimar el verdadero valor de ellas con exactitud suficiente para permitir la negociación con éxito de un arreglo global de las mismas en los momentos actuales;

Por tanto, queda convenido que:

Primero.—Los dos Gobiernos procederán a discutir, de manera informal, las reclamaciones agrarias pendientes en la actualidad ante la Comisión General de Reclamaciones, con el propósito de llegar a un arreglo con respecto a ellas, en consonannancia con la equidad y con los derechos de los reclamantes y con los derechos y obligaciones del Gobierno Mexicano, según lo establecido por el Protocolo de la Comisión General de 18 de junio de 1932. Mientras esté pendiente esta discusión, no se presentarán reclamaciones agrarias a los Comisionados a que se refiere la Claúsula Tercera, ni, en su caso, al Arbitro a que alude

Protocol to apply to agrarian claims only.

Consequently, the subsequent provisions of this Protocol shall apply to agrarian claims only insofar as they do not conflict with the status thereof, as exclusively fixed by the terms of the agreed Article I of the additional protocol to the extension of the General Claims Convention, signed June 18, 1932.

Procedure to be followed.

Second.—The two Governments shall proceed, in accordance with the provisions of clause Sixth below, promptly to complete the written pleadings and briefs in the remaining unpleaded and incompletely pleaded cases.

Each party to appoint a Commissioner.

Third.—Each Government shall promptly designate, from among its own nationals, a Commissioner, who shall be an outstanding jurist and whose function it shall be to appraise, on their merits, as rapidly as possible, the claims of both Governments which have already been fully pleaded and briefed and those in which the pleadings and briefs shall be completed in accordance herewith.

Por consiguiente, las disposiciones subsecuentes de este Protocolo serán aplicables a las reclamaciones agrarias únicamente en lo que no se opongan a la situación de dichas reclamaciones, como está fijada exclusivamente por los términos del Artículo I pactado en el Protocolo adicional a la Convención de Prórroga de la Convención General de Reclamaciones, firmada en 18 de junio de 1932.

Segundo.—Los dos Gobiernos, de acuerdo con las disposiciones de la Cláusula Sexta de este Protocolo, procederán desde luego a completar los escritos y alegatos en los casos en que éstos no se hayan presentado o estén incompletos.

Tercero.—Cada uno de los dos Gobiernos designará en breve plazo a un Comisionado de su propia nacionalidad, quien deberá ser un destacado jurisconsulto y cuyas funciones serán las de estimar en cuanto a sus fundamentos y tan rápidamente como sea posible, las reclamaciones de ambos Gobiernos, en las cuales hayan sido completados todos los escritos y alegatos, así como aquellas en que hayan de completarse tales escritos y alegatos según lo dispuesto por este Protocolo.

Cuarto.—Seis meses antes de vencer el plazo para completar los escritos y alegatos a que se refiere la Cláusula Sexta, o en alguna fecha anterior, en caso de que así lo convengan, los referidos

so agree, the said Commissioners shall meet, at a place to be agreed upon by them, for the purpose of reconciling their appraisals. They shall, as soon as possible, and not later than six months from the date of the completion of the pleadings and briefs, submit to the two Governments a joint report of the results of their conferences, indicating those cases in which agreement has been reached by them with respect to the merits and the amount of liability, if any, in the individual cases and also those cases in which they shall have been unable to agree with respect to the merits or the amount of liability, or both.

Fifth.—The two Governments shall, upon the basis of such joint report, and with the least possible delay, conclude a convention for the final disposition of the claims, which convention shall take one or the other of the two following forms, namely, first, an agreement for an *en bloc* settlement of the claims wherein there shall be stipulated the net amount to be paid by either Government and the terms upon which payment shall be made; or, second, an agreement for the disposition of the claims upon their individual merits. In this latter event, the two above-mentioned Commissioners shall be required to record their agreements with respect to individual claims and the bases upon which their conclusions shall have been reached, in the respective cases.

Comisionados se reunirán en el lugar que designen de común acuerdo con el objeto de armonizar sus estimaciones. Tan pronto como sea posible y dentro de los seis meses contados desde la fecha en que se completen los escritos y alegatos, presentarán a los dos Gobiernos un dictamen conjunto sobre el resultado de sus conferencias, en el que indicarán los casos en que hayan llegado a un acuerdo en cuanto a los fundamentos y al monto de la responsabilidad, si alguna resultare, en cada caso, indicando asímismo los casos en que no hayan podido ponerse de acuerdo, ya sea respecto a los fundamentos o al monto de la responsabilidad, o a ambas cosas.

Joint report to be submitted.

Quinto.—Los dos Gobiernos, sobre la base del referido dictamen conjunto, y con el menor retardo posible, celebrarán una Convención para la resolución definitiva de las reclamaciones, debiendo en dicha Convención adoptarse una u otra de las dos formas siguientes, a saber: primero, la de un convenio para un arreglo global de las reclamaciones, en el que se estipulará la cantidad líquida que habrá de pagar alguno de los dos Gobiernos y las condiciones en que se habrá de efectuar tal pago; o, segundo, la de un convenio para la resolución de las reclamaciones sobre los fundamentos de cada una. En este último caso, se exigirá a los dos Comisionados arriba mencionados, que hagan constar los acuerdos celebrados por ellos con respecto a cada una de las reclamaciones y los fundamentos en que se basen sus conclusiones, en el caso respectivo.

All matters relating to the designation of an Umpire, time within which his decisions should be rendered and general provisions relating to his work shall be fixed in a Convention to be negotiated under provisions of this Clause.

Pleadings and briefs.

Sixth.—The procedure to be followed in the development of the pleadings and briefs, which procedure shall be scrupulously observed by the Agents of the two Governments, shall be the following:

(a) The time allowed for the completion of the pleadings and briefs shall be two years counting from a date hereafter to be agreed upon by the two Governments by an exchange of notes, which shall not be later than November 1, 1934.

(b) The pleadings and briefs of each Government shall be filed at the Embassy of the other Government.

(c) The pleadings and briefs to be filed shall be limited in number to four, namely, Memorial, Answer, Brief and Reply Brief. Only three copies of each need be

El dictamen que rindan será aceptado, por medio de la Convención que celebren los dos Gobiernos, como la resolución definitiva y final de dichos casos. Con respecto a los casos en que los Comisionados no hayan podido ponerse de acuerdo, los dos Gobiernos, en esa misma Convención, estipularán que los escritos y alegatos presentados en ellos, juntamente con las opiniones escritas de los dos Comisionados sobre los fundamentos de las reclamaciones respectivas, se someterán a un Arbitro cuyos fallos escritos serán aceptados también por ambos Gobiernos como definitivos y obligatorios. Todo lo que se refiere a designación de Arbitro, período de tiempo de que dispondrá para fallar y modalidades de su trabajo, serán fijados en la Convención de que habla esta Claúsula.

Sexto.—El procedimiento que se seguirá en el desarrollo de los escritos y alegatos, procedimiento que observarán escrupulosamente los Agentes de los dos Gobiernos, será el siguiente:

(a) El plazo concedido para completar los escritos y alegatos será de dos años contados desde la fecha en que posteriormente convengan los dos Gobiernos por medio de un cambio de notas, que no se efectuará más tarde del 1° de noviembre de 1934.

(b) Los escritos y alegatos de cada uno de los dos Gobiernos serán presentados en la Embajada del otro Gobierno.

(c) Los escritos y alegatos que se presenten quedan limitados a cuatro, a saber: el Memorial, la Contestación, el Alegato y el Alegato de Réplica. Sólo será ne-

presented to the other Agent, but four additional copies shall be retained by the filing Agency for possible use in future adjudication. Each copy of Memorial, Answer and Brief shall be accompanied by a copy of all evidence filed with the original thereof. The pleadings and briefs, which may be in either English or Spanish at the option of the filing Government, shall be signed by the respective Agents or properly designated substitutes.

cesario presentar tres copias de cada uno al otro Agente, pero la Agencia que los presente conservará cuatro ejemplares adicionales para que se puedan usar al resolverse los casos en el futuro. Cada una de las copias de tales Memoriales, Contestaciones y Alegatos irá acompañada de una copia de todas las pruebas presentadas con el escrito original. Los escritos y alegatos, que podrán presentarse en inglés o en español, a voluntad del Gobierno que los presente, estarán firmados por los Agentes respectivos o por substitutos de éstos designados en debida forma.

(d) With the Memorial the claimant Government shall file all the evidence on which it intends to rely. With the Answer the respondent Government shall file all the evidence upon which it intends to rely. No further evidence shall be filed by either side except such evidence, with the Brief, as rebuts evidence filed with the Answer. Such evidence shall be strictly limited to evidence in rebuttal and there shall be explained at the beginning of the Brief the alleged justification for the filing thereof. If the other side desires to object to such filing, its views may be set forth in the beginning of the Reply Brief, and the Commissioners, or the Umpire, as the case may require, shall decide the point, and if it is decided that the evidence is not in rebuttal to evidence filed with the Answer, the additional evidence shall be entirely disregarded in considering the merits of the claim.

(d) Con el Memorial, el Gobierno demandante presentará todas las pruebas en que se funde. Con su Contestación, el Gobierno demandado presentará todas las pruebas en que piense apoyarse. No se presentará prueba adicional alguna por ninguna de las dos partes exceptuando las pruebas que se presenten con el Alegato para refutar las pruebas presentadas con la Contestación. Tales constancias se limitarán a pruebas de refutación y se expresará al principio del Alegato las justificaciones que se tengan para presentar dichas pruebas. Si la otra parte deseare objetar su presentación, sus objeciones pueden manifestarse al principio del Alegato de Réplica, y los Comisionados o el Arbitro, según sea el caso, decidirán el punto. Si se resolviera que las pruebas no refutan las presentadas con la Contestación, las adicionales no se tomarán en cuenta al considerarse los fundamentos de la reclamación.

Commissioners may order further evidence.

The Commissioners may at any time order the production of further evidence.

Los Comisionados podrán en cualquier tiempo pedir que se presenten pruebas adicionales.

(e) In view of the desire to reduce the number of pleadings and briefs to a minimum in the interest of economy of time and expense, it shall be the obligation of both Agents fully and clearly to state in their Memorials the contention of the claimant Government with respect to both the factual bases of the claims in question and the legal principles upon which the claims are predicated and, in the Answer, the contentions of the respondent Government with regard to the facts and legal principles upon which the defense of the case rests. In cases in which Answers already filed do not sufficiently meet this provision so as to afford the claimant Government an adequate basis for preparing its legal Brief with full general knowledge of the factual and legal defenses of the respondent Government, it shall have the right to file a Counter Brief within thirty days following the date of filing the Reply Brief.

(f) For the purposes of the above pleadings and briefs, as well as the appraisals and decisions of the two Commissioners and the decisions of the Umpire, above mentioned, the provisions of the General Claims Convention of September 8, 1923, shall be considered as fully effective and binding upon the two Governments, except insofar as concerns the matter of procedure, which shall be that provided for herein.

(g) Whenever practicable, cases of a particular class shall be grouped for memorializing and/or for briefing.

(e) En vista del deseo que hay de reducir el número de los escritos y alegatos al mínimo, en provecho de la economía de tiempo y gastos, será obligación de ambos Agentes exponer amplia y claramente en sus Memoriales los argumentos del Gobierno demandante con respecto tanto a los hechos en que se base alguna reclamación como a los principios jurídicos en que se funde, y, en la Contestación, los argumentos del Gobierno demandado relativos a los hechos y principios jurídicos en que se apoye la defensa del caso. En los casos en que las Contestaciones ya presentadas no se ajusten exactamente a esta disposición para dar al Gobierno reclamante una base adecuada para la preparación de su Alegato con perfecto conocimiento de los hechos y excepciones legales del Gobierno demandado, tendrá el derecho de presentar un Contra-alegato dentro de los treinta días siguientes a la fecha de la presentación del Alegato de Réplica.

(f) Por lo que respecta a los escritos y alegatos arriba mencionados, así como a las estimaciones y fallos de los dos Comisionados y los fallos del Arbitro, se considerarán como plenamente efectivas y obligatorias para ambos Gobiernos las disposiciones de la Convención General de Reclamaciones de 8 de septiembre de 1923, salvo en lo que respecta a la materia de procedimientos, la cual se regirá por el presente Protocolo.

(g) Siempre que sea factible, se agruparán los casos de una clase determinada, para la presentación de los Memoriales y de los Alegatos, o de cualquiera de los dos.

(h) In order that the two Agents may organize their work in the most advantageous manner possible and in order that the two-year period allowed for pleadings and briefs may be utilized in a manner which shall be most equitable to both sides, each Agent shall, within thirty days from the beginning of the two-year pleading period, submit to the other Agent a tentative statement showing the total number of Memorials and Briefs such Agent intends to file. Six months after the beginning of the two-year pleading period, the two Agents shall respectively submit in the same manner statements setting out definitely by name and docket number the claims in which it is proposed to complete the pleadings and briefs, indicating those in which they intend to combine cases in the manner indicated in paragraph (g) above. The number of pleadings and briefs so indicated shall not, except by later agreement between the two Governments, be exceeded by more than ten percent.

(i) In order to enable the Agencies to distribute their work equally over the two-year pleading period, each Agency shall be under the obligation to file its Memorials at approximately equal intervals during the first seventeen months of the two-year period, thus allowing the remaining seven months of the period for the completion of the pleadings and briefs in the last case memorialized. The same obligation shall attach with re-

(h) Para que los dos Agentes puedan organizar sus trabajos en la forma más eficiente que sea posible, y para que el período de dos años concedidos para la presentación de escritos y alegatos se pueda aprovechar del modo más equitativo para ambas partes, cada uno de los dos Agentes, dentro de los treinta días siguientes al comienzo de dicho período de dos años para la presentación de tales escritos, deberá presentar al otro Agente un estado previo que demuestre el número total de Memoriales y Alegatos que piense presentar. A los seis meses contados desde el comienzo del referido período de dos años para la presentación de escritos, los dos Agentes presentarán respectivamente, en la misma forma, estados que expongan definitivamente, especificando los nombres y números de registro, las reclamaciones en las que se propongan completar los escritos y alegatos con la indicación de los casos en que piensen agruparlos del modo indicado en el inciso (g) anterior. El número de escritos y alegatos mencionados no deberá, salvo acuerdo posterior entre los dos Gobiernos, excederse en más de un diez por ciento.

(i) Para que las Agencias puedan distribuir sus trabajos uniformemente en todo el período de dos años para presentación de escritos, cada una de ellas estará obligada a presentar sus Memoriales a intervalos más o menos iguales durante los primeros diecisiete meses del referido período, a efecto de que durante los siete meses restantes se completen los escritos y alegatos en el último caso en que se hubiere presentado Memorial.

(j) The time to be allowed for filing Answers shall be seventy days from the date of filing Memorials. The time to be allowed for filing Briefs shall be seventy days from the date of filing the Answers. The time to be allowed for filing Reply Briefs shall be seventy days from the date of filing the Briefs.

(k) In those cases in which some pleadings or briefs were filed with the General Claims Commission before the date of signature hereof, the Agency which has the right to file the next pleading or brief shall be allowed to determine when that document shall be filed, taking into consideration the necessity of complying with the provisions of paragraph (i) above.

(l) In counting the seventy-day periods mentioned in paragraph (j) above, no deductions shall be made for either Sundays or holidays. The date of filing the above described pleadings and briefs shall be considered to be the date upon which they shall be delivered at the Embassy of the other Government. If the due date shall fall on Sunday or a legal holiday, the pleading or brief shall be filed upon the next succeeding business day. The two Governments shall, for this purpose, instruct their respective Embassies to receive and give receipts for such pleadings and

Esta misma obligación existirá con respecto a la presentación de los escritos y alegatos a que se refiere el inciso (k) más adelante.

(j) El plazo que se concede para la presentación de Contestaciones será de setenta días contados desde la fecha de la presentación de los Memoriales. El plazo para la presentación de Alegatos será de setenta días contados desde la fecha de la presentación de las Contestaciones. El plazo para la presentación del Alegato de Réplica será de setenta días, contados desde la fecha de la presentación de los Alegatos.

(k) En aquellos casos en que se hayan presentado algunos escritos o alegatos ante la Comisión General de Reclamaciones con anterioridad a la fecha de la firma del presente Protocolo, la Agencia que tenga derecho a presentar el escrito o alegato siguiente estará autorizada para determinar la fecha en que se haya de presentar tal documento, tomando en consideración la necesidad que hay de cumplir las disposiciones del inciso (i) anterior.

(l) Al contar los períodos de setenta días de que habla el inciso (j) anterior, no se harán deducciones por concepto de domingos ni días de fiesta. La fecha de la presentación de los escritos y alegatos antes mencionados se considerará que es la fecha en que sean entregados en la Embajada del otro Gobierno. Si la fecha de vencimiento cayere en algún domingo o día de fiesta oficial, el escrito o alegato se presentará en el día hábil siguiente. Los dos Gobiernos, con este objeto, darán instrucciones a sus Embajadas respectivas de recibir y dar recibos por tales escritos y

(m) In view of the herein prescribed limitations upon the time allowed for the completion of the work of the Agencies and the Commissioners, it is recognized that the success of this simplified plan of procedure depends fundamentally upon the prompt and regular filing of the pleadings and briefs in accordance with the provisions of this Protocol. It is agreed, therefore, that any pleading or brief which shall be filed more than thirty days after the due date for the filing thereof, shall be disregarded by the Commissioners and the Umpire, and that the respective case shall be considered by them upon the pleadings and briefs preceding the tardy pleadings and briefs, unless, by agreement of the two Governments, the continued pleading of the respective case shall be resumed.

Se conviene, por consiguiente, que cualquier escrito o alegato que se entregue más de treinta días después de la fecha fijada para su presentación, no será tomado en cuenta por los Comisionados y el Arbitro, y que el caso de que se trate será considerado por ellos únicamente sobre la base de los escritos y alegatos que precedan al que se hubiere presentado extemporáneamente, a menos de que, por acuerdo entre ambos Gobiernos, se autorice la continuación de las alegaciones en el caso respectivo.

Should such inspection be refused, then the action taken in response to the request to inspect, together with such reasons as may be assigned for the action taken, shall be reported to the Commissioners and, in turn, to the Umpire mentioned in Clause Fifth of this Protocol, so that due notice thereof may be taken.

The American Minister (Owen) to the Danish Minister for Foreign Affairs (Munch)

No. 46. LEGATION OF THE UNITED STATES OF AMERICA,
Copenhagen, March 12, 1934.

EXCELLENCY:

Arrangement with Denmark governing air navigation.

Reference is made to the negotiations which have taken place between the Government of the United States of America and the Government of Denmark for the conclusion of a reciprocal air navigation arrangement between the United States of America and Denmark, governing the operation of civil aircraft of the one country in the other country.

It is my understanding that it has been agreed in the course of the negotiations, now terminated, that this arrangement shall be as follows:

ARTICLE 1

Tentative provisions.

Pending the conclusion of a convention between the United States of America and Denmark on the subject of air navigation, the operation of civil aircraft of the one country in the other country shall be governed by the following provisions:

ARTICLE 2

Area affected.

The present arrangement shall apply to the United States of America and Denmark, and likewise, subject to the provisions of the second paragraph of Article 6, the following possessions, territories or colonies over which they respectively exercise jurisdiction, including territorial waters:

(a) Alaska, Puerto Rico, Virgin Islands of the United States, and American Samoa.
(b) Greenland.

ARTICLE 3

Aircraft defined.

The term aircraft with reference to one or the other Party to this arrangement shall be understood to mean civil aircraft, including state aircraft used exclusively for commercial purposes, duly registered in the territory of such Party.

ARTICLE 4

Freedom of passage.

Each of the parties undertakes to grant liberty of passage above its territory in time of peace to the aircraft of the other party, provided that the conditions set forth in the present arrangement are observed.

Regular air routes by transport companies.

It is, however, agreed that the establishment and operation of regular air routes by an air transport company of one of the parties within the territory of the other party or across the said territory, with or without intermediary landing, shall be subject to the prior consent of the other party given on the principle of reciprocity and at the request of the party whose nationality the air transport company possesses.

Refusal only on reasonable grounds.

Each party to the arrangement agrees that its consent for operation over its territory by air transport companies of the other party may not be refused on unreasonable or arbitrary grounds. The consent may be made subject to special regulations relating to aerial safety and public order.

Pilot licenses.

The parties to this arrangement agree that the period in which pilots may, while holding valid pilot licenses issued or rendered valid by either country, operate registered aircraft of that country in the other country for non-industrial or non-commercial purposes shall be limited to a period not exceeding six months from the time of entry for the purpose of operating aircraft, unless prior to the expiration of this period the pilots obtain from the government of the country in which they are operating, pilot licenses authorizing them to operate aircraft for non-industrial or non-commercial purposes.

ARTICLE 5

Internal legislation to govern.

The aircraft of each of the Parties to this arrangement, their crews and passengers, shall while within the territory of the other Party, be subject to the general legislation in force in that territory as well as the regulations in force therein relating to air traffic in general, to the transport of passengers and goods and to public safety and order insofar as these regulations apply to all foreign aircraft, their crews and passengers.

Each of the Parties to this arrangement shall permit the import or export of all merchandise which may be legally imported or exported and also the carriage of passengers, subject to any customs, immigration and quarantine restrictions, into or from their respective territories in the aircraft of the other Party, and such aircraft, their passengers and cargoes, shall enjoy the same privileges as and shall not be subjected to any other or higher duties or charges than those which the aircraft of the country, imposing such duties or charges, engaged in international commerce, and their cargoes and passengers, or the aircraft of any foreign country likewise engaged, and their cargoes and passengers, enjoy or are subjected to.

Each of the Parties to this arrangement may reserve to its own aircraft air commerce between any two points neither of which is in a foreign country. Nevertheless the aircraft of either Party may proceed from any aerodrome in the territory of the other Party which they are entitled to use to any other such aerodrome either for the purpose of landing the whole or part of their cargoes or passengers or of taking on board the whole or part of their cargoes or passengers provided that such cargoes are covered by through bills of lading and such passengers hold through tickets, issued respectively for a journey whose starting place and destination both are not points between which air commerce has been duly so reserved, and such aircraft, while proceeding as aforesaid, from one aerodrome to another shall, notwithstanding that such aerodromes are points between which air commerce has been duly reserved, enjoy all the privileges of this arrangement.

ARTICLE 6

Restricted areas.

Each of the Parties to this arrangement shall have the right to prohibit air-traffic over certain areas of its territory, provided that no distinction in this matter is made between its aircraft engaged in international commerce and the aircraft of the other Party likewise engaged. The areas above which air traffic is thus prohibited by either Party must be notified to the other Party.

Each of the Parties may make the right to engage in air traffic over any of its possessions, territories or colonies, specified in subparagraphs (a) or (b) of Article 2, dependent upon the granting of a special permit and upon the fulfillment of special conditions and rules, provided that, subject to the right to reserve to national aircraft air commerce as described in the third paragraph of Article 5, no distinction in this matter is made between aircraft registered in its territory and aircraft registered in territory of the other Party. Each Party shall notify the other Party of its possession, territory or colony over which air traffic will not be permitted without a special permit.

Each of the Parties reserves the right under exceptional circumstances in time of peace and with immediate effect temporarily to limit or prohibit air traffic above its territory on condition that in this respect no distinction is made between the aircraft of the other Party and the aircraft of any foreign country.

ARTICLE 7

Aircraft entering restricted area accidentally.

Any aircraft which finds itself over a prohibited area referred to in the first paragraph of Article 6 shall, as soon as it is aware of the fact, give the signal of distress prescribed in the Rules of the Air in force in the territory flown over and shall land as soon as possible at an aerodrome situated in such territory outside of but as near as possible to such prohibited area.

ARTICLE 8

Distinctive, etc., marks.

All aircraft shall carry clear and visible nationality and registration marks whereby they may be recognized during flight. In addition, they must bear the name and address of the owner.

Certificates required.

All aircraft shall be provided with certificates of registration and of airworthiness and with all the other documents prescribed for air traffic in the territory in which they are registered.

The members of the crew who perform, in an aircraft, duties for which a special permit is required in the territory in which such aircraft is registered, shall be provided with all documents and in particular with the certificates and licenses prescribed by the regulations in force in such territory.

The other members of the crew shall carry documents showing their duties in the aircraft, their profession, identity and nationality.

Validity of certificates.

The certificates of airworthiness, certificates of competency and licenses issued or rendered valid by one of the Parties to this arrangement in respect of an aircraft registered in its territory or of the crew of such aircraft shall have the same validity in the territory of the other Party as the corresponding documents issued or rendered valid by the latter.

Rights reserved.

Each of the Parties reserves the right for the purpose of flight within its own territory to refuse to recognize certificates of competency and licenses issued to nationals of that Party by the other Party.

ARTICLE 9

Radio regulations.

Aircraft of either of the Parties to this arrangement may carry wireless apparatus in the territory of the other Party only if a license to install and work such apparatus shall have been issued by the competent authorities of the Party in whose territory the aircraft is registered. The use of such apparatus shall be in accordance with the regulations on the subject issued by the competent authorities of the territory within whose air space the aircraft is navigating.

Such apparatus shall be used only by such members of the crew as are provided with a special license for the purpose issued by the Government of the territory in which the aircraft is registered.

The Parties to this arrangement reserve respectively the right, for reasons of safety, to issue regulations relative to the obligatory equipment of aircraft with wireless apparatus.

ARTICLE 10

War materials restrictions.

No arms of war, explosives of war, or munitions of war shall be carried by aircraft of either Party above the territory of the other Party or by the crew or passengers, except by permission of the competent authorities of the territory within whose air space the aircraft is navigating.

ARTICLE 11

Inspection, etc.

Upon the departure or landing of any aircraft each Party may within its own territory and through its competent authorities search the aircraft of the other Party and examine the certificates and other documents prescribed.

ARTICLE 12

Aerodromes.

Aerodromes open to public air traffic in the territory of one of the Parties to this arrangement shall in so far as they are under the control of the Party in whose territory they are situated be open to all aircraft of the other Party, which shall also be entitled to the assistance of the meteorological services, the wireless services, the lighting services, and the day and night signalling services, in so far as the several classes of services are under control of the Party in whose territory they respectively are rendered. Any scale of charges made, namely, landing, accommodation or other charge, with respect to the aircraft of each Party in the territory of the other Party, shall in so far as such charges are under the control of the Party in whose territory they are made be the same for the aircraft of both Parties.

ARTICLE 13

Landings, etc.

All aircraft entering or leaving the territory of either of the Parties to this arrangement shall land at or depart from an aerodrome open to public air traffic and classed as a customs aerodrome at which facilities exist for enforcement of immigration regulations and clearance of aircraft, and no intermediary landing shall be effected between the frontier and the aerodrome. In special cases the competent authorities may allow aircraft to land at or depart from other aerodromes, at which customs, immigration and clearance facilities have been arranged. The prohibition of any intermediary landing applies also in such cases.

In the event of a forced landing outside the aerodromes, referred to in the first paragraph of this article, the pilot of the aircraft, its

crew and the passengers shall conform to the customs and immigration regulations in force in the territory in which the landing has been made.

Aircraft of each Party to this arrangement are accorded the right to enter the territory of the other Party subject to compliance with quarantine regulations in force therein.

The Parties to this arrangement shall exchange lists of the aerodromes in their territories designated by them as ports of entry and departure.

ARTICLE 14

Flight restrictions.

Each of the Parties to this arrangement reserves the right to require that all aircraft crossing the frontiers of its territory shall do so between certain points. Subject to the notification of any such requirements by one Party to the other Party, and to the right to prohibit air traffic over certain areas as stipulated in Article 6 the frontiers of the territories of the Parties to this arrangement may be crossed at any point.

ARTICLE 15

Ballast.

As ballast, only fine sand or water may be dropped from an aircraft.

ARTICLE 16

ROYAL DANISH LEGATION
WASHINGTON, D.C.

No. 125. *p.t.* BAR HARBOR, MAINE, *September 4, 1928.*

SIR,

Arrangement with Denmark for the reciprocal treatment of automobiles.

I am directed to inform you, that the Danish Government, on condition of reciprocity, is prepared to grant freedom from taxation for a period of 3 months to foreign automobiles built for the transportation of passengers not to exceed 7 in number including the driver, and belonging in the country in question and registered as the property of persons residing there.

In these circumstances I would be greatly obliged to you for being so good as to let me know, what formalities and conditions must be complied with in order that motor vehicles registered in Denmark may be exempted from taxation in the United States, therein included duties and taxes of all kinds.

I have the honor to be, Sir,

With the highest consideration,

Your most obedient and humble servant,

C. BRUN.

The Honorable
J. REUBEN CLARK, Jr.,
Acting Secretary of State,
Department of State, Washington, D.C.

The Secretary of State to the Danish Minister (Brun)

DEPARTMENT OF STATE,
Washington, October 27, 1928.

SIR:

Response by United States.

I have the honor to acknowledge the receipt of your note of September 4, 1928, in which you were good enough to inform me that your Government, on the basis of reciprocity, is prepared to grant freedom from taxation for a period of three months to foreign automobiles built for transportation of passengers not to exceed seven in number, including the driver, and belonging in the country in question and registered as the property of persons residing there.

In reply I have the honor to inform you that the Federal Government imposes no taxes on automobiles in the United States. The taxation of owners of automobiles and the exaction of fees for the registration of automobiles is a matter for determination by the several States. The Department has been informally advised that an investigation of the motor vehicle laws of the forty-eight States of the United States discloses the fact that all of them grant reciprocity to foreign visitors.

This reciprocity is granted in respect both to the license plate and the driving license, provided, of course, that the same reciprocity is extended by foreign countries to residents of States that are now granting this courtesy. With regard to the taxation of owners of automobiles which is usually distinct from the payment of a registration fee, it may be stated that it is the Department's understanding that as a general rule such taxes are only imposed upon persons who are found to be legal residents of a certain State. Such taxes, it is believed, would not be exacted from persons who are merely touring through the several States of the Union, the class of persons to whom, presumably, reference is made in your note under acknowledgment.

In this connection the following information regarding the freedom from customs duties granted on a reciprocal basis to motorcycles and automobiles brought into the United States by nonresidents for a period of not more than six months, quoted from a letter from the Treasury Department, would appear pertinent to your inquiry:

"The regulations governing such importations are contained in Chapter VIII, Customs Regulations of 1923, Articles 406–413. Article 407 provides that entry shall be made on Customs Form 7501, and that bond shall be given on Customs Form 7563 (with surety) in a penal sum equal to double the estimated duties. In lieu of such bond, the importer may deposit a cash amount equal to the estimated duties, which is treated as a cash bond. The entry will be liquidated free of duty, and the bond canceled or the amount deposited returned, if the vehicle in question is exported within the six months period prescribed by Section 308 and provided that exportation is made in the manner required by Article 412 of the regulations. When not so exported, the vehicles are treated in the same manner as similar articles imported for sale and consumption, and assessed for duty on their value at the time of importation. The six months period prescribed for exportation cannot be extended."

I have the honor to express the hope that in the light of the foregoing information the competent Danish authorities will be prepared to grant reciprocal treatment to American citizens desiring to drive automobiles in Denmark.

Accept, Sir, the renewed assurances of my highest consideration.

For the Secretary of State:

W. R. CASTLE, JR.

No. 14. FEBRUARY 2, 1929.

SIR,

Concurrence by Denmark.

Referring again to your reply-letter of October 27, 1928 in regard to taxation in this country of automobiles and exemption from such taxation of the automobiles of foreign visitors, I have the honor to state as follows:

In the last paragraph of your aforesaid letter you expressed the hope, that the competent Danish authorities, in the light of the information placed at their disposal, would be prepared to grant reciprocal treatment to American citizens desiring to drive automobiles in Denmark.

In this connection I am directed by the Danish Minister of Foreign Affairs to transmit to you the four copies here enclosed of a Regulation issued on this subject on January 18, 1929 by the Danish Ministry of Public Works. It will be seen that this Regulation, in view of the authorization contained in § 7 No. 1 of the Act No. 143 of July 1, 1927 on taxation of automobiles, etc., exempts from the tax prescribed in the said paragraph, for a period not exceeding 3 months, (visiting) automobiles for transportation of persons, built to seat not more than seven persons including the chauffeur, which belong in the United States and are registered in the United States as the property of persons residing in the United States.

A copy of § 7 No. 1 of the said Act is herewith enclosed.

I have the honor to be, Sir,
with the highest consideration,
Your most obedient and humble servant,

Memorandum of Agreement between the United States, Australia, Canada, China, India, Mexico, Peru, and Spain concerning Silver, with supplementary undertakings. Signed at London July 22, 24, and 26, 1933; effective April 24, 1934.

July 22, 24, 26, 1933.
April 24, 1934.

SILVER AGREEMENT

MEMORANDUM OF HEADS OF AGREEMENT entered into by the Delegates of India, China and Spain as holders of large stocks or users of silver, and of Australia, Canada, the United States, Mexico and Peru as principal producers of silver, at the Monetary and Economic Conference held in London, July, 1933.

Silver agreement.

WHEREAS, at a meeting of the Sub-Commission II (Permanent Measures) of the Monetary and Financial Commission of the Monetary and Economic Conference held on Thursday, July 20th, 1933, the following Resolution was unanimously adopted.

"Be it resolved to recommend to all the Governments parties to this Conference:

"(*a*) That an agreement be sought between the chief silver producing countries and those countries which are the largest holders or users of silver with a view to mitigating fluctuations in the price of silver; and that the other nations not parties to this agreement should refrain from measures which could appreciably affect the silver market;

"(*b*) That the Governments parties to this Conference shall refrain from new legislative measures which would involve further debasement of their silver coinage below a fineness of 800/1000;

"(*c*) That they shall substitute silver coins for low value paper currency insofar as the budgetary and local conditions of each country will permit;

"(*d*) That all of the provisions of this Resolution are subject to the following exceptions and limitations:

"The requirements of such provisions shall lapse on April 1st, 1934, if the agreement recommended in paragraph (*a*) does not come into force by that date, and in no case shall extend beyond January 1st, 1938;

"Governments may take any action relative to their silver coinage that they may deem necessary to prevent the flight or destruction of their silver coinage by reason of a rise in the bullion price of the silver content of their coin above the nominal or parity value of such silver coin," and,

WHEREAS, the Governments of India and Spain may desire to sell certain portions of their silver holdings, and it will be to their advantage that the countries which are large producers of silver should absorb silver as herein provided, to offset such sales, and,

WHEREAS, it is to the advantage of the large producing countries named in Article 2 that the sales of silver from monetary stocks be limited as herein provided, and

WHEREAS, it is to the advantage of China that sales from monetary stocks of silver be offset by purchases as herein provided, with a view to its effective stabilisation;

NOW, THEREFORE, it is agreed between the parties hereto:

1. (*a*) That the Government of India shall not dispose by sale of more than one hundred and forty million fine ounces of silver during a period of four years, commencing with January 1st, 1934. The disposals during each calendar year of the said four year period shall be based on an average of thirty five million fine ounces per year, it being understood, however, that, if in any year, the Government of India shall not dispose of thirty five million fine ounces, the difference between the amount actually disposed of and thirty five million fine ounces may be added as additional disposals in subsequent years. Provided further that the maximum amount disposed of in any year shall be limited to fifty million fine ounces.

(*b*) Notwithstanding anything previously stated in this Article, it is understood that if the Government of India should after the date of this agreement sell silver to any Government for the purpose of transfer to the United States Government in payment of war debts such silver shall be excluded from the scope of this agreement;

(*c*) Provided, however, that when the total of the disposals referred to in paragraph (*a*) above plus the sales referred to in paragraph (*b*) above by the Government of India under this agreement shall amount to one hundred and seventy five million fine ounces, the obligation of the parties hereto shall cease.

2. That the Governments of Australia, Canada, the United States, Mexico and Peru, during the existence of this agreement, shall not sell any silver, and shall also in the aggregate purchase, or otherwise arrange for withdrawing from the market, thirty five million fine ounces of silver from the mine production of such countries in each calendar year for a period of four years commencing with the calendar year 1934. The said Governments undertake to settle by agreement the share in the said thirty five million fine ounces which each of them shall purchase or cause to be withdrawn.

3. That the silver purchased or withdrawn in accordance with Article 2 above shall be used for currency purposes (either for coinage or for currency reserves), or be otherwise retained from sale during said period of four years.

4. That the Government of China shall not sell silver resulting from demonetised coins for a period of four calendar years commencing January 1st, 1934.

5. That the Government of Spain shall not dispose by sale of more than twenty million fine ounces of silver during a period of four years commencing January 1st, 1934. The disposals during each calendar year of the said four year period shall be based on an average of five million fine ounces per year; it being understood, however, that if in any year the Government of Spain shall not dispose of five million fine ounces, the difference between the amount actually disposed of and five million fine ounces may be added as additional disposals in subsequent years; provided further that the

maximum amount disposed of in any year shall be limited to seven million fine ounces.

6. That the Governments concerned will exchange all such information as may be necessary with regard to the measures to fulfil the provisions of this memorandum of agreement.

7. That it is understood, that subject to the provisions of Article 8, the undertakings of each party to the present memorandum of agreement are conditional upon the fulfilment of the undertakings of every other party thereto.

8. That this memorandum of agreement is subject to ratification by the Governments concerned. The instruments of ratification shall be deposited not later than the 1st April, 1934,[1] with the Government of the United States. It shall come into force as soon as the ratifications of all the Governments concerned are received provided that all the ratifications are received before the 1st April, 1934. A notice by any Government that the affirmative action necessary to carry out the purposes of this agreement has been taken will be accepted as an instrument of ratification. Nevertheless, if one or more of the Governments enumerated in Article 2 fail to ratify by the 1st April, 1934, the agreement shall come into force at that date if the other Governments mentioned in Article 2 which have ratified notify the other Governments which ratify that they are prepared to purchase, or cause to be withdrawn, in the aggregate the amount of silver mentioned in Article 2. The Government of the United States is requested to take such steps as may be necessary for the purpose of the conclusion of this agreement.

Silver Agreement: Reservation by China

Reservation by China.
